

INVESTMENT OVERVIEW

The Fund seeks to maximize total return through a combination of current income and capital appreciation by investing primarily in U.S. government agency mortgage-backed securities and collateralized mortgage obligations. Seix's bottom-up focused, top-down aware investment approach seeks to provide superior risk-adjusted returns over a full market cycle, as well as competitive absolute and relative returns over shorter horizons.

KEY FEATURES

High-Quality Mortgages — Emphasizes income, quality, diversification, and liquidity in mortgage securities expected to perform well in rising and falling markets, such as those with stable pre-payments and refinancing barriers

Extensive Fundamental Research — Combines top-down and bottom-up analysis to identify securities with the strongest risk/reward profiles

Risk Management — Strict controls around portfolio construction, sell discipline, and trading strategy strive to mitigate downside exposure

Performance data quoted represents past results. Past performance is no guarantee of future results and current performance may be higher or lower than the performance shown. Investment return and principal value will fluctuate, so your shares, when redeemed, may be worth more or less than their original cost. Please visit Virtus.com for performance data current to the most recent month-end.

The fund class gross expense ratio is 1.89%. The net expense ratio is 0.91%, which reflects a contractual expense reimbursement in effect through 7/31/2019. This ratio reflects the direct and indirect expenses paid by the Fund. The net expense ratio minus the indirect expenses incurred by the underlying funds in which the Fund invests is 0.90%. Average annual total return is the annual compound return for the indicated period and reflects the change in share price and the reinvestment of all dividends and capital gains. Returns for periods of one year or less are cumulative returns. Class A shares have a maximum sales charge of 2.25%. A contingent deferred sales charge of 0.50% may be imposed on certain redemptions within 12 months on purchases on which a finder's fee has been paid. POP (Public Offering Price) performance reflects the deduction of the maximum sales charge.

ANNUAL PERFORMANCE (%)

	2017	2016	2015	2014	2013	2012	2011	2010	2009	2008
Fund	2.16	1.18	1.22	6.38	-2.32	2.61	6.49	6.11	5.41	6.15

RATINGS DISTRIBUTION

CHARACTERISTICS

Characteristic	Fund
Effective Duration	5.16
Weighted Average Maturity	6.99
SEC Yield ¹	2.29

¹ SEC Yield (Class A share only) represents net investment income earned by a fund over a 30-day period, expressed as an annual percentage rate based on the fund's share price at the end of the 30-day period. Performance figures represent a partial waiver/reimbursement of fees where applicable. Without the partial waiver/reimbursement of fees, performance figures would be lower and the SEC Yield would have been: 1.23%.

IMPORTANT RISK CONSIDERATIONS

Credit & Interest: Debt securities are subject to various risks, the most prominent of which are credit and interest rate risk. The issuer of a debt security may fail to make interest and/or principal payments. Values of debt securities may rise or fall in response to changes in interest rates, and this risk may be enhanced with longer-term maturities. **U.S. Government Securities:** U.S. government securities may be subject to price fluctuations. An agency may default on an obligation not backed by the United States. Any guarantee on U.S. government securities does not apply to the value of the fund's shares. **ABS/MBS:** Changes in interest rates can cause both extension and prepayment risks for asset- and mortgage-backed securities. These securities are also subject to risks associated with the repayment of underlying collateral. **Prospectus:** For additional information on risks, please see the fund's prospectus.

GLOSSARY

Effective Duration: The change in the value of a fixed income security that will result from a 1% change in interest rates while taking into account the way changes in rates will affect the expected cash flows of any bond with an embedded option such as call or prepayment option. This measure assigns a probability to the exercise of a call option, where applicable, based on specified shifts in the yield curve. Duration is expressed as a number of years, and generally, the larger the duration, the greater the interest rate risk or reward for a portfolio's underlying bond prices. **Weighted Average Maturity:** The length of time until the average security in a fund will mature, be redeemed by its issuer, or paid down over time, which is the case with most securitized assets. **Alpha:** A risk-adjusted measure of an investment's excess return relative to a benchmark. **Beta:** A quantitative measure of the volatility, or systematic risk, of a security or a portfolio in comparison to the market as a whole. **R²:** A measure that represents the percentage of a fund or security's movements that can be explained by movements in a benchmark index. **Sharpe Ratio:** A risk-adjusted measure calculated using standard deviation and excess return to determine reward per unit of risk. **Standard Deviation:** Measures variability of returns around the average return for an investment portfolio. Higher standard deviation suggests greater risk.

INDEX DEFINITION

Index: The Bloomberg Barclays U.S. Mortgage Backed Securities Index measures agency mortgage-backed pass through securities (fixed-rate and hybrid ARM) issued by GNMA, FNMA, and FHLMC. The index is calculated on a total return basis. The index is unmanaged, its returns do not reflect any fees, expenses, or sales charges, and is not available for direct investment.

Please carefully consider a fund's investment objectives, risks, charges, and expenses before investing. For this and other information about any Virtus mutual fund, contact your financial representative, call 1-800-243-4361, or visit Virtus.com for a prospectus or summary prospectus. Read it carefully before investing. Not insured by FDIC/NCUSIF or any federal government agency. No bank guarantee. Not a deposit. May lose value.

RATINGS DISTRIBUTION METHODOLOGY

The ratings issued by Nationally Recognized Statistical Rating Organizations assess the credit worthiness of a corporation's or government's debt issues. The ratings apply to the fund's holdings and not the fund itself. Standard & Poor's, Moody's, and Fitch ratings are used. If all three agencies have rated the security, then the median rating based on numerical equivalents is used. If only two agencies have rated the security, then the lower of the two ratings is used. If only one agency has rated the security, the rating from that agency is used. Credit ratings are subject to change. AAA, AA, A, and BBB are investment grade ratings; BB, B, CCC, CC, C, and D are below-investment grade ratings.

Morningstar Rating™ for funds, or 'star rating,' is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Ratings do not take into account the effect of sales charges and loads.
