See attachment for a list of distribution dates and return of capital amounts per share.

15 Describe the quantitative effect of the organizational action on the basis of the security in the hands of a U.S. taxpayer as an adjustment per share or as a percentage of old basis ▶ The attachment provides the total distribution per share, as well as, the non-taxable return of capital per share, on a distribution by distribution basis. The return of capital per share should reduce the taxpayer's adjusted basis of each share held on the date of each listed distribution by 100% of the original distribution amount.

16 Describe the calculation of the change in basis and the data that supports the calculation, such as the market values of securities and the valuation dates ▶ An analysis of the issuer's current and accumulated earnings and profits was performed as of 10/31/15 and 11/30/15 in order to determine the non-taxable return of capital.

Part II Organizational Action (continued)

18 Can any resulting loss be recognized? ▶ The return of capital per share should reduce the taxpayer's adjusted basis of each share held on the date of distribution. Upon disposition of all or a portion of the shares, the taxpayer should recognize greater gain or less loss.

19 Provide any other information necessary to implement the adjustment, such as the reportable tax year ▶ The reportable tax year of distribution is 2014 and 2015. Actual return of capital will be reflected on the taxpayer's 2014 and 2015 form 1099.
