

**INVESTMENT OVERVIEW**

The Fund seeks to generate attractive risk-adjusted long-term returns, consisting of both capital appreciation and current income, by investing in a globally diversified stock portfolio of high-quality, mature businesses with a history of consistent, robust dividend yields. A disciplined investment process is employed to identify businesses that are differentiated by above-average returns on capital and trading at attractive valuations.

**KEY FEATURES**

**High-Quality Businesses** — Searches for quality dividend-paying global companies with solid balance sheets, consistent growth, profitability, and market dominant business models

**Lower Volatility Approach** — Extensive fundamental research favors companies with less business risk, as defined by lower earnings variability, consistent and profitable growth, high returns on capital, strong free cash flow, and a low organic need for external financing, all of which can help to protect profits in difficult markets

**High-Conviction Portfolio** — Focused on the portfolio team’s 25-50 strongest investment opportunities, with a long-term, low-turnover approach to realize full stock value potential

**AVERAGE ANNUAL TOTAL RETURNS (%) as of 12/30/2022**

Performance data quoted represents past performance. Past performance does not guarantee future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please visit [virtus.com](http://virtus.com) for performance data current to the most recent month end. This share class has no sales charges and is not available to all investors. Other share classes have sales charges. See [virtus.com](http://virtus.com) for details.

The fund class gross expense ratio is 1.25%. The net expense ratio is 1.10%, which reflects a contractual expense reimbursement in effect through 01/31/2024.

Average annual total return is the annual compound return for the indicated period and reflects the change in share price and the reinvestment of all dividends and capital gains. Returns for periods of one year or less are cumulative returns.

**ANNUAL PERFORMANCE (%)**

	2022	2021	2020	2019	2018	2017	2016	2015	2014	2013
<b>Fund</b>	-2.54	12.88	-6.35	22.39	-5.10	14.54	9.79	-4.28	12.53	28.94
<b>Index</b>	-4.74	15.83	-0.03	23.15	-7.56	18.14	9.29	-3.20	2.48	21.91

**GROWTH OF \$10,000**

This chart assumes an initial investment of \$10,000 made on 6/6/2008. As of 12/30/2022 the fund value would have been \$21,951.76. Fund performance assumes reinvestment of dividends and capital gain distributions. This growth reflects no front end sales charges.

CHARACTERISTICS	Fund	Index
Avg. Weighted Market Cap (bn)	72.04	133.35
Median Market Cap (bn)	32.23	13.03
Trailing P/E Ex-Negative Earnings	13.61	12.88
Price-to-Cash Flow	10.00	11.77
Price-to-Book Value	3.19	3.43
3-Year Earnings Growth Rate	7.16	9.35
5-Year Earnings Growth Rate	6.27	11.54
Active Share	82.44	n/a
Dividend Yield	4.47	3.82
30-day SEC Yield <sup>1</sup>	3.18	
30-day SEC Yield (unsubsidized) <sup>2</sup>	3.01	

<sup>1</sup> 30-day SEC Yield is a standardized yield calculated according to a formula set by the SEC, and is subject to change.

<sup>2</sup> 30-day SEC Yield (unsubsidized) is the 30 day SEC yield without the effect of applicable expense waivers.

**IMPORTANT RISK CONSIDERATIONS**

**Equity Securities:** The market price of equity securities may be adversely affected by financial market, industry, or issuer-specific events. Focus on a particular style or on small or medium-sized companies may enhance that risk. **Foreign Investing:** Investing in foreign securities subjects the portfolio to additional risks such as increased volatility; currency fluctuations; less liquidity; less publicly available information about the foreign investment; and political, regulatory, economic, and market risk. **Market Volatility:** The value of the securities in the portfolio may go up or down in response to the prospects of individual companies and/or general economic conditions. Price changes may be short- or long-term. Local, regional, or global events such as war or military conflict (e.g., Russia's invasion of Ukraine), acts of terrorism, the spread of infectious illness (e.g., COVID-19 pandemic) or other public health issues, recessions, or other events could have a significant impact on the portfolio and its investments, including hampering the ability of the portfolio's manager(s) to invest the portfolio's assets as intended. **Prospectus:** For additional information on risks, please see the fund's prospectus.

**GLOSSARY**

**Avg. Weighted Market Cap (bn):** The sum of each security's weight within the fund (or index) multiplied by the security's market capitalization. **Trailing P/E Ex-Negative Earnings:** Per share stock price divided by the latest 12-months earnings per share. **Price-to-Cash Flow:** Per-share stock price divided by the per-share operating cash flow. **Price-to-Book Value:** A ratio used to compare a stock's market value to its book value. **3-Year Earnings Growth Rate:** Average of earnings per share growth for latest 3-year period. **5-Year Earnings Growth Rate:** Average of earnings per share growth for latest 5-year period. **Active Share:** A measure of the percentage of stock holdings in a manager's portfolio that differ from the benchmark index. **Dividend Yield:** The annual percentage of return earned by an investor on a common or preferred stock, calculated by dividing the amount of the dividends per share by the current market price per share of the stock. **Alpha:** A risk-adjusted measure of an investment's excess return relative to a benchmark. **Beta:** A quantitative measure of the volatility, or systematic risk, of a security or a portfolio in comparison to the market as a whole. **R<sup>2</sup>:** A measure that represents the percentage of a fund or security's movements that can be explained by movements in a benchmark index. **Sharpe Ratio:** A risk-adjusted measure calculated using standard deviation and excess return to determine reward per unit of risk. **Standard Deviation:** Measures variability of returns around the average return for an investment portfolio. Higher standard deviation suggests greater risk.

**INDEX DEFINITION**

Index: The MSCI World High Dividend Yield Index (net) is based on the MSCI World Index, its parent index, and includes large and mid cap stocks across 23 Developed Markets (DM) countries. The index is designed to reflect the performance of equities in the parent index (excluding REITs) with higher dividend income and quality characteristics than average dividend yields that are both sustainable and persistent. The index also applies quality screens and reviews 12-month past performance to omit stocks with potentially deteriorating fundamentals that could force them to cut or reduce dividends. The index is calculated on a total return basis with net dividends reinvested; it is unmanaged; its returns do not reflect any fees, expenses or sales charges; and it is not available for direct investment.

Morningstar Rating™ for funds, or 'star rating,' is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Ratings do not take into account the effect of sales charges and loads.
