

INVESTMENT OVERVIEW

The Fund offers investors exposure to international markets through companies that demonstrate strong, predictable, and sustainable growth potential. First-hand, team-based research aims to identify and invest in growth businesses with strong pricing power, repeatable revenues, long runways of growth, and financial and management strength.

KEY FEATURES

Sustainable Growth — Searches for companies that offer strong, predictable, and sustainable growth

Benchmark Unconstrained — A high-conviction, concentrated portfolio that invests in response to opportunities, rather than index relative weights

Valuation Discipline — Manages price risk through an application of valuation tools focused on cash flow

AVERAGE ANNUAL TOTAL RETURNS (%) as of 12/31/19

Performance data quoted represents past performance. Past performance does not guarantee future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please visit virtus.com for performance data current to the most recent month end. Class A shares have a maximum sales charge of 5.75%. A contingent deferred sales charge of 1% may be imposed on certain redemptions within 18 months on purchases on which a finder's fee has been paid (Shareholders of the predecessor Fund will pay 0.50% on redemptions through October 31, 2020).

The fund class gross expense ratio is 1.46%. The net expense ratio is 1.39%, which reflects a contractual expense reimbursement in effect through 5/31/2021. This ratio reflects the direct and indirect expenses paid by the Fund. The net expense ratio minus the indirect expenses incurred by the underlying funds in which the Fund invests is 1.38%. Average annual total return is the annual compound return for the indicated period and reflects the change in share price and the reinvestment of all dividends and capital gains. Returns for periods of one year or less are cumulative returns.

ANNUAL PERFORMANCE (%)

	2019	2018	2017	2016	2015	2014	2013	2012	2011	2010
Fund	32.16	-3.08	32.65	4.07	7.72	0.98	n/a	n/a	n/a	n/a
Index	26.60	-9.41	23.97	7.86	-2.36	4.16	n/a	n/a	n/a	n/a

GROWTH OF \$10,000

This chart assumes an initial investment of \$10,000 made on 10/4/2013. As of 12/31/2019 the fund value would have been \$19,213.75. Fund performance assumes reinvestment of dividends and capital gain distributions and reflects a front end sales charge of 5.75%.

IMPORTANT RISK CONSIDERATIONS

Equity Securities: The market price of equity securities may be adversely affected by financial market, industry, or issuer-specific events. Focus on a particular style or on small or medium-sized companies may enhance that risk. **Foreign & Emerging Markets:** Investing internationally, especially in emerging markets, involves additional risks such as currency, political, accounting, economic, and market risk. **Geographic Concentration:** A fund that focuses its investments in a particular geographic location will be highly sensitive to financial, economic, political, and other developments affecting the fiscal stability of that location. **Prospectus:** For additional information on risks, please see the fund's prospectus.

GLOSSARY

Avg. Weighted Market Cap (bn): The total dollar market value of all of a company's outstanding shares. **Trailing P/E Ex-Negative Earnings:** Per share stock price divided by the latest 12-months earnings per share. **Price-to-Cash Flow:** Per-share stock price divided by the per-share operating cash flow. **Price-to-Book Value:** A ratio used to compare a stock's market value to its book value. **3-Year EPS Growth Rate:** Average of earnings per share growth for latest 3-year period. **5-Year EPS Growth Rate:** Average of earnings per share growth for latest 5-year period. **Active Share:** A measure of the percentage of stock holdings in a manager's portfolio that differ from the benchmark index. **Alpha:** A risk-adjusted measure of an investment's excess return relative to a benchmark. **Beta:** A quantitative measure of the volatility, or systematic risk, of a security or a portfolio in comparison to the market as a whole. **R²:** A measure that represents the percentage of a fund or security's movements that can be explained by movements in a benchmark index. **Sharpe Ratio:** A risk-adjusted measure calculated using standard deviation and excess return to determine reward per unit of risk. **Standard Deviation:** Measures variability of returns around the average return for an investment portfolio. Higher standard deviation suggests greater risk.

INDEX DEFINITION

Index: The MSCI AC World Index (net) is a free float-adjusted market capitalization-weighted index that measures equity performance of developed and emerging markets. The index is calculated on a total return basis with net dividends reinvested. The index is unmanaged, its returns do not reflect any fees, expenses, or sales charges, and is not available for direct investment.

Morningstar Rating™ for funds, or 'star rating,' is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Ratings do not take into account the effect of sales charges and loads.
