

### INVESTMENT OPPORTUNITY

The Fund strives to deliver an alternative source of yield to traditional fixed income by focusing on the private credit market. The Fund seeks to track the Indxx Private Credit Index, which provides passive exposure to listed instruments that emphasize private credit, including business development companies (BDCs) and closed-end funds (CEFs).

### KEY FEATURES

**Targeted Exposure** — Provides passive exposure to the private credit market of a growing financing market for small- and mid-sized businesses in the United States

**Powerful Diversifier** — An attractive and complementary income opportunity

**High Yield Potential** — Quarterly distributions via a portfolio of exchange-traded BDCs and CEFs with significant exposure to private credit instruments such as collateralized loan obligations (CLOs), mezzanine loans, and bank loans

### INVESTMENT PROCESS

- 1 Universe consists of U.S.-listed BDCs and CEFs that have paid consistent dividends over the last three years and meet minimum market capitalization (\$100M) and liquidity requirements; excludes CEFs trading at significant premiums/discounts to NAV
- 2 Holdings are weighted based on three-year dividend yield
- 3 Portfolio is rebalanced quarterly and reconstituted annually

### AVERAGE ANNUAL TOTAL RETURNS (%) as of 03/31/2024

	QTD	YTD	1 Year	3 Year	5 Year	10 Year	Since Inception
NAV	4.25	4.25	21.94	8.83	7.95	n/a	8.05
Market Price	4.60	4.60	22.54	8.85	8.04	n/a	8.17
Index	4.44	4.44	23.18	9.36	8.81	n/a	8.90

Returns for periods of less than one year are cumulative total returns.

**Performance data quoted represents past performance. Past performance does not guarantee future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please visit [virtus.com](http://virtus.com) for performance data current to the most recent month end.**

The Total Expense Ratio represents the Fund's Total Annual Fund Operating Expenses, which includes the management fee and other expenses where applicable, except for certain payments that are paid directly by the Fund, as described in the Prospectus. The Expense Ratio minus the indirect expenses incurred by the underlying funds in which the Fund invests (acquired fund fees) is 0.75%. Expenses paid by the Fund include 8.97% in Acquired Fund Fees and Expenses (AFFE), indirect expenses which VPC is required to itemize in its fee table because it primarily holds BDCs and CEFs—themselves funds with management fees. AFFE are implicitly reflected in the prices of the BDCs and CEFs in the portfolio and are not paid directly from the Fund's net assets.

Index: The Indxx Private Credit Index is an index of listed business development companies ('BDCs') and closed end funds ('CEFs') with a private credit focus. The Index is designed to serve as a broad-based benchmark for long-only investments in private credit. The index is unmanaged, its returns do not reflect any fees, expenses, or sales charges, and is not available for direct investment.

## IMPORTANT RISK CONSIDERATIONS

**Exchange-Traded Funds (ETF):** The value of an ETF may be more volatile than the underlying portfolio of securities it is designed to track. The costs to the portfolio of owning shares of an ETF may exceed the cost of investing directly in the underlying securities. **Private Credit Funds:** Private credit funds that invest in closed-end funds and business development companies bear the risks of these underlying assets, including liquidity, industry, currency, valuation and credit risks. **Equity Securities:** The market price of equity securities may be adversely affected by financial market, industry, or issuer-specific events. Focus on a particular style or on small, medium, or large-sized companies may enhance that risk. **Credit & Interest:** Debt instruments are subject to various risks, including credit and interest rate risk. The issuer of a debt security may fail to make interest and/or principal payments. Values of debt instruments may rise or fall in response to changes in interest rates, and this risk may be enhanced with longer-term maturities. **High Yield Fixed Income Securities:** There is a greater risk of issuer default, less liquidity, and increased price volatility related to high yield securities than investment grade securities. **Fund of Funds:** The risk that the fund's performance will be adversely affected by the assets owned by the other mutual funds and ETFs in which it invests, and that the layering of expenses associated with the fund's investment in such other funds will cost shareholders more than direct investments would have cost. **Passive Strategy/Index Risk:** A passive investment strategy seeking to track the performance of the underlying Index may result in the portfolio holding securities regardless of market conditions or their current or projected performance. This could cause the portfolio's returns to be lower than if the portfolio employed an active strategy. **Correlation to Index:** The performance of the portfolio and its index may vary due to factors such as flows, transaction costs, whether the portfolio obtains every security in the index, and timing differences associated with additions to and deletions from the index. **Market Price/NAV:** At the time of purchase and/or sale, an investor's shares may have a market price that is above or below the fund's NAV, which may increase the investor's risk of loss. **Closed-End Funds:** Closed-end funds may trade at a discount or premium from their net asset values, which may affect whether an investor will realize gains or losses. They may also employ leverage, which may increase volatility. **Market Volatility:** The value of the securities

in the portfolio may go up or down in response to the prospects of individual companies and/or general economic conditions. Local, regional, or global events such as war or military conflict, terrorism, pandemic, or recession could impact the portfolio, including hampering the ability of the portfolio's manager(s) to invest its assets as intended. **Prospectus:** For additional information on risks, please see the fund's prospectus.

## GLOSSARY

**30-day SEC Yield** is a standardized yield calculated according to a formula set by the SEC, and is subject to change. **Business development companies (BDCs):** Closed-end investment companies that often invest in debt issued by small and mid-sized businesses in the United States. BDCs are generally managed by third party investment specialist firms which charge a management fee and, in some cases, an incentive fee for profitable investment performance by the BDC.

IOPV, or Indicative Optimized Portfolio Value, is a calculation disseminated by the stock exchange that approximates the Fund's NAV every fifteen seconds throughout the trading day. The Fund is an exchange-traded fund ("ETF"). The "net asset value" (NAV) of the Fund is determined at the close of each business day, and represents the dollar value of one share of the Fund; it is calculated by taking the total assets of the Fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV of the Fund is not necessarily the same as its intraday trading value. Fund investors should not expect to buy or sell shares at NAV because shares of ETFs such as the Fund are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Thus, shares may trade at a premium or discount to their NAV in the secondary market. Brokerage commissions will reduce returns. NAV returns are calculated using the Fund's daily 4:00 pm NAV, and include the reinvestment of all dividends and other distributions (reinvested at the Fund's NAV on distribution ex-date). Market price returns are calculated using the 4:00 pm midpoint between the bid and offer, and include the reinvestment of all dividends and other distributions (reinvested at the 4:00 pm bid/offer midpoint on distribution ex-date). Market price returns do not represent the return you would receive if you traded at other times.

Please consider a Fund's investment objectives, risks, charges, and expenses carefully before investing.
