

INVESTMENT OVERVIEW

The Fund seeks current income from a diversified portfolio of primarily short duration corporate bonds, asset-backed securities, mortgage-backed securities, U.S. Treasuries, and U.S. government agency debentures. Seix's bottom-up focused, top-down aware investment approach seeks to provide superior risk-adjusted returns over a full market cycle, as well as competitive absolute and relative returns over shorter horizons.

KEY FEATURES

Lower Duration Risk — Typically maintains an average effective duration between three months and one year

Broad Fixed Income Exposure — Emphasizes income, quality, diversification, and liquidity in order to serve as an anchor of a diversified portfolio

Extensive Fundamental Research — Combines macroeconomic and fundamental analysis to identify securities with the strongest risk/reward profiles

AVERAGE ANNUAL TOTAL RETURNS (%) as of 09/30/18

Performance data quoted represents past results. Past performance is no guarantee of future results and current performance may be higher or lower than the performance shown. Investment return and principal value will fluctuate, so your shares, when redeemed, may be worth more or less than their original cost. Please visit Virtus.com for performance data current to the most recent month-end.

The fund class gross expense ratio is 0.87%. The net expense ratio is 0.66%, which reflects a contractual expense reimbursement in effect through 07/31/2019. This ratio reflects the direct and indirect expenses paid by the Fund. The net expense ratio minus the indirect expenses incurred by the underlying funds in which the Fund invests is 0.65%.

Average annual total return is the annual compound return for the indicated period and reflects the change in share price and the reinvestment of all dividends and capital gains. Returns for periods of one year or less are cumulative returns. Class A shares have no sales charges or distribution or service fees, therefore their returns do not reflect these expenses. Fees and expenses vary, and other share classes are subject to sales charges and fees. For fund performance on other share classes, please visit www.virtus.com.

GROWTH OF \$10,000

This chart assumes an initial investment of \$10,000 made on 7/24/2018. As of 9/28/2018 the fund value would have been \$10,040.22. Fund performance assumes reinvestment of dividends and capital gain distributions. This growth reflects no front end sales charges.

RATINGS DISTRIBUTION

CHARACTERISTICS

	Fund
Effective Duration	0.30
Weighted Average Maturity	3.24
SEC Yield ¹	2.17

¹ SEC Yield (Class A share only) represents net investment income earned by a fund over a 30-day period, expressed as an annual percentage rate based on the fund's share price at the end of the 30-day period. Performance figures represent a partial waiver/reimbursement of fees where applicable. Without the partial waiver/reimbursement of fees, performance figures would be lower and the SEC Yield would have been: 1.95%.

IMPORTANT RISK CONSIDERATIONS

Credit & Interest: Debt securities are subject to various risks, the most prominent of which are credit and interest rate risk. The issuer of a debt security may fail to make interest and/or principal payments. Values of debt securities may rise or fall in response to changes in interest rates, and this risk may be enhanced with longer-term maturities. **ABS/MBS:** Changes in interest rates can cause both extension and prepayment risks for asset- and mortgage-backed securities. These securities are also subject to risks associated with the repayment of underlying collateral. **Foreign & Emerging Markets:** Investing internationally, especially in emerging markets, involves additional risks such as currency, political, accounting, economic, and market risk. **Prospectus:** For additional information on risks, please see the fund's prospectus.

GLOSSARY

Effective Duration: The change in the value of a fixed income security that will result from a 1% change in interest rates while taking into account the way changes in rates will affect the expected cash flows of any bond with an embedded option such as call or prepayment option. This measure assigns a probability to the exercise of a call option, where applicable, based on specified shifts in the yield curve. Duration is expressed as a number of years, and generally, the larger the duration, the greater the interest rate risk or reward for a portfolio's underlying bond prices. **Weighted Average Maturity:** The length of time until the average security in a fund will mature, be redeemed by its issuer, or paid down over time, which is the case with most securitized assets.

INDEX DEFINITION

Index: The Bloomberg Barclays U.S. Treasury Bill 3-6 Month Index measures performance of U.S. Treasury bills with a remaining maturity from one up to (but not including) 12 months. The index excludes zero coupon strips. The index is calculated on a total return basis. The index is unmanaged, its returns do not reflect any fees, expenses, or sales charges, and is not available for direct investment.

RATINGS DISTRIBUTION METHODOLOGY

The ratings issued by Nationally Recognized Statistical Rating Organizations assess the credit worthiness of a corporation's or government's debt issues. The ratings apply to the fund's holdings and not the fund itself. Standard & Poor's, Moody's, and Fitch ratings are used. If all three agencies have rated the security, then the median rating based on numerical equivalents is used. If only two agencies have rated the security, then the lower of the two ratings is used. If only one agency has rated the security, the rating from that agency is used. Credit ratings are subject to change. AAA, AA, A, and BBB are investment grade ratings; BB, B, CCC, CC, C, and D are below-investment grade ratings.
