Index	3.14	3.96	4.04	6.01	5.46	5.01	4.99

QTD, YTD and 1 Year performance is not annualized.

Benchmark life performance is reported from 01/31/2001

Class A operating expenses are 0.85% and gross operating expenses are 1.04%.

Operating expenses reflect a voluntary expense reimbursement, which may be discontinued at any time.

Average annual total returns reflect the change in share price and the reinvestment of all dividends and capital gains. Net Asset Value (NAV) returns do not reflect the deduction of any sales charges. POP (Public Offering Price) performance reflects the deduction of the maximum sales charge of 2.75%. A contingent deferred sales charge of 0.50% may apply on certain redemptions made within 18 months following purchases on which a finder's fee has been paid.

## INVESTMENT OPPORTUNITY

The fund seeks to generate high current income exempt from federal income tax by investing primarily in intermediate-term municipal securities.

The fund employs an interest rate strategy to help manage the downside risk of rate movements on the portfolio. This is backed by extensive credit analysis to help maintain a high quality portfolio.

## Growth of \$10,000 Class A for the period ending 06/30/2011 Actual initial investment \$9,725

This chart assumes an initial investment of \$10,000 made on Jan 16, 2001 for Class A shares including any applicable sales charges. Performance assumes reinvestment of dividends and capital gain distributions.

Performance data quoted represents past results. Past performance is no guarantee of future results and current performance may be higher or lower than the performance shown. Investment return and principal value will fluctuate so your shares, when redeemed, may be worth more or less than their original cost. ### IMPORTANT RISK CONSIDERATIONS:

A portion of income may be subject to some state and/or local taxes and, for certain investors, a portion may be subject to the federal alternative minimum tax. As interest rates rise, existing bond prices fall and can cause the value of an investment in the portfolio to decline. Changes in interest rates will affect the value of longer-term fixed income securities more than shorter-term securities. Investing in municipal bonds involves market risk and credit risk.

Characteristics	Fund
Duration	4.75 years
SEC Yield	3.72%
Standard Deviation	6.40

Income Paid Monthly:	NAV at Month-End
April	\$ 0.032090 10.78
May	\$ 0.030504 10.87
June	\$ 0.030647 10.90

### GLOSSARY

**Duration** represents the interest rate sensitivity of a fixed income fund. For example, if a fund's duration is five years, a 1% increase in interest rates would result in a 5% decline in the fund's price. Similarly, a 1% decline in interest rates would result in a 5% gain in the fund's price.

**SEC Yield** (Class A share only) represents net investment income earned by a fund over a 30-day period, expressed as an annual percentage rate based on the fund's share price at the end of the 30-day period.

All performance figures reflect a partial waiver of fees where applicable. Without the partial waiver of fees, the performance figures would be lower. The SEC Yield would have been 3.49%.

**Standard Deviation** (3 year) measures variability of returns around the average return for an investment fund. Higher standard deviation suggests greater risk.

### RATINGS DISTRIBUTION METHODOLOGY:

The ratings issued by Nationally Recognized Statistical Rating Organizations assess the credit worthiness of a corporation's or government debt issues. The ratings apply to the Fund's holdings and not to the fund itself. The Fund uses the higher of the S&P, Moody's and Fitch ratings when determining the rating distribution. If only two agencies have rated the security, then the higher of the two ratings is used. If only one rating is available from the aforementioned providers, that rating is used. If no rating is available from the aforementioned providers, the security is placed in the Not Rated category.
