

### INVESTMENT OPPORTUNITY

The Fund seeks to generate income by investing primarily in short-duration, investment-grade securitized debt across asset-backed securities (ABS) and mortgage-backed securities (MBS), including commercial and residential MBS. A disciplined, time-tested investment process and rigorous risk management approach seeks to target ABS and MBS with competitive yield and current income across undervalued areas of securitized credit markets.

### KEY FEATURES

**Complement to Traditional Fixed Income** — ABS (auto loans, equipment leases, credit card receivables, student loans, etc.) and MBS (pools of mortgages, both residential and commercial, agency and non-agency) sectors provide a wider investment opportunity set and much needed diversification relative to traditional fixed income

**Relative Value Focused** — With an emphasis on the out-of-index, niche areas of the securitized credit markets, Newfleet's securitized credit specialists employ their hallmark relative value approach, exploiting inefficiencies by continuously evaluating the market, sectors, and securities

**Lower Duration, Attractive Yield** — Targeting a duration of between one- to three-years, significantly shorter than traditional core bond strategies, while focusing on investment-grade securitized credit, which has historically offered a yield advantage versus similarly rated traditional corporate bonds

### INVESTMENT PROCESS

- 1 Top-Down Sector Allocation** — Continuous evaluation of the investable universe, sector evaluation, sector comparison, and sector allocation, all designed to identify relative value opportunities.
- 2 Bottom-Up Security Selection** — Quantitative and qualitative initial screens establish universe, understanding and reviewing underlying asset, assessing originator/management teams, analyzing deal structures, all designed to identify relative value opportunities.
- 3 Portfolio Management** — Sector/security investment recommendations debated, sector targets determined on relative value assessment, security-level implementation and positioning decided, ongoing stress testing, risk assessment, and trading reviews.

Returns for periods of less than one year are cumulative total returns.

**Performance data quoted represents past performance. Past performance does not guarantee future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please visit [virtus.com](http://virtus.com) for performance data current to the most recent month end.**

The Total Expense Ratio represents the Fund's Total Annual Fund Operating Expenses, which includes the management fee and other expenses where applicable, except for certain payments that are paid directly by the Fund, as described in the Prospectus.

\*The management fee is structured as a 'unified fee', out of which the Fund's adviser pays all of the ordinary operating expenses of the Fund, except for the following expenses, each of which is paid by the Fund: the Fund's management fee; payments under any 12b-1 plan; and other fees as described in the prospectus. The Adviser has agreed to waive a portion of the management fee equal to 0.10% through at least November 28, 2022, which will have the effect of reducing the Fund's total expenses to 0.39%, excluding certain expenses as discussed above.

IMPORTANT RISK CONSIDERATIONS

**Exchange-Traded Funds (ETF):** The value of an ETF may be more volatile than the underlying portfolio of securities it is designed to track. The costs to the portfolio of owning shares of an ETF may exceed the cost of investing directly in the underlying securities. **ABS/MBS:** Changes in interest rates can cause both extension and prepayment risks for asset- and mortgage-backed securities. These securities are also subject to risks associated with the non-repayment of underlying collateral, including losses to the portfolio. **Credit & Interest:** Debt instruments are subject to various risks, including credit and interest rate risk. The issuer of a debt security may fail to make interest and/or principal payments. Values of debt instruments may rise or fall in response to changes in interest rates, and this risk may be enhanced with longer-term maturities. **Variable Distribution Risk:** Periodic distributions by investments of variable or floating interest rates vary with fluctuations in market interest rates. **Derivatives:** Derivatives may include, among other things, futures, options, forwards and swap agreements and may be used in order to hedge portfolio risks, create leverage, or attempt to increase returns. Investments in derivatives may result in increased volatility and the portfolio may incur a loss greater than its principal investment. **Sector Focused Investing:** Events negatively affecting a particular industry or market sector in which the portfolio focuses its investments may cause the value of the portfolio to decrease. **Market Volatility:** The value of securities in the portfolio may go up or down in response to the prospects of individual companies and/or general economic conditions. Price changes may be short or long term. **Market Price/NAV:** At the time of purchase and/or sale, an investor's shares may have a market price that is above or below the fund's NAV, which may increase the investor's risk of loss. **Prospectus:** For additional information on risks, please see the fund's prospectus.

GLOSSARY

**Effective Duration:** The change in the value of a fixed income security that will result from a 1% change in interest rates while taking into account the way changes in rates will affect the expected cash flows of any bond with an embedded option such as call or prepayment option. This measure assigns a probability to the exercise of a call option, where applicable, based on specified shifts in the yield curve. Duration is expressed as a number of years, and generally, the larger the duration, the greater the interest rate risk or reward for a portfolio's underlying bond prices. **Weighted Average Maturity:** The length of time until the average security in a fund will mature, be redeemed by its issuer, or paid down over time, which is the case with most securitized assets. **30-day SEC Yield** is a standardized yield calculated according to a formula set by the SEC, and is subject to change. **30-day SEC Yield (unsubsidized)** is the 30 day SEC yield without the effect of applicable expense waivers.

RATINGS DISTRIBUTION METHODOLOGY

The ratings issued by Nationally Recognized Statistical Rating Organizations assess the credit worthiness of a corporation's or government's debt issues. The ratings apply to the fund's holdings and not the fund. Ratings are provided by Standard & Poor's, Moody's, and Fitch. For certain

securities that are not rated by any of these three agencies, credit ratings from other agencies may be used. Where the rating agencies rate a security differently, Newfleet uses the higher rating. If a rating is not available, the bond is placed in the Not Rated category. Credit ratings are subject to change. Aaa, Aa, A, and Baa are investment grade ratings; Ba, B, Caa, Ca, C, and D are below-investment grade ratings.

BENCHMARK

The ratings issued by Nationally Recognized Statistical Rating Organizations assess the credit worthiness of a corporation's or government's debt issues. The ratings apply to the fund's holdings and not the fund. Ratings are provided by Standard & Poor's, Moody's, and Fitch. For certain securities that are not rated by any of these three agencies, credit ratings from other agencies may be used. Where the rating agencies rate a security differently, Newfleet uses the higher rating. If a rating is not available, the bond is placed in the Not Rated category. Credit ratings are subject to change. Aaa, Aa, A, and Baa are investment grade ratings; Ba, B, Caa, Ca, C, and D are below-investment grade ratings. The ICE BofA 1-3 Year A-BBB US Corporate Index measures performance of U.S. corporate bond issues rated A through BBB, inclusive (based on an average of Moody's, S&P and Fitch), with a remaining term to final maturity less than 3 years. The index is calculated on a total return basis. The index is unmanaged, its returns do not reflect any fees, expenses, or sales charges, and is not available for direct investment.

IOPV, or Indicative Optimized Portfolio Value, is a calculation disseminated by the stock exchange that approximates the Fund's NAV every fifteen seconds throughout the trading day.

The Fund is an exchange-traded fund ("ETF"). The "net asset value" (NAV) of the Fund is determined at the close of each business day, and represents the dollar value of one share of the Fund; it is calculated by taking the total assets of the Fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV of the Fund is not necessarily the same as its intraday trading value. Fund investors should not expect to buy or sell shares at NAV because shares of ETFs such as the Fund are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Thus, shares may trade at a premium or discount to their NAV in the secondary market. Brokerage commissions will reduce returns. NAV returns are calculated using the Fund's daily 4:00 pm NAV, and include the reinvestment of all dividends and other distributions (reinvested at the Fund's NAV on distribution ex-date). Market price returns are calculated using the 4:00 pm midpoint between the bid and offer, and include the reinvestment of all dividends and other distributions (reinvested at the 4:00 pm bid/offer midpoint on distribution ex-date). Market price returns do not represent the return you would receive if you traded at other times.

The Fund is an actively managed exchange-traded fund and does not seek to replicate the performance of a specified index. The Fund may have a higher portfolio turnover than funds that seek to replicate the performance of an index.

Please consider a Fund's investment objectives, risks, charges, and expenses carefully before investing.
