

VIRTUS VONTOBEL GLOBAL OPPORTUNITIES FUNDS

March 31, 2019

IMPORTANT RISK CONSIDERATIONS

Equity Securities

The market price of equity securities may be adversely affected by financial market, industry, or issuer-specific events. Focus on a particular style or on small or medium-sized companies may enhance that risk.

Foreign & Emerging Markets

Investing internationally, especially in emerging markets, involves additional risks such as currency, political, accounting, economic, and market risk.

Geographic Concentration

A fund that focuses its investments in a particular geographic location will be highly sensitive to financial, economic, political, and other developments affecting the fiscal stability of that location.

Industry/Sector Concentration

A fund that focuses its investments in a particular industry or sector will be more sensitive to conditions that affect that industry or sector than a non-concentrated fund.

Prospectus

For additional information on risks, please see the fund's prospectus.

VIRTUS INVESTMENT PARTNERS

Virtus (NASDAQ: VRTS) is a distinctive partnership of boutique investment managers, singularly committed to the long-term success of individual and institutional investors.

Key Facts:

- AUM of \$101.7 billion managed in a multi-boutique structure
- 9 affiliates

Disciplined, institutional-quality money management through wholly owned subsidiaries and select subadvisers, each with a distinct investment philosophy and style.

- We are not constrained by a single investment approach; rather, we provide access to independent, specialized investment philosophies through our multi-discipline, multi-strategy approach.
- We have the flexibility, agility, and responsiveness of a boutique asset management firm with similar product breadth and investment talent of our larger peers.
- We are committed to thoughtfully providing investment solutions, adhering to the highest standards of product quality, operational excellence, and fiduciary responsibility.

INVESTMENT OFFERINGS

We have offerings in various asset classes, across all market capitalizations, in different styles, and with diverse investment approaches.

Investment products include:

- Open-end mutual funds
- Variable insurance funds
- Closed-end funds
- Retail separate accounts
- Institutional accounts
- Exchange-traded funds
- UCITS
- Structured products
- Collective investment trusts

WHAT WE BELIEVE

Interests must be aligned.

We provide clarity. The client provides choice.

INVESTMENT PROCESS OVERVIEW

SCREEN AND IDEA GENERATION	ANALYZE PAST RESULTS	ANALYZE FUTURE OPPORTUNITIES	PRICE	PORTFOLIO CONSTRUCTION
<p>Pass high hurdle rates</p> <ul style="list-style-type: none"> ■ Profits > \$50 million ■ Low to moderate leverage (high interest rate coverage) ■ High return on equity (ROE) return on assets (ROA) ■ Free cash flow ■ Stable earnings and operating margins 	<p>Understand the business and quality of earnings</p> <ul style="list-style-type: none"> ■ Defensible franchise ■ Consistent and durable business ■ Pricing power ■ Low-to-moderate need for capital ■ Coherent business strategy ■ Transparent accounting 	<p>Replicate and exceed past success</p> <ul style="list-style-type: none"> ■ Ability to sustain growth ■ Ability to maintain high ROA with low-to-moderate leverage ■ Ability to earn high ROE on a growing equity base 	<p>Sensible price</p> <ul style="list-style-type: none"> ■ Develop and maintain five-year profit forecasts for each actual and prospective investment that we monitor ■ Seek to buy and hold shares selling below our appraisal of the intrinsic value 	<p>Benchmark unconstrained</p> <ul style="list-style-type: none"> ■ Avoid the artificial and backward-looking constraints of the index weightings ■ Common sense risk diversification/dependability of income stream ■ Initial position size depends on degree of conviction and price
<p>Screen for a history of profitability and stability</p>	<p>Identify businesses which have demonstrated predictable, sustainable growth at a sensible price</p>			<p>Build a high conviction portfolio</p>

SELL DISCIPLINE

- Better alternative identified
- Price target met
- Deterioration in fundamentals
- Major merger/acquisition-related activity
- Portfolio considerations

RISK MANAGEMENT AND PORTFOLIO CONSTRUCTION

We believe the **main sources of risk** are stock specific, i.e.

- Did we get the company fundamentals right?
- Did we overpay?
- Could the earnings implode?

Cash	▪ Fully invested
Position Size	▪ Maximum position size: 7%
Sector	▪ At least 5 sectors at all times
Country	▪ 20% absolute overweight relative to benchmark
Volatility	▪ No tracking error restrictions

CHANGING DEMOGRAPHICS CREATE GLOBAL OPPORTUNITIES

“Globally, demand from the middle class may grow from USD 21 trillion to USD 56 trillion by 2030... over 80% of the growth in demand comes from Asia.”

**Shares of Global Middle Class Consumption
2000-2050**

PERFORMANCE REVIEW

	QTD	YTD	1 Year	3 Year	5 Year	10 Year	Since Inception*
WVOIX	10.28	10.28	5.87	12.04	9.29	n/a	11.00
MSCI AC World Index (Net)	12.18	12.18	2.60	10.67	6.45	n/a	9.27

*Inception: 8/8/12.

Performance data quoted represents past results. Past performance is no guarantee of future results and current performance may be higher or lower than the performance shown. Investment return and principal value will fluctuate so your shares, when redeemed, may be worth more or less than their original cost. Please visit virtus.com for performance data current to the most recent month-end.

The fund class gross expense ratio is 1.16%. The net expense ratio is 1.09%, which reflects a contractual expense reimbursement in effect through 3/31/2021.

Average annual total return is the annual compound return for the indicated period and reflects the change in share price and the reinvestment of all dividends and capital gains. Returns for periods of one year or less are cumulative returns. Class I shares have no sales charges or distribution or service fees, therefore their returns do not reflect these expenses. Fees and expenses vary, and other share classes are subject to sales charges and fees. Class I shares are offered primarily to eligible institutional investors who purchase the minimum amounts required as described in the prospectus and may not be available to all investors. For fund performance on other share classes, please visit www.virtus.com.

The MSCI AC World Index (Net) is a free float-adjusted market capitalization-weighted index that measures equity performance of developed and emerging markets. The index is calculated on a total return basis with net dividends reinvested. The index is unmanaged, its returns do not reflect any fees, expenses, or sales charges, and is not available for direct investment.

MORNINGSTAR RATINGS™

	Overall	3 Year	5 Year	10 Year
	★★★★★	★★★★★	★★★★★	n/a
World Stock Category	732 Funds	732 Funds	617 Funds	n/a

The Overall Morningstar Rating is based on risk-adjusted returns, derived from a weighted average of the three-, five-, and 10-year (if applicable) Morningstar metrics.

As of 3/31/19.

Please see page 23 for additional Morningstar disclosure.

DEFINITIONS

Alpha – A measure of performance on a risk-adjusted basis.

Beta – A quantitative measure of the volatility of a given portfolio relative to the overall market. Higher beta suggests higher volatility. Beta can also refer to relative volatility to a portfolio's stated benchmark.

EPS (Earnings Per Share) – The portion of a company's profit allocated to each outstanding share of common stock. Earnings per share serves as an indicator of a company's profitability.

Net Margin – The ratio of net profits to revenues for a company or business segment that shows how much of each dollar earned by the company is translated into profits.

OPM (Operating Profit Margin) – A measurement of what proportion of a company's revenue is left over after paying for variable costs of production such as wages, raw materials, etc. A healthy operating margin is required for a company to be able to pay for its fixed costs, such as interest on debt.

ROA (Return on Assets) – An indicator of how profitable a company is relative to its total assets. ROA gives an idea as to how efficient management is at using its assets to generate earnings.

ROE (Return on Equity) – The amount of net income returned as a percentage of shareholders equity. Return on equity measures a corporation's profitability by revealing how much profit a company generates with the money shareholders have invested.

ROIC (Return on Invested Capital) – A calculation used to assess a company's efficiency at allocating the capital under its control to profitable investments. The return on invested capital measure gives a sense of how well a company is using its money to generate returns.

Sharpe Ratio – A statistic that measures the efficiency, or excess return per unit of risk, of a manager's returns. It is calculated by taking the portfolio's annualized return, minus the annualized risk-free rate (typically the 30-Day T-Bill return), divided by the portfolio's annualized standard deviation. The greater the Sharpe Ratio, the better the portfolio's risk adjusted return.

Standard Deviation – Measures variability of returns around the average return for an investment portfolio. Higher standard deviation suggests greater risk.

Tracking Error – A divergence between the price behavior of a position or a portfolio and the price behavior of a benchmark.

Up/Down Capture Ratio – A measure of how well a manager was able to replicate or improve on phases of positive benchmark returns and how badly the manager was impacted by phases of negative benchmark returns.

The Morningstar Rating™ for funds, or “star rating”, is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product’s monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Ratings do not take into account the effects of sales charges and loads.
