INVESTMENT OPPORTUNITY

The fund seeks to offer access to U.S. exchange-listed companies that are managed or influenced by wealthy individuals who have accumulated a substantial amount of their personal wealth through the companies that they manage.

In the opinion of the subadviser, companies managed or influenced by individuals who have created significant wealth in their companies will outperform because those managers tend to prioritize creation of longterm shareholder value over the shorter-term considerations that are typical of other corporate management teams.

Investment Process

CRITERIA FOR INCLUSION IN THE FUND

- > Each component security must:
 - Have a wealthy individual in a control position that allows for substantial decision making authority (e.g., Chief Executive Officer or Chairman of the Board).
 - A wealthy individual is defined as a person whose level of personal assets generally exceeds \$500 million.
 - A wealthy individual must own \$100 million of the common equity.
 - Be an operating company listed on a U.S. exchange and not a closed-end fund, an exchange-traded fund (ETF), or a limited partnership.
 - Have been publicly listed for at least two years.
 - Have a market capitalization of at least \$200 million.
 - Have an average daily value traded for the prior 3-months of greater than \$2 million.
- > All securities are equally weighted, and the fund is reviewed and rebalanced quarterly.

Performance data quoted represents past results. Past performance is no guarantee of future results and current performance may be higher or lower than the performance shown. Investment return and principal value will fluctuate so your shares, when redeemed, may be worth more or less than their original cost. Please visit Virtus.com for performance data current to the most recent month-end.

The fund class gross expense ratio is 1.28%. The net expense ratio is 1.20%, which reflects a contractual expense reimbursement in effect through 4/30/2018.

Average annual total returns reflect the change in share price and the reinvestment of all dividends and capital gains. Class I shares have no sales charge and therefore their returns do not reflect the deduction of a sales charge, which if applied, would reduce the performance quoted. Fees and expenses vary among share classes and other share classes do carry sales charges. Class I shares are offered primarily to eligible institutional investors who purchase the minimum amounts required and may not be available to all investors. For fund performance on other share classes, please visit www.virtus.com.

GLOSSARY

R²: A measurement of how closely a portfolio's performance correlates with the performance of a benchmark index.

Beta: A quantitative measure of the volatility of a given portfolio to the overall market. Higher beta suggests higher volatility.

Standard Deviation: Measures variability of returns around the average return for an investment portfolio. Higher standard deviation suggests greater risk.

Price/Cash Flow: Per-share stock price divided by the per-share operating cashflow.

Price/Book: Per-share stock price divided by the latest 12-month per-share book value.

Trailing P/E: Per-share stock price divided by the latest 12-months earnings per share.

3-Year EPS Growth Rate: Average of earnings per share growth for latest a forecast of the portfolio's performance.

Alpha: A measure of performance on a risk-adjusted basis.

Sharpe Ratio: A statistic that measures the efficiency, or excess return per unit of risk, of a manager's returns. It is calculated by taking the portfolio's annualized return, minus the annualized risk-free rate (typically the 30-Day T-Bill return), divided by the portfolio's annualized standard deviation. The greater the Sharpe Ratio, the better the portfolio's risk adjusted return.

IMPORTANT RISK CONSIDERATIONS:

Equity Securities: The market price of equity securities may be adversely affected by financial market, industry, or issuer-specific events. Focus on a particular style or on small or medium-sized companies may enhance that risk. **Industry/Sector Concentration:** A fund that focuses its investments in a particular industry or sector will be more sensitive to conditions that affect that industry or sector than a non-concentrated fund. **Prospectus:** For additional information on risks, please see the fund's prospectus.
