

NFJ Large-Cap Value Wrap Strategy

Market Overview

U.S. equities entered bear market territory in the second quarter as the market posted its worst first half since 1970. The Federal Reserve (Fed) enacted its biggest hikes in nearly 30 years with hopes of reining in blistering inflation. Value and quality stocks generally led against this volatile backdrop. In the Russell 1000® Value Index, more defensive sectors like healthcare, utilities, and consumer staples held up on the downside, as well as energy, boosted by continued supply-side pressures. Conversely, more cyclical areas of the market, including technology, materials, and financials, slumped double digits amid recession fears.

Portfolio Overview

The Portfolio outperformed the Russell 1000 Value benchmark Index on a relative basis over the quarter. Strong stock selection drove outperformance while sector allocations somewhat detracted from returns.

Portfolio Contributors

Stock selection was positive across industrials, materials, real estate, and health care. Underweight exposures in financials and communication services contributed to quarterly results. **Merck** and **Valero Energy** were the strongest absolute contributors.

Biopharmaceutical company **Merck** reported ahead-of-consensus results, driven in part by robust sales of its new COVID-19 antiviral pill. Markets also reacted favorably to news that Merck is considering the purchase of the biotech firm Seagen, which focuses on cancer treatments.

Refiners like **Valero Energy** have performed well in the post-COVID demand recovery, especially after closures in 2020 reduced capacity, leading to record crack spreads, aka the price difference between a barrel of crude oil and the petroleum products refined from that barrel.

Over the course of three decades, NFJ Investment Group's commitment to value has remained steadfast. Our investment process – built upon the principles of Benjamin Graham, the father of value investing – has stayed true to the philosophy of the firm's founders while continuing to evolve in the hands of their successors through the integration of new technological capabilities and advanced analytics methods that enhance the research process.

Performance Data as of June 30, 2022

Annualized Returns (%) ¹	QTD	YTD	1 Year	3 Year	5 Year	10 Year	Since Inception
NFJ Large-Cap Value Wrap Composite (gross)	-11.11	-14.11	-5.09	7.67	7.78	10.34	9.76
NFJ Large-Cap Value Wrap Composite (net)	-11.80	-15.42	-7.91	4.50	4.60	7.10	6.53
Russell 1000 Value Index	-12.21	-12.86	-6.82	6.87	7.17	10.50	9.90

¹Cumulative return over a partial year

Composite inceptioned January 1, 2011. Composite results. Individual accounts will vary. **Past performance is no guarantee of future results.** The performance shown includes historical performance information from the sub-advisor. Please see Important Information at the end of this presentation for details regarding NFJ and subadvisor performance. Performance is calculated on a total return basis, assuming reinvestment of dividends and interest. Results include accrued income as well as realized and unrealized gains and losses, but do not include the effect of taxes. Gross of fee returns show performance before the deduction of advisory and Sponsor fees (including trading and custodial fees). Net returns presented include the maximum fee associated with the portfolio (fees deducted month after each quarter end for an annual fee of 3% for equity portfolios). Actual fees will vary by client.

NFJ Large-Cap Value Wrap Strategy

Portfolio Detractors

Stock picking was negative in just two sectors—utilities and consumer staples—during the quarter. From an allocation perspective, an overweight in technology and underweight in consumer staples detracted. **JPMorgan Chase** and **Microsoft** were the strongest absolute detractors.

Quarterly results for **JPMorgan Chase** were lower, due in part to higher credit losses, challenging economic conditions, and the bank's Russia exposure. That said, loan growth and net interest margin rose, and CEO Jamie Dimon stated he was "optimistic on the economy" in the short term given the healthy financial backdrop of both consumers and businesses.

Technology was the weakest-performing sector as investors flocked toward more defensively positioned equities. Despite solid quarterly results, including 18% y/y revenue growth boosted by cloud services demand, shares of **Microsoft** were not immune from the recent risk-off trade.

Portfolio Specifics

Stock	Average Weight	Absolute Contribution
Contributors		
Merck	3.4%	0.36%
Valero Energy	1.5%	0.12%
Humana	1.5%	0.11%
American Tower	1.4%	0.05%
Take-Two Interactive	0.5%	0.05%
Detractors		
JPMorgan Chase	3.5%	-0.61%
Microsoft	2.8%	-0.50%
Salesforce	1.6%	-0.41%
Apple	1.6%	-0.38%
Alphabet	1.5%	-0.37%

Outlook

Concerns for rising recession odds and when it may strike have topped investors' wall of worries, particularly given the Fed's poor track record of engineering soft landings (11 of the past 14 rate-hike cycles resulted in recession). That said, with the job market still tight and monetary policy still relatively loose, recession appears more likely in 2023 as opposed to 2022. Interestingly, with stocks down 20% or more year to date, much of a potential future downturn may be priced in—making equities' risk-reward profile begin to appear more favorable.

Looking ahead, we continue to monitor inflationary pressures and earnings estimates as both have the potential to impact investors' future returns. Though we are proponents of remaining fully invested, rather than attempting to time the market, we believe there are biases within the market that investors can opportunistically take advantage of. First, with volatility likely to increase, quality becomes increasingly important. Second, rising inflation highlights the importance of income and income growth. We believe companies with a history of paying and raising dividends, particularly businesses that can generate significant free cash flow, will be critical to rewarding shareholders. In our view, NFJ strategies, which emphasize attractive valuations and quality characteristics, as well as market-exceeding dividend growth, should be well positioned in such an environment.

Managed accounts are available exclusively through financial professionals. Managed accounts have a minimum asset level and may not be suitable for all investors. Financial professionals seeking more information should contact their managed accounts department or call their NFJ representative. Accounts are managed by NFJ. For certain sponsor firm accounts, NFJ provides the model to the sponsor or the sponsor's designee for discretionary implementation.

Risk Considerations: Market Volatility: Local, regional, or global events such as war, acts of terrorism, the spread of infectious illness or other public health issues, recessions, or other events could have a significant impact on the portfolio and its investments, including hampering the ability of the portfolio manager(s) to invest the portfolio's assets as intended. **Issuer Risk:** The portfolio will be affected by factors specific to the issuers of securities and other instruments in which the portfolio invests, including actual or perceived changes in the financial condition or business prospects of such issuers. **Equity Securities:** The market price of equity securities may be adversely affected by financial market, industry, or issuer-specific events. Focus on a particular style or on small or medium-sized companies may enhance that risk.

*Prior to February 1, 2021, NFJ was part of Allianz Global Investors LLC.

The Firm: The firm is defined as NFJ Investment Group, LLC (“NFJ”), a Registered Investment Advisor with the SEC. NFJ is an affiliated investment manager of Virtus Investment Partners, Inc. (“Virtus”). NFJ was founded in February 1989 with funding from Pacific Financial Asset Management Corp (“PFAMCo”). In 1994 PFAMCo merged with Thomson Advisory Group LP and became PIMCO Advisors. In 2000 Allianz AG acquired PIMCO Advisors, including NFJ. In 2010, Allianz Global Investors US LLC was formed, including NFJ. In July 2017 NFJ rolled up their RIA designation within Allianz Global Investors US LLC. At this time NFJ became a division of Allianz Global Investors LLC (“AllianzGI”) and was no longer independently registered with the SEC. Effective February 1, 2021, in connection with a strategic partnership between Virtus and AllianzGI, NFJ moved from AllianzGI and registered with the SEC as a newly established investment advisory subsidiary of Virtus. The firm definition includes all investment portfolios managed directly or indirectly by NFJ including institutional, pooled fund and wrap fee accounts.

NFJ claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. NFJ has been independently verified for the periods February 1, 2021 to March 31, 2021. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm’s policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The verification reports are available upon request.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

The Composite: The NFJ Large Cap Value Wrap Composite (the “Composite”) consists of portfolios that invest in a diversified group of large capitalization stocks considered to have attractive valuations and return value to shareholders. The Composite was created February 1, 2021 and has a performance inception date of January 1, 2011. Composite performance is linked to composite performance generated at a prior firm for all periods prior to the composite creation date. The Composite includes all discretionary wrap fee portfolios with comparable investment objectives and risks, managed by NFJ for at least one full month. The Composite can include both tax-exempt and taxable accounts. No leverage has been used in the accounts included in the Composite. The Composite includes only wrap fee accounts.

A list of composite descriptions is available upon request. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

Portfolio Returns: Returns are calculated on a total return basis, including all dividends and interest, accrued income, realized and unrealized gains or losses reinvestment of dividends and other earnings. Performance results are expressed in U.S. dollars. Returns are presented gross and net of fees. Gross of fees performance results are “pure” gross and are provided as supplemental information, as results have not been reduced by advisory and sponsor fees (including trading and custodial fees). Net of fee returns have been reduced by the highest applicable managed account fee of 3.00% applied on a quarterly basis. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

Fees: The managed account fee is a bundled fee (3.00%) inclusive of advisory, trading, custodial and administrative fees. There are no fees charged to clients at the commingled level; sponsor and advisory fees apply to the account as a whole. Actual fees incurred by client accounts may vary. Individual results may vary as a result of market conditions, trading costs and other factors, which may be unique to each account. NFJ’s compensation from the Program Sponsors vary, but it is generally between 0.33% and 0.50% of assets under management.

Index: The Russell 1000 Value Index measures the performance of the 1,000 largest companies in the Russell 3000 Index with lower price-to-book ratios and lower forecasted growth values. The Russell 3000 Index measures the performance of the 3,000 largest U.S. companies based on total market capitalization. This unmanaged market index is provided to represent the investment environment existing during the time periods shown. The index is referred to for comparative purposes only and is not intended to parallel the risk or investment style of the portfolios in the Composite. For comparison purposes, the index is fully invested, which includes reinvestment of income. The returns for this unmanaged index do not include any transaction costs, management fees or other costs. An investor may not invest directly in any index. All returns presented are calculated using U.S. dollars. The portfolios within this composite may and do invest in non-benchmark securities. Further information is available upon request.

The three-year annualized standard deviations for the composite and the benchmark are not presented as of year-end 2011 and 2012 because 36 months of composite returns are not available.

Internal Dispersion: The internal dispersion statistic is the asset weighted standard deviation calculation using beginning of period market values and pure gross of fee performance returns for the portfolios in the composite for the full period. For periods where there were 5 or fewer portfolios in the composite for the full period the internal dispersion statistic is not meaningful and is shown as “N/A”. **Past performance is not indicative of future results.**
