

### INVESTMENT OVERVIEW

The Fund seeks to generate attractive risk-adjusted long-term returns by investing in high-quality companies across the globe. Fundamental, bottom-up research aims to identify well-managed businesses with consistent operating histories and financial performance that have favorable long-term economic prospects, and, in most cases, generate free cash flow.

### KEY FEATURES

**High-Quality Growth** — Searches for quality, high-return growth businesses with strong profitability and durable franchises, trading at attractive valuations

**Benchmark Unconstrained** — A high-conviction, concentrated approach to investing that focuses on minimizing business risk rather than Index risk

**Lower Volatility Approach** — A long-term-focused investment philosophy and approach which strives to offer market participation with less risk and volatility than the Index

### FUND INFORMATION

### MORNINGSTAR RATINGS

| Time Period | # of Stars | # of Funds |
|-------------|------------|------------|
| Overall     | ★★★        | 307        |
| 3 Year      | ★★★        | 307        |
| 5 Year      | Not Rated  | n/a        |
| 10 Year     | Not Rated  | n/a        |

Morningstar ratings are based on risk-adjusted returns. Strong ratings are not indicative of positive fund performance.

### INVESTMENT ADVISER

Virtus Investment Advisers, Inc.

### INVESTMENT SUBADVISER

Morningstar ratings are based on risk-adjusted returns. Strong ratings are not indicative of positive fund performance.

## Vontobel

Vontobel Asset Management believes that the best way to achieve capital appreciation and outperform the market over time is by investing in well-managed businesses with consistent operating histories and financial performance that have favorable long-term economic prospects.

### PORTFOLIO MANAGERS

#### Matthew Benkendorf

Industry start date: 1998  
Start date as Fund Portfolio Manager: 2009

#### Ramiz Chelat, CFA

Industry start date: 1997  
Start date as Fund Portfolio Manager: 2016

Performance data quoted represents past performance. Past performance does not guarantee future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please visit [virtus.com](http://virtus.com) for performance data current to the most recent month end. This share class has no sales charges and is not available to all investors. Other share classes have sales charges. See [virtus.com](http://virtus.com) for details.

The fund class gross expense ratio is 1.05%. The net expense ratio is 0.90%, which reflects a contractual expense reimbursement in effect through 1/31/2023.

Average annual total return is the annual compound return for the indicated period and reflects the change in share price and the reinvestment of all dividends and capital gains. Returns for periods of one year or less are cumulative returns.

### ANNUAL PERFORMANCE (%)

|       | 2021  | 2020  | 2019  | 2018 | 2017 | 2016 | 2015 | 2014 | 2013 | 2012 |
|-------|-------|-------|-------|------|------|------|------|------|------|------|
| Fund  | 13.88 | 19.20 | 27.89 | n/a  |
| Index | 18.54 | 16.25 | 26.60 | n/a  |

### GROWTH OF \$10,000

This chart assumes an initial investment of \$10,000 made on 1/30/2018. As of 6/30/2022 the fund value would have been \$12,114.30. Fund performance assumes reinvestment of dividends and capital gain distributions. This growth reflects no front end sales charges.

| Real Estate            | 0.00     | 2.81    |

### IMPORTANT RISK CONSIDERATIONS

**Equity Securities:** The market price of equity securities may be adversely affected by financial market, industry, or issuer-specific events. Focus on a particular style or on small or medium-sized companies may enhance that risk. **Foreign & Emerging Markets:** Investing in foreign securities, especially in emerging markets, subjects the portfolio to additional risks such as increased volatility, currency fluctuations, less liquidity, and political, regulatory, economic, and market risk. **Market Volatility:** The value of the securities in the portfolio may go up or down in response to the prospects of individual companies and/or general economic conditions. Price changes may be short- or long-term. Local, regional or global events such as war, acts of terrorism, the spread of infectious illness or other public health issue, recessions, or other events could have a significant impact on the portfolio and its investments, including hampering the ability of the portfolio's manager(s) to invest the portfolio's assets as intended. **Prospectus:** For additional information on risks, please see the fund's prospectus.

### GLOSSARY

**Avg. Weighted Market Cap (bn):** The total dollar market value of all of a company's outstanding shares. **Trailing P/E Ex-Negative Earnings:** Per share stock price divided by the latest 12-months earnings per share. **Price-to-Cash Flow:** Per-share stock price divided by the per-share operating cash flow. **Price-to-Book Value:** A ratio used to compare a stock's market value to its book value. **3-Year EPS Growth Rate:** Average of earnings per share growth for latest 3-year period. **5-Year EPS Growth Rate:** Average of earnings per share growth for latest 5-year period. **Active Share:** A measure of the percentage of stock holdings in a manager's portfolio that differ from the benchmark index. **Alpha:** A risk-adjusted measure of an investment's excess return relative to a benchmark. **Beta:** A quantitative measure of the volatility, or systematic risk, of a security or a portfolio in comparison to the market as a whole. **R<sup>2</sup>:** A measure that represents the percentage of a fund or security's movements that can be explained by movements in a benchmark index. **Sharpe Ratio:** A risk-adjusted measure calculated using standard deviation and excess return to determine reward per unit of risk. **Standard Deviation:** Measures variability of returns around the average return for an investment portfolio. Higher standard deviation suggests greater risk.

### INDEX DEFINITION

Index: The MSCI AC World Index (net) is a free float-adjusted market capitalization-weighted index that measures equity performance of developed and emerging markets. The index is calculated on a total return basis with net dividends reinvested. The index is unmanaged, its returns do not reflect any fees, expenses, or sales charges, and is not available for direct investment.

Morningstar Rating™ for funds, or 'star rating,' is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Ratings do not take into account the effect of sales charges and loads.
