

VIRTUS ZEVENBERGEN FUNDS

Virtus Zevenbergen Innovative Growth Stock Fund
Virtus Zevenbergen Technology Fund

March 31, 2024

IMPORTANT RISK CONSIDERATIONS

Equity Securities	The market price of equity securities may be adversely affected by financial market, industry, or issuer-specific events. Focus on a particular style or on small or medium-sized companies may enhance that risk.
Foreign Investing	Investing in foreign securities subjects the portfolio to additional risks such as increased volatility; currency fluctuations; less liquidity; less publicly available information about the foreign investment; and political, regulatory, economic, and market risk.
Issuer Risk	The portfolio will be affected by factors specific to the issuers of securities and other instruments in which the portfolio invests, including actual or perceived changes in the financial condition or business prospects of such issuers.
Consumer Concentration	Because the portfolio is presently heavily weighted in the consumer sector, it will be impacted by that sector's performance more than a portfolio with broader sector diversification.
Limited Number of Investments	Because the portfolio has a limited number of securities, it may be more susceptible to factors adversely affecting its securities than a portfolio with a greater number of securities.
Technology Concentration	Because the portfolio is presently heavily weighted in the technology sector, it will be impacted by that sector's performance more than a portfolio with broader sector diversification.
Sector Focused Investing	Events negatively affecting a particular industry or market sector in which the portfolio focuses its investments may cause the value of the portfolio to decrease.
Focused Investments	To the extent the portfolio focuses its investments on a limited number of issuers, sectors, industries or geographic regions, it may be subject to increased risk and volatility.
Market Volatility	The value of the securities in the portfolio may go up or down in response to the prospects of individual companies and/or general economic conditions. Local, regional, or global events such as war or military conflict, terrorism, pandemic, or recession could impact the portfolio, including hampering the ability of the portfolio's manager(s) to invest its assets as intended.
Prospectus	For additional information on risks, please see the fund's prospectus.

INVESTMENT PHILOSOPHY: FUNDAMENTALS DRIVE LONG-TERM STOCK RETURNS

Revenue, earnings, and cash flow growth are the ultimate determinants of shareholder outcomes. Management quality and financial flexibility strengthen business models.

Conservative expectations provide excess return opportunities.

The views expressed are those of ZCI. **These views are subject to change at any time and should not be interpreted as a guarantee of future performance of securities, the markets, or any funds managed by ZCI.** This information is not meant to provide investment advice and should not be considered a recommendation to purchase or sell securities. Investing in the stock market involves risks, including the potential loss of principal. Growth stocks may be more volatile than other stocks as their prices tend to be higher in relation to their companies' earnings and may be more sensitive to market, political, and economic developments. Active trading may increase transaction costs, brokerage commissions, and taxes, which can lower the return on investment.

INVESTING IN ATTRACTIVE GROWTH OPPORTUNITIES ACROSS BUSINESS CYCLE STAGES

Zevenbergen Capital Investments (ZCI) invests in businesses with growing or improving fundamental trends, regardless of company maturity or size. This bottom-up approach typically results in minimal exposure to deteriorating or contracting business models.

This information is not meant to provide investment advice and should not be considered a recommendation to purchase or sell securities. Investing in the stock market involves risks, including the potential loss of principal. Growth stocks may be more volatile than other stocks as their prices tend to be higher in relation to their companies' earnings and may be more sensitive to market, political, and economic developments. **Past performance is no guarantee of future results.**

Analyst Driven Culture Aligned with Client Success: One Team, One Dream

- Revenue growth as our North Star
- Use internal and external resources to find misunderstood or underappreciated opportunities
- Evaluate financial and non-financial growth drivers and risk factors, and frame upside and downside scenarios

Innovative Growth		Technology Sector
Focus	Identify and invest in companies with high sustainable growth potential across capitalization ranges	Identify and invest in technology-driven industries and businesses across capitalization ranges
Idea Generation	3,000 stock universe	500 stock universe
	Benchmark: Russell 3000® Growth Index	Benchmark: S&P North American Technology Index
Active Share	High	Moderate
Holdings	30-50 Concentrated exposure to emerging and high growth companies	40-70 Diversified with significant exposure to established growth companies
Sell Discipline	<ul style="list-style-type: none"> ■ Conviction-based portfolio management; low turnover among largest holdings ■ Sell when company fundamentals deteriorate or when more compelling ideas present themselves 	

Source: Zevenbergen Capital Investments

There is no assurance this investment process will consistently lead to successful investing. **This process should not be interpreted as a guarantee of the future performance of securities, the markets, or any funds managed by ZCI.** This information is not meant to provide investment advice and should not be considered a recommendation to purchase or sell securities. Investing in the stock market involves risks, including the potential loss of principal. Growth stocks may be more volatile than other stocks as their prices tend to be higher in relation to their companies' earnings and may be more sensitive to market, political, and economic developments. Active Share is defined on page 25. Active trading may increase transaction costs, brokerage commissions, and taxes, which can lower the return on investment. The Russell 3000® Growth Index is defined on page 15. The S&P North American Technology Sector Index is defined on page 24.

Share price volatility, while often used to approximate risk, is an unavoidable and natural byproduct of investing in industries undergoing significant change. Zevenbergen Capital Investments weighs the potential for investment losses against prospective returns by asking two questions:

What is the likelihood of permanent capital loss?

ZCI works to mitigate through

- Fundamental analysis
- Portfolio construction
- Long-term orientation

What is the risk of missed wealth creation opportunity?

ZCI works to mitigate through

- Focus on business performance, not on short-term price stock swings
- Evaluation of investment upside potential on five-year timeframe
- Willingness to invest across corporate life cycle stages and capitalization ranges

The views expressed are those of ZCI. **These views are subject to change at any time and should not be interpreted as a guarantee of future performance of securities, the markets, or any funds managed by ZCI.** This information is not meant to provide investment advice and should not be considered a recommendation to purchase or sell securities. Investing in the stock market involves risks, including the potential loss of principal. Growth stocks may be more volatile than other stocks as their prices tend to be higher in relation to their companies' earnings and may be more sensitive to market, political, and economic developments. **Past performance is no guarantee of future results.**

VIRTUS ZEVENBERGEN INNOVATIVE GROWTH STOCK FUND

A Shares: SAGAX

I Shares: SCATX

R6 Shares: VZGRX

INVESTMENT OVERVIEW AND KEY FEATURES

VIRTUS ZEVENBERGEN INNOVATIVE GROWTH STOCK FUND

Objective

The Fund seeks long-term capital appreciation by investing in a concentrated portfolio of companies across capitalizations and in different phases of their life cycle, which exhibit strong growth expectations. A strongly independent approach to research and disciplined active management aims to preserve objectivity from Wall Street biases and to help capture meaningful potential return advantages.

Features

1

High-Growth Focus

Searches for well-run, high-growth companies prompting disruptive business landscape changes, often through technological advances

2

Rigorous Fundamental Research

Bottom-up analysis strives to identify stocks poised to benefit from price catalysts from positive revenue, cash flow, and earnings growth

3

High-Conviction Portfolio

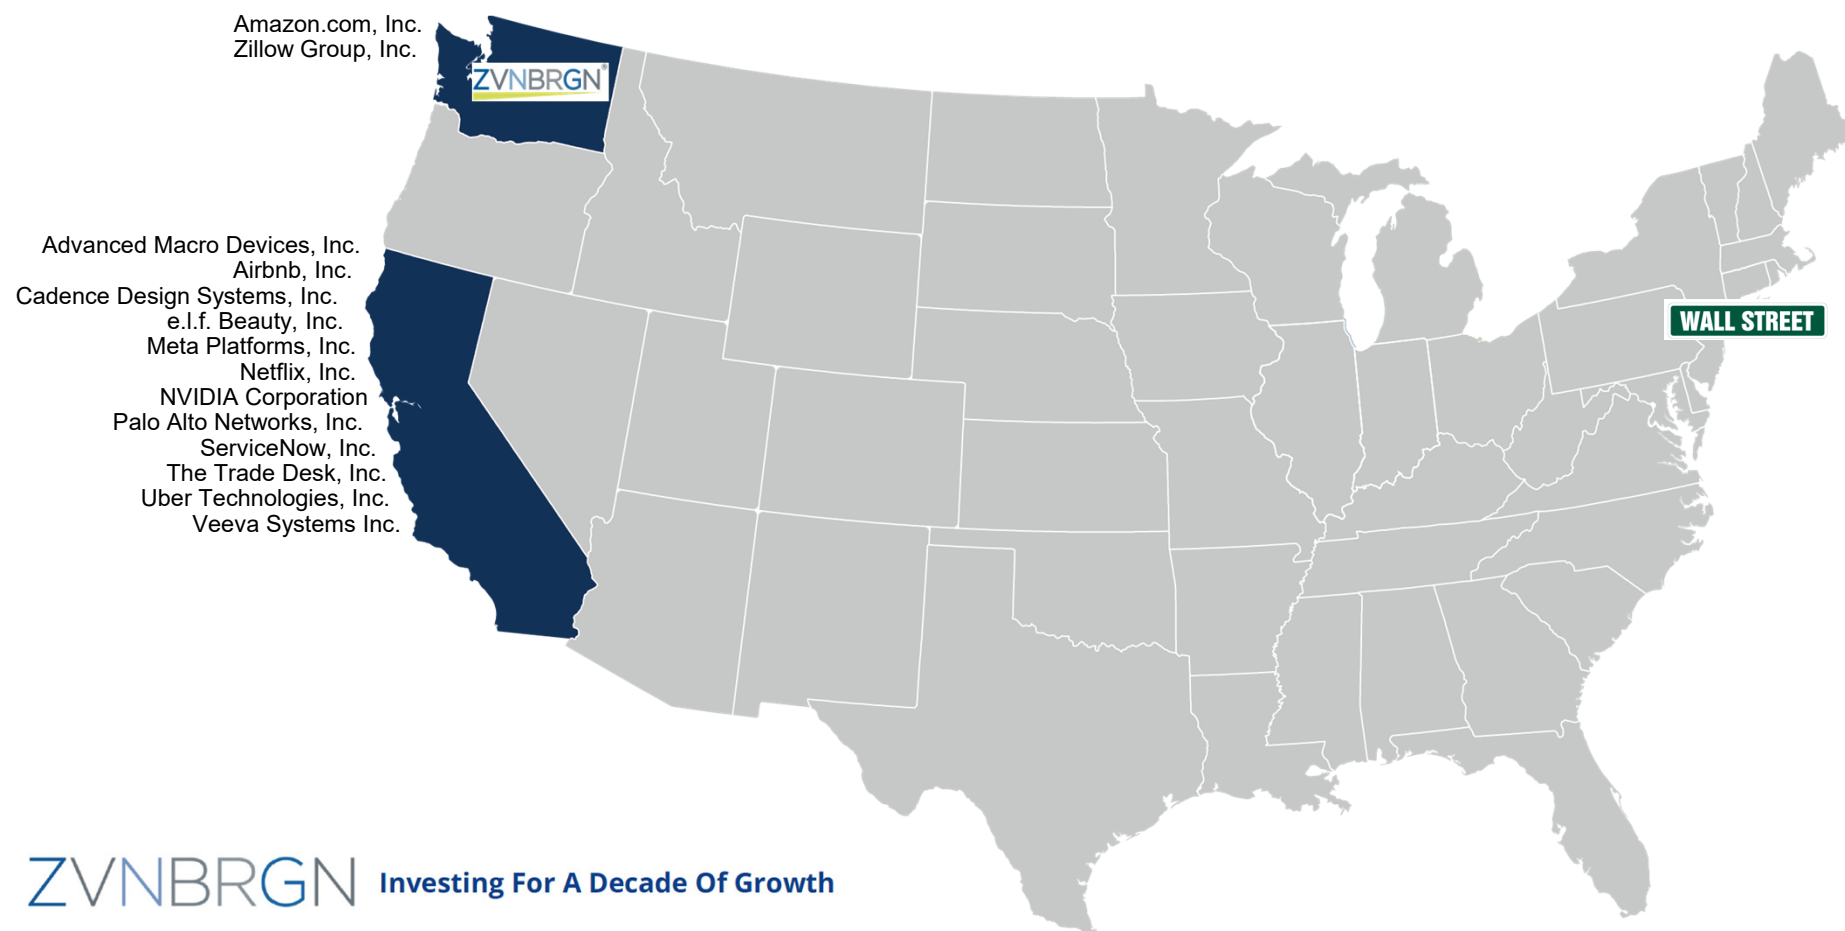

Focused on the portfolio team's strongest investment opportunities, with a long-term, low-turnover approach to realize full stock value potential

“WEST COAST IS THE GROWTH COAST”

WEST COAST – ENTREPRENEURIAL/START-UP HUB

- The Pacific Northwest has historically been home to early adopters and a testing ground for new concepts
- Silicon Valley to the south is notable for the number of innovative and disruptive technology companies started and headquartered there

PERFORMANCE REVIEW

AS OF MARCH 31, 2024 (%)

■ Virtus Zevenbergen Innovative Growth Stock Fund (SCATX)
■ Russell 3000® Growth Index

Performance data quoted represents past performance. Past performance does not guarantee future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please visit virtus.com for performance data current to the most recent month end. This share class has no sales charges and is not available to all investors. Other share classes have sales charges. See virtus.com for details.

The fund class gross expense ratio is 1.10%. The net expense ratio is 1.00%, which reflects a contractual expense reimbursement in effect through 4/30/2025.

Average annual total return is the annual compound return for the indicated period and reflects the change in share price and the reinvestment of all dividends and capital gains. Returns for periods of one year or less are cumulative returns.

The Russell 3000® Growth Index is a market capitalization-weighted index of growth-oriented stocks of U.S. companies. The index is calculated on a total return basis with dividends reinvested. The index is unmanaged, its return do not reflect any fees, expenses, or sales charges, and is not available for direct investment.

MORNINGSTAR RATINGS™

I Share	Large Growth	
Time Period	# of Stars	# of Funds
Overall	★	1,111
3 Year	★	1,111
5 Year	★	1,037
10 Year	★	807

Morningstar ratings are based on risk-adjusted returns. Strong ratings are not indicative of positive fund performance.

The Morningstar Rating™ for funds, or “star rating”, is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product’s monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Ratings do not take into account the effects of sales charges and loads.

A HISTORY OF BOUNCING BACK FROM LOW MORNINGSTAR RATINGS

- Since inception (2/23/04), Virtus Zevenbergen Innovative Growth Stock Fund has recovered from occasional 1- and 2-star Morningstar Ratings by going on to achieve top decile performance over the next 12, 24, and 36 months.
- In all four low-rating periods, high-growth technology stocks were out of favor, and the Fund underperformed.

Low Morningstar Rating Time Period	12 Months Later		24 Months Later		36 Months Later

Performance data quoted represents past performance. Past performance does not guarantee future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please visit virtus.com for performance data current to the most recent month end. This share class has no sales charges and is not available to all investors. Other share classes have sales charges. See virtus.com for details.

The fund class gross expense ratio is 1.17%.

Average annual total return is the annual compound return for the indicated period and reflects the change in share price and the reinvestment of all dividends and capital gains. Returns for periods of one year or less are cumulative returns.

Index 1: The S&P North American Technology Sector Index is a modified capitalization-weighted index of selected technology and internet-related stocks. The index is calculated on a total return basis. The index is unmanaged, its returns do not reflect any fees, expenses, or sales charges, and is not available for direct investment.

Index 2: The Nasdaq Composite Index is a market capitalization-weighted index of all common stocks listed on the Nasdaq Stock Market. The index is calculated on a total return basis. The index is unmanaged, its returns do not reflect any fees, expenses, or sales charges, and is not available for direct investment.

MORNINGSTAR RATINGS™

I Share	Technology	
Time Period	# of Stars	# of Funds
Overall	★★★	232
3 Year	★★★	232
5 Year	★★★	204
10 Year	★★★	158

Morningstar ratings are based on risk-adjusted returns. Strong ratings are not indicative of positive fund performance.

The Morningstar Rating™ for funds, or “star rating”, is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product’s monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Ratings do not take into account the effects of sales charges and loads.

Avg. Weighted Market Cap (bn): The sum of each security's weight within the fund (or index) multiplied by the security's market capitalization.

Trailing P/E Ex-Negative Earnings: Per share stock price divided by the latest 12-months earnings per share.

Price-to-Cash Flow: Per-share stock price divided by the per-share operating cash flow.

Price-to-Book Value: A ratio used to compare a stock's market value to its book value.

3-Year EPS Growth Rate: Average of earnings per share growth for latest 3-year period.

5-Year EPS Growth Rate: Average of earnings per share growth for latest 5-year period.

Active Share: A measure of the percentage of stock holdings in a manager's portfolio that differ from the benchmark index.

Alpha: A risk-adjusted measure of an investment's excess return relative to a benchmark.

Beta: A quantitative measure of the volatility, or systematic risk, of a security or a portfolio in comparison to the market as a whole.

R²: A measure that represents the percentage of a fund or security's movements that can be explained by movements in a benchmark index.

Price/Earnings-to-Growth Ratio: The price/earnings to growth ratio (PEG ratio) is a stock's price-to-earnings (P/E) ratio divided by the growth rate of its earnings for a specified time period.

Price-to-Sales Ratio: The price-to-sales (P/S) ratio is a valuation ratio that compares a company's stock price to its revenues. It is an indicator of the value placed on each dollar of a company's sales or revenues.

Sharpe Ratio: A risk-adjusted measure calculated using standard deviation and excess return to determine reward per unit of risk.

Standard Deviation: Measures variability of returns around the average return for an investment portfolio. Higher standard deviation suggests greater risk.

Virtus (NYSE: VRTS) is a distinctive partnership of boutique investment managers, singularly committed to the long-term success of individual and institutional investors.

- We are not constrained by a single investment approach; rather, we provide access to independent, specialized investment philosophies through our multi-discipline, multi-strategy approach.
- We have the flexibility, agility, and responsiveness of a boutique asset management firm with similar product breadth and investment talent of our larger peers.
- We are committed to thoughtfully providing investment solutions, adhering to the highest standards of product quality, operational excellence, and fiduciary responsibility.

Please consider a Fund's investment objectives, risks, charges, and expenses carefully before investing.
