

INVESTMENT OVERVIEW

The Series seeks attractive long-term returns by investing in international companies with attractive cash flow and valuation metrics. Coupled with deep fundamental analysis, stocks are selected based on cash flow return on invested capital, which can better capture a company's true economic return by avoiding global accounting differences and creating more accurate comparisons between countries.

KEY FEATURES

A Focus on Cash Flow Returns — Bottom-up research emphasizes profitability on invested capital, measuring a company's ability to create value

Top-Down Trends Help Control Risk — Macro research helps inform regional, country, and sector allocations, with more weight in periods of structural instability and heightened correlations

Benchmark-Agnostic — High-conviction portfolio of 30-40 securities searches for opportunity wherever cash flow returns appear mispriced, across market capitalizations with a bias toward quality and value

AVERAGE ANNUAL TOTAL RETURNS (%) as of 03/31/18

Performance data quoted represents past results. Past performance is no guarantee of future results and current performance may be higher or lower than the performance shown. Investment return and principal value will fluctuate, so your shares, when redeemed, may be worth more or less than their original cost. Please visit Virtus.com for performance data current to the most recent month-end.

Benchmark life performance is reported from 04/30/90.

The fund class gross expense ratio is 1.21%. The net expense ratio is 1.18%, which reflects a contractual expense reimbursement in effect through 4/30/2019.

Average annual total return is the annual compound return for the indicated period and reflects the change in share price and the reinvestment of all dividends and capital gains. Returns for periods of one year or less are cumulative returns.

ANNUAL PERFORMANCE (%)

	2017	2016	2015	2014	2013	2012	2011	2010	2009	2008
Series	15.95	-1.61	-10.48	-3.90	7.78	16.52	-4.57	13.47	39.87	-38.98
Index	25.03	1.00	-0.81	-4.90	22.78	17.32	-12.14	7.75	31.78	-43.38

GROWTH OF \$10,000

This chart assumes an initial investment of \$10,000 made on 5/1/1990. As of 3/29/2018 the fund value would have been \$55,728.45. Fund performance assumes reinvestment of dividends and capital gain distributions. This growth reflects no front end sales charges.

The subadviser of the Series transitioned from Euclid Advisors LLC to Duff & Phelps Investment Management Co. on September 7, 2016, following Euclid's assumption of responsibilities on November 2, 2015. There was no change to the portfolio manager or the investment approach. Performance prior to November 2, 2015 was attained by the prior manager. Effective April 28, 2017 this Series changed its name from the Virtus International Series.

IMPORTANT RISK CONSIDERATIONS

Equity Securities: The market price of equity securities may be adversely affected by financial market, industry, or issuer-specific events. Focus on a particular style or on small or medium-sized companies may enhance that risk. **Foreign & Emerging Markets:** Investing internationally, especially in emerging markets, involves additional risks such as currency, political, accounting, economic, and market risk. **Derivatives:** Investments in derivatives such as futures, options, forwards, and swaps may increase volatility or cause a loss greater than the principal investment. **Prospectus:** For additional information on risks, please see the fund's prospectus.

GLOSSARY

Avg. Weighted Market Cap (bn): The total dollar market value of all of a company's outstanding shares. **Trailing P/E:** Per share stock price divided by the latest 12-months earnings per share. **Price-to-Cash Flow:** Per-share stock price divided by the per-share operating cash flow. **Price-to-Book Value:** A ratio used to compare a stock's market value to its book value. **3-Year EPS Growth Rate:** Average of earnings per share growth for latest 3-year period. **5-Year EPS Growth Rate:** Average of earnings per share growth for latest 5-year period. **Active Share:** A measure of the percentage of stock holdings in a manager's portfolio that differ from the benchmark index. **Alpha:** A risk-adjusted measure of an investment's excess return relative to a benchmark. **Beta:** A quantitative measure of the volatility, or systematic risk, of a security or a portfolio in comparison to the market as a whole. **R²:** A measure that represents the percentage of a fund or security's movements that can be explained by movements in a benchmark index. **Sharpe Ratio:** A risk-adjusted measure calculated using standard deviation and excess return to determine reward per unit of risk. **Standard Deviation:** Measures variability of returns around the average return for an investment portfolio. Higher standard deviation suggests greater risk.

Index: The MSCI EAFE® Index (net) is a free float-adjusted market capitalization-weighted index that measures developed foreign market equity performance, excluding the U.S. and Canada. The index is calculated on a total return basis with net dividends reinvested. The index is unmanaged, its returns do not reflect any fees, expenses, or sales charges, and is not available for direct investment.

Morningstar Rating™ for funds, or 'star rating,' is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Ratings do not take into account the effect of sales charges and loads.

The investments for the Series are managed by the same portfolio manager(s) who manage one or more other funds that have similar names, investment objectives and investment styles as the Series. You should be aware that the Series is likely to differ from the other mutual funds in size, cash flow pattern and tax matters. Accordingly, the holdings and performance of the Series can be expected to vary from those of the other mutual funds.

Shares of the separate Series of Virtus Variable Insurance Trust are sold only through the currently effective prospectuses and are not available to the general public. Shares of the VIT Series may be purchased only by life insurance companies to be used with their separate accounts which fund variable annuity and variable life insurance policies or qualified retirement plans and are also available as an underlying investment fund for certain qualified retirement plans. The performance information for the Series does not reflect fees and expenses of the insurance companies. If such fees and expenses were deducted, performance would be lower.

Please carefully consider the investment objectives, risks, charges, and expenses of the Series before investing. For this and other information about any Virtus Variable Insurance Trust Series, call 1-800-367-5877 or visit virtus.com for a prospectus and/or summary prospectus. Read it carefully before you invest or send money.
