

### INVESTMENT OPPORTUNITY

The Fund seeks to provide total return through a combination of current income and capital appreciation, while seeking to provide downside protection against capital loss. The Fund strives to dynamically allocate across convertibles, equities, and income-producing securities.

The Fund will normally invest at least 80% of its net assets (plus any borrowings for investment purposes) in a diversified portfolio of convertible securities, income-producing equity securities and income-producing debt and other instruments of varying maturities, of which at least 50% of total managed assets are invested in convertibles. The Fund has the latitude to write covered call options on the stocks held in the equity portion.

Attempts to dampen volatility, relative to an equity-only portfolio, due to the asymmetric risk/return features historically exhibited by convertible securities.

Managed by an experienced investment team that has a long track record in closed-end fund management.

The Fund has a limited term and will terminate on the first business day following the fifteenth anniversary of the effective date of its registration statement, May 22, 2030, absent approval by the Fund's Board of Trustees to extend the Fund's term by up to 12 months.

**Performance data quoted represents past performance. Past performance does not guarantee future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please visit [virtus.com](http://virtus.com) for performance data current to the most recent month end.**

The fund class gross expense ratio is 4.06%. The net expense ratio is 3.91%, which reflects a contractual expense reimbursement in effect through 2/1/2025.

Excluding interest expense on borrowings the net expense ratio would have been 2.27%. The Adviser has contractually agreed to limit the Fund's annual operating expenses (subject to exclusions such as investment advisory fees and expenses relating to financial leverage) to not exceed, on an annualized basis, 0.17%. For more details, see the most recent shareholder report.

Performance reflects the deduction of Fund operating expenses. Performance does not reflect the incurrence of brokerage expenses, which typically apply to exchange traded products. Total return net of brokerage expenses would be lower than the total returns on market value shown in the table.

Average annual total return is the annual compound return for the indicated period. It reflects the change in share price and the reinvestment of all dividends and capital gains. Returns for periods of one year or less are cumulative returns.

**FIXED INCOME CHARACTERISTICS**

	<b>Fund</b>
Weighted Average Maturity	3.67
Weighted Average Current Yield	2.51

**IMPORTANT RISK CONSIDERATIONS**

**Convertible Securities:** A convertible security may be called for redemption at a time and price unfavorable to the portfolio. **Lower-rated securities:** Investments in lower-rated and non-rated securities present a greater risk of loss to principal and interest than higher-rated securities. **Credit & Interest:** Debt instruments are subject to various risks, including credit and interest rate risk. The issuer of a debt security may fail to make interest and/or principal payments. Values of debt instruments may rise or fall in response to changes in interest rates, and this risk may be enhanced with longer-term maturities. **Leverage:** When the Fund leverages its portfolio, the Fund may be less liquid and/or may liquidate positions at an unfavorable time, and the value of the Fund's shares will be more volatile and sensitive to market movements. **High Yield Fixed Income Securities:** There is a greater risk of issuer default, less liquidity, and increased price volatility related to high yield securities than investment grade securities. **Equity Securities:** The market price of equity securities may be adversely affected by financial market, industry, or issuer-specific events. Focus on a particular style or on small, medium, or large-sized companies may enhance that risk. **Preferred Stocks:** Preferred stocks may decline in price, fail to pay dividends, or be illiquid. **Options:** Selling call options may limit the opportunity to profit from the increase in price of the underlying asset. Selling put options risks loss if the option is exercised while the price of the underlying asset is rising. Buying options risks loss of the premium paid for those options. **Market Volatility:** The value of the securities in the portfolio may go up or down in response to the prospects of individual companies and/or general economic conditions. Local, regional, or global events such as war or military conflict, terrorism, pandemic, or recession could impact the portfolio, including hampering the ability of the portfolio's manager(s) to invest its assets as intended. **Closed-End Funds:** Closed-end funds may trade at a discount or premium from their net asset values, which may affect whether an investor will realize gains or losses. They may also employ leverage, which may increase volatility. **No Guarantee:** There is no guarantee that the portfolio will meet its objective.

**GLOSSARY**

**Weighted Average Maturity:** The length of time until the average security in a fund will mature, be redeemed by its issuer, or paid down over time, which is the case with most securitized assets. **Weighted Average Current Yield:** The current yield on a bond portfolio divided by the number of bonds contained in it, weighted for the size of each bond so that the yield of large holdings does not drown out the calculation of yields on small holdings.

**NET ASSET VALUE VS. MARKET PRICE**

Net Asset Value (NAV) represents the total value of all assets held by the Fund (minus its total liabilities), divided by the total number of common shares outstanding. The net asset value returns reflect the performance of the manager. Market Price is the price at which investors may purchase or sell shares of the Fund. Market Price is determined in the open market by buyers and sellers, based on supply and demand. The Fund's Market Price fluctuates throughout the day and may differ from its underlying NAV. Shares of the Fund may trade at a premium (higher than) or a discount (lower than) to NAV. This characteristic is a risk separate and distinct from the risk that the Fund's net asset value could decline. The Fund has no control over the market price. The difference between the market price and the NAV (Premium/Discount) is expressed as a percentage of NAV.

**RATINGS DISTRIBUTION METHODOLOGY**

Credit ratings issued by Nationally Recognized Statistical Rating Organizations assess the credit worthiness of the issuers of the underlying securities and not to the Fund or its shares. Ratings are measured using a scale that ranges from AAA (highest) to NR (not rated). Not rated securities do not necessarily indicate low quality. The security's credit rating does not eliminate risk and credit ratings are subject to change. Credit Quality reflects the higher of the ratings of Standard & Poor's Corporation and Moody's Investors Service, Inc. Only one rating will be utilized if only one is available. Ratings are then adjusted to the Standard & Poor's rating tiers shown.

**FUND DISTRIBUTION AND MANAGED DISTRIBUTION PLAN**

The Board of Trustees of the Fund has adopted a Managed Distribution Plan, which provides for the Fund to make a regular monthly distribution of \$0.180 per share.

This notice discloses information on the sources of the distribution as required by SEC Rule 19(a) of the Investment Company Act of 1940 and the Fund's SEC Exemptive Order under Section 19(b) as follows:

**DISTRIBUTION ESTIMATES**

	DECEMBER 2023 (MTD)		FISCAL YEAR-TO-DATE (YTD) <sup>1</sup>	
	Per Share Amount	% of Current Distribution	Per Share Amount	% of Current Distribution
Net Investment Income	—	0.0%	\$0.019	1.0%
Net Realized Short-Term Capital Gains	—	0.0%	—	0.0%
Net Realized Long-Term Capital Gains	—	0.0%	—	0.0%
Return of Capital (or other Capital Sources)	\$0.180	100.0%	\$1.961	99.0%
Total Distribution	\$0.180	100.0%	\$1.980	100.0%

<sup>1</sup> Fiscal year started February 1, 2023.

Information regarding the fund's performance and distribution rates is set forth below. Please note that all performance figures are based on the fund's NAV and not the market price of the fund's shares. Performance figures are not meant to represent individual shareholder performance.

**December 31, 2023**

Average Annual Total Return on NAV for the 5-year period <sup>2</sup>	14.42%
Annualized Current Distribution Rate <sup>3</sup>	10.11%
Fiscal YTD Cumulative Total Return on NAV <sup>4</sup>	10.97%
Fiscal YTD Cumulative Distribution Rate <sup>5</sup>	9.27%

<sup>2</sup> Average Annual Total Return on NAV is the annual compound return for the five-year period. It reflects the change in the fund's NAV and reinvestment of all distributions.

<sup>3</sup> Annualized Current Distribution Rate is the current distribution rate annualized as a percentage of the fund's NAV at month end.

<sup>4</sup> Fiscal YTD Cumulative Total Return on NAV is the percentage change in the fund's NAV from the first day of the fiscal year to this month end, including distributions paid and assuming reinvestment of those distributions.

<sup>5</sup> Fiscal YTD Cumulative Distribution Rate is the dollar value of distributions from the first day of the fiscal year to this month end as a percentage of the fund's NAV at month end.

Under the terms of the Fund's Managed Distribution Plan, the Fund seeks to maintain a consistent distribution level that may be paid in part or in full from net investment income, realized capital gains, and a return of capital, or a combination thereof. You should not draw any conclusions about the Fund's investment performance from the amount of this distribution or from the terms of the Fund's Managed Distribution Plan. Shareholders should note, however, that if the Fund's aggregate net investment income and net realized capital gains are less than the amount of the distribution level, the difference will be distributed from the Fund's assets and will constitute a return of the shareholder's capital.

The Board of Trustees of the Fund may amend, suspend, or terminate the Managed Distribution Plan at any time, without prior notice to shareholders, if it deems such action to be in the best interest of the Fund and its shareholders. The termination, amendment, or suspension of the Managed Distribution Plan may cause a loss in the market value of the Fund's shares.

The amounts and sources of distributions reported in Section 19(a) Notices are only estimates and are not being provided for tax reporting purposes. The actual amounts and sources of the amounts for tax reporting purposes will depend upon the Fund's investment experience during the remainder of the fiscal year and may be subject to changes based on tax regulations. The Fund or your broker will send you a Form 1099-DIV for the calendar year that will tell you how to report these distributions for federal income tax purposes.

The Fund estimates that it has distributed more than its income and capital gains; therefore, a portion of your distribution may be a return of capital. A return of capital may occur, for example, when some or all of the money that you invested in the fund is paid back to you.
