Infrastructure Capital Advisors expects to declare future dividends on a quarterly basis. Dividends are planned, but not guaranteed, for the months of January, April, July, and October of each year. The next dividend is scheduled to occur in July 2017.

ABOUT INFRASTRUCTURE CAPITAL ADVISORS, LLC

Infrastructure Capital Advisors, LLC is an SEC-registered investment advisor that manages an actively managed ETF and a series of private investment partnerships. The firm was formed in 2012 and is based in New York City. The company seeks total-return opportunities in key infrastructure sectors, including energy, real estate, transportation, industrials and utilities. It often identifies opportunities in entities that are not taxed at the entity level, such as master limited partnerships ("MLPs") and real estate investment trusts ("REITs"). Current income is a primary objective in most, but not all, of the company's investing activities. The focus is generally on asset-intensive companies that generate and distribute substantial streams of free cash flow. For more information, please visit www.infracapmlp.com.

DISCLOSURE

Fund Risks

Exchange Traded Funds: The value of an ETF may be more volatile than the underlying portfolio of securities the ETF is designed to track. The costs of owning the ETF may exceed the cost of investing directly in the underlying securities.

MLP Interest Rates: As yield-based investments, MLPs carry interest rate risk and may underperform in rising interest rate environments. Additionally, when investors have heightened fears about the economy, the risk spread between MLPs and competing investment options can widen, which may have an adverse effect on the stock price of MLPs. Rising interest rates may increase the potential cost of MLPs financing projects or cost of operations, and may affect the demand for MLP investments, either of which may result in lower performance by or distributions from the Fund's MLP investments.

Industry/Sector Concentration: A fund that focuses its investments in a particular industry or sector will be more sensitive to conditions that affect that industry or sector than a non-concentrated fund.

Short Sales: The fund may engage in short sales, and may experience a loss if the price of a borrowed security increases before the date on which the fund replaces the security.

Leverage: When a fund leverages its portfolio, the value of its shares may be more volatile and all other risks may be compounded.

Derivatives: Investments in derivatives such as futures, options, forwards, and swaps may increase volatility or cause a loss greater than the principal investment.

MLPs: Investments in Master Limited Partnerships may be adversely impacted by tax law changes, regulation, or factors affecting underlying assets.

No Guarantee: There is no guarantee that the portfolio will meet its objective.

You should consider the fund's investment objectives, risks, and charges and expenses carefully before investing.
