

INVESTMENT OVERVIEW

The Fund offers investors exposure to international markets through companies that demonstrate strong, predictable, and sustainable growth potential. First-hand, team-based research aims to identify and invest in growth businesses with strong pricing power, repeatable revenues, long runways of growth, and financial and management strength.

KEY FEATURES

**Sustainable Growth** — Searches for companies that offer strong, predictable, and sustainable growth

**Benchmark Unconstrained** — A high-conviction, concentrated portfolio that invests in response to opportunities, rather than index relative weights

**Valuation Discipline** — Manages price risk through application of valuation tools focused on cash flow

AVERAGE ANNUAL TOTAL RETURNS (%) as of 03/31/19

Performance data quoted represents past results. Past performance is no guarantee of future results and current performance may be higher or lower than the performance shown. Investment return and principal value will fluctuate, so your shares, when redeemed, may be worth more or less than their original cost. Please visit [Virtus.com](http://Virtus.com) for performance data current to the most recent month-end.

Benchmark life performance is reported from 12/29/00.

The fund class gross expense ratio is 1.20%.

Average annual total return is the annual compound return for the indicated period and reflects the change in share price and the reinvestment of all dividends and capital gains. Returns for periods of one year or less are cumulative returns. Class I shares have no sales charges or distribution or service fees, therefore their returns do not reflect these expenses. Fees and expenses vary, and other share classes are subject to sales charges and fees. Class I shares are offered primarily to eligible institutional investors who purchase the minimum amounts required as described in the prospectus and may not be available to all investors. For fund performance on other share classes, please visit [www.virtus.com](http://www.virtus.com).

ANNUAL PERFORMANCE (%)

	2018	2017	2016	2015	2014	2013	2012	2011	2010	2009
Fund	-7.69	31.58	0.02	3.03	-7.73	20.91	21.44	-12.55	8.30	44.93
Index	-14.20	27.19	4.50	-5.66	-3.87	15.29	16.83	-13.71	11.15	41.45

GROWTH OF \$10,000

This chart assumes an initial investment of \$10,000 made on 12/1/1995. As of 3/29/2019 the fund value would have been \$39,089.45. Fund performance assumes reinvestment of dividends and capital gain distributions. This growth reflects no front end sales charges.

IMPORTANT RISK CONSIDERATIONS

**Equity Securities:** The market price of equity securities may be adversely affected by financial market, industry, or issuer-specific events. Focus on a particular style or on small or medium-sized companies may enhance that risk. **Foreign & Emerging Markets:** Investing internationally, especially in emerging markets, involves additional risks such as currency, political, accounting, economic, and market risk. **Industry/Sector Concentration:** A fund that focuses its investments in a particular industry or sector will be more sensitive to conditions that affect that industry or sector than a non-concentrated fund. **Geographic Concentration:** A fund that focuses its investments in a particular geographic location will be highly sensitive to financial, economic, political, and other developments affecting the fiscal stability of that location. **Prospectus:** For additional information on risks, please see the fund's prospectus.

GLOSSARY

**Avg. Weighted Market Cap (bn):** The total dollar market value of all of a company's outstanding shares. **Trailing P/E Ex-Negative Earnings:** Per share stock price divided by the latest 12-months earnings per share. **Price-to-Cash Flow:** Per-share stock price divided by the per-share operating cash flow. **Price-to-Book Value:** A ratio used to compare a stock's market value to its book value. **3-Year EPS Growth Rate:** Average of earnings per share growth for latest 3-year period. **5-Year EPS Growth Rate:** Average of earnings per share growth for latest 5-year period. **Active Share:** A measure of the percentage of stock holdings in a manager's portfolio that differ from the benchmark index. **Alpha:** A risk-adjusted measure of an investment's excess return relative to a benchmark. **Beta:** A quantitative measure of the volatility, or systematic risk, of a security or a portfolio in comparison to the market as a whole. **R<sup>2</sup>:** A measure that represents the percentage of a fund or security's movements that can be explained by movements in a benchmark index. **Sharpe Ratio:** A risk-adjusted measure calculated using standard deviation and excess return to determine reward per unit of risk. **Standard Deviation:** Measures variability of returns around the average return for an investment portfolio. Higher standard deviation suggests greater risk.

INDEX DEFINITION

Index: The MSCI AC World ex USA Index (net) is a free float-adjusted market capitalization-weighted index that measures equity performance of developed and emerging markets, excluding the United States. The index is calculated on a total return basis with net dividends reinvested. The index is unmanaged, its returns do not reflect any fees, expenses, or sales charges, and is not available for direct investment.

Morningstar Rating™ for funds, or 'star rating,' is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Ratings do not take into account the effect of sales charges and loads.
