

INVESTMENT OPPORTUNITY

The Fund seeks total return through a combination of capital appreciation and high current income.

Invests in a diversified portfolio of domestic convertible securities and high yield bonds rated below investment grade.

Under normal circumstances, the Fund will invest at least 80% of its total assets in a diversified portfolio of convertible securities and non-convertible income-producing securities and seeks to invest at least 50% of the portfolio in convertibles, but determines the allocation based on changes in equity prices, changes in interest rates, and other economic and market factors. For the convertible portion, Voya Investment Management seeks to capture the upside potential of equities with potentially less volatility than a pure stock investment.

In searching for investment opportunities, the manager looks for issuers that will successfully adapt to change, exceed minimum credit statistics, and exhibit the most promising operating performance potential.

AVERAGE ANNUAL TOTAL RETURNS (%) as of 3/28/2024

	QTD	YTD	1 Year	3 Year	5 Year	10 Year	Since Inception
NAV	0.63	0.63	9.22	-5.81	2.69	2.36	6.05
Market Price	2.19	2.19	12.42	-5.86	-1.92	0.58	5.28

Performance data quoted represents past performance. Past performance does not guarantee future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please visit [virtus.com](https://www.virtus.com) for performance data current to the most recent month end.

The fund class gross expense ratio is 3.54%. The net expense ratio is 3.41%, which reflects a contractual expense reimbursement in effect through 2/1/2025.

Excluding interest expense on borrowings the net expense ratio would have been 1.30%. The Adviser has contractually agreed to limit the Fund's annual operating expenses (subject to exclusions such as investment advisory fees and expenses relating to financial leverage) to not exceed, on an annualized basis, 0.13%. For more details, see the most recent shareholder report.

Performance reflects the deduction of Fund operating expenses. Performance does not reflect the incurrence of brokerage expenses, which typically apply to exchange traded products. Total return net of brokerage expenses would be lower than the total returns on market value shown in the table.

Average annual total return is the annual compound return for the indicated period. It reflects the change in share price and the reinvestment of all dividends and capital gains. Returns for periods of one year or less are cumulative returns.

IMPORTANT RISK CONSIDERATIONS

Convertible Securities: A convertible security may be called for redemption at a time and price unfavorable to the portfolio. **Leverage:** When the Fund leverages its portfolio, the Fund may be less liquid and/or may liquidate positions at an unfavorable time, and the value of the Fund's shares will be more volatile and sensitive to market movements. **Preferred Stocks:** Preferred stocks may decline in price, fail to pay dividends, or be illiquid. **Lower-Rated Securities:** Investments in lower-rated and non-rated securities present a greater risk of loss to principal and interest than higher-rated securities. **Credit & Interest:** Debt instruments are subject to various risks, including credit and interest rate risk. The issuer of a debt security may fail to make interest and/or principal payments. Values of debt instruments may rise or fall in response to changes in interest rates, and this risk may be enhanced with longer-term maturities. **High Yield Fixed Income Securities:** There is a greater risk of issuer default, less liquidity, and increased price volatility related to high yield securities than investment grade securities. **Market Volatility:** The value of the securities in the portfolio may go up or down in response to the prospects of individual companies and/or general economic conditions. Local, regional, or global events such as war or military conflict, terrorism, pandemic, or recession could impact the portfolio, including hampering the ability of the portfolio's manager(s) to invest its assets as intended. **Closed-End Funds:** Closed-end funds may trade at a discount or premium from their net asset values, which may affect whether an investor will realize gains or losses. They may also employ leverage, which may increase volatility. **No Guarantee:** There is no guarantee that the portfolio will meet its objective.

GLOSSARY

Weighted Average Maturity: The length of time until the average security in a fund will mature, be redeemed by its issuer, or paid down over time, which is the case with most securitized assets. **Weighted Average Current Yield:** The current yield on a bond portfolio divided by the number of bonds contained in it, weighted for the size of each bond so that the yield of large holdings does not drown out the calculation of yields on small holdings.

NET ASSET VALUE VS. MARKET PRICE

Net Asset Value (NAV) represents the total value of all assets held by the Fund (minus its total liabilities), divided by the total number of common shares outstanding. The net asset value returns reflect the performance of the manager. Market Price is the price at which investors may purchase or sell shares of the Fund. Market Price is determined in the open market by buyers and sellers, based on supply and demand. The Fund's Market Price fluctuates throughout the day and may differ from its underlying NAV. Shares of the Fund may trade at a premium (higher than) or a discount (lower than) to NAV. This characteristic is a risk separate and distinct from the risk that the Fund's net asset value could decline. The Fund has no control over the market price. The difference between the market price and the NAV (Premium/Discount) is expressed as a percentage of NAV.

RATINGS DISTRIBUTION METHODOLOGY

Credit ratings issued by Nationally Recognized Statistical Rating Organizations assess the credit worthiness of the issuers of the underlying securities and not to the Fund or its shares. Ratings are measured using a scale that ranges from AAA (highest) to NR (not rated). Not rated securities do not necessarily indicate low quality. The security's credit rating does not eliminate risk and credit ratings are subject to change. Credit Quality reflects the higher of the ratings of Standard & Poor's Corporation and Moody's Investors Service, Inc. Only one rating will be utilized if only one is available. Ratings are then adjusted to the Standard & Poor's rating tiers shown.
