INVESTMENT OPPORTUNITY

The fund seeks to generate high current income and total return by applying extensive credit research and a time-tested approach to capitalize on opportunities across undervalued sectors of the bond market.

The portfolio seeks diversification among 14 sectors in order to potentially increase return and manage risk.

A team of investment professionals provides significant research depth across all bond market sectors.

SEC Yield	4.24%
-----------	-------

SEC Yield (Class A share only) represents net investment income earned by a fund over a 30-day period, expressed as an annual percentage rate based on the fund's share price at the end of the 30-day period. All performance figures reflect a partial waiver of fees where applicable. Without the partial waiver of fees, the performance figures would be lower. The SEC Yield would have been 4.09%.

Effective May 8, 2017 this fund changed its name from the Virtus Multi-Sector Intermediate Bond Fund.

Investment Process

Average Annual Total Returns Class A as of 06/30/2017 in percent

	QTD	YTD	1 Year	3 Year	5 Year	10 Year	Since Inception 12/15/1989

Index	1.45	2.27	-0.31	2.48	2.21	4.48	6.08

The fund class gross expense ratio is 1.17%. The net expense ratio is 1.02%, which reflects a contractual expense reimbursement in effect through 4/30/2018. This ratio reflects the direct and indirect expenses paid by the Fund.

The net expense ratio minus the indirect expenses incurred by the underlying funds in which the Fund invests is 0.99%.

Average annual total returns reflect the change in share price and the reinvestment of all dividends and capital gains. Net Asset Value (NAV) returns do not reflect the deduction of any sales charges. POP (Public Offering Price) performance reflects the deduction of the maximum sales charge of 3.75%. A contingent deferred sales charge of 0.50% may be imposed on certain redemptions within 18 months on purchases on which a finder's fee has been paid.

GLOSSARY

Duration represents the interest rate sensitivity of a fixed income fund. For example, if a fund's duration is five years, a 1% increase in interest rates would result in a 5% decline in the fund's price. Similarly, a 1% decline in interest rates would result in a 5% gain in the fund's price.

Standard Deviation (3 year) measures variability of returns around the average return for an investment fund. Higher standard deviation suggests greater risk.

RATINGS DISTRIBUTION METHODOLOGY: The ratings issued by Nationally Recognized Statistical Rating Organizations assess the credit worthiness of a corporation's or government debt issues. The ratings apply to the fund's holdings and not the fund itself. The higher of the ratings between Moody's, Standard & Poor's and Fitch is used. If one of the three agencies does not have a rating, the higher of the other two ratings is used. If only one agency has rated the bond, the rating from that agency is used. If none of the three agencies have rated the bond the bond is placed in the Not Rated category. Credit ratings are subject to change. Aaa, Aa, A, and Baa are investment grade ratings; Ba, B, Caa, Ca, C and D are below-investment grade ratings.

IMPORTANT RISK CONSIDERATIONS:

Credit & Interest: Debt securities are subject to various risks, the most prominent of which are credit and interest rate risk. The issuer of a debt security may fail to make interest and/or principal payments. Values of debt securities may rise or fall in response to changes in interest rates, and this risk may be enhanced with longer-term maturities.

Foreign & Emerging Markets: Investing internationally, especially in emerging markets, involves additional risks such as currency, political, accounting, economic, and market risk. **High Yield-High Risk**

Fixed Income Securities: There is a greater level of credit risk and price volatility involved with high yield securities than investment grade securities. **ABS/**

MBS: Changes in interest rates can cause both extension and prepayment risks for asset- and mortgage-backed securities. These securities are also subject to risks associated with the repayment of underlying collateral. **Bank**

Loans: Loans may be unsecured or not fully collateralized, may be subject to restrictions on resale and/or trade infrequently on the secondary market. Loans can carry significant credit and call risk, can be difficult to value and have longer settlement times than other investments, which can make loans relatively illiquid at times. **Prospectus:** For additional information on risks, please see the fund's prospectus.

Investment Manager of the Fund
