

NFJ Mid-Cap Value Wrap Strategy

Market Overview

During the third quarter, investors grappled with the possibility of enduring inflation, slowing economic growth, the rise of the Delta variant, Congressional paralysis, fears of property-developer China Evergrande unleashing a Lehman-esque contagion, and indications that the Federal Reserve's ultra-easy monetary policy is nearing an end. The cyclical and reopening trades that buoyed markets in the first half of 2021 stalled. Higher growth tech stocks surged early in the quarter as a haven play amid broader economic softening only to be hit the hardest in September on their greater sensitivity to rising interest rates. Against this backdrop, just three sectors—financials, real estate, and health care—delivered positive returns in the Russell Midcap® Value Index. In contrast, communication services, consumer discretionary, and information technology were the weakest-performing sectors.

Portfolio Overview

The Portfolio underperformed the Russell Midcap Value benchmark Index during the quarter. Stock selection drove performance results, while sector allocation was effectively net neutral over the reporting period.

Portfolio Contributors

Selection was positive across the consumer discretionary sector. From a sector allocation perspective, an overweight in financials benefitted quarterly results. **Garmin** and **AutoZone** were the strongest absolute contributors.

Garmin announced record second quarter revenue and operating income, with double-digit revenue growth in all segments and improved operating margin driven in part by strong demand for the company's active lifestyle products.

AutoZone bested the Street's fiscal Q4 EPS and sales estimates, driven in part by strength from the automotive parts retailer's do-it-for-me business. Management also repurchased \$900 million in shares during the quarter, for a year-to-date total repurchase of \$3.4 billion.

Over the course of three decades, NFJ Investment Group's commitment to value has remained steadfast. Our investment process – built upon the principles of Benjamin Graham, the father of value investing – has stayed true to the philosophy of the firm's founders while continuing to evolve in the hands of their successors through the integration of new technological capabilities and advanced analytics methods that enhance the research process.

Performance Data as of September 30, 2021

Annualized Returns (%) ¹	QTD	YTD	1 Year	3 Year	5 Year	10 Year
NFJ Mid-Cap Value Wrap Composite (gross)	-2.05	12.82	27.46	7.88	9.84	12.52
NFJ Mid-Cap Value Wrap Composite (net)	-2.79	10.34	23.76	4.71	6.61	9.22
Russell Midcap Value Index	-1.01	18.24	42.40	10.28	10.59	13.93

¹Cumulative return over a partial year

Composite results. Individual accounts will vary. **Past performance is no guarantee of future results.** The performance shown includes historical performance information from the sub-advisor. Please see Important Information at the end of this presentation for details regarding NFJ and subadvisor performance. Performance is calculated on a total return basis, assuming reinvestment of dividends and interest. Results include accrued income as well as realized and unrealized gains and losses, but do not include the effect of taxes. Gross of fee returns show performance before the deduction of advisory and Sponsor fees (including trading and custodial fees). Net returns presented include the maximum fee associated with the portfolio (fees deducted month after each quarter end for an annual fee of 3% for equity portfolios). Actual fees will vary by client.

NFJ Mid-Cap Value Wrap Strategy

Portfolio Detractors

Stock picking in the materials sector detracted. From an allocation perspective, an underweight in REITs dampened relative returns. **Mercury Systems** and **Amedisys** were the strongest absolute detractors.

Though fiscal fourth quarter revenues and adjusted EPS were above the Street's expectations, **Mercury Systems** lowered FY22 revenue guidance. Shares of the global technology company, which largely serves the aerospace and defense industry, generally trended downward over the quarter. Though policy issues have softened near term trends, we believe the secular theme of integrating technology in areas like aerospace and defense will remain in place for the foreseeable future.

Amedisys posted weaker than expected 2Q results and management lowered 2021 guidance, as Covid-related headwinds negatively impacted the post-acute healthcare service provider's hospice business. The company benefits from secular and underlying fundamental trends that are poised to remain favorable for years to come and we continue to like the name.

Portfolio Specifics

Stock	Average Weight	Absolute Contribution
Contributors		
Garmin	0.7%	0.19%

Managed accounts are available exclusively through financial professionals. Managed accounts have a minimum asset level and may not be suitable for all investors. Financial professionals seeking more information should contact their managed accounts department or call their NFJ representative. Accounts are managed by NFJ. For certain sponsor firm accounts, NFJ provides the model to the sponsor or the sponsor's designee for discretionary implementation.

Risk Considerations: Market Volatility: Local, regional, or global events such as war, acts of terrorism, the spread of infectious illness or other public health issues, recessions, or other events could have a significant impact on the portfolio and its investments, including hampering the ability of the portfolio manager(s) to invest the portfolio's assets as intended. **Issuer Risk:** The portfolio will be affected by factors specific to the issuers of securities and other instruments in which the portfolio invests, including actual or perceived changes in the financial condition or business prospects of such issuers. **Equity Securities:** The market price of equity securities may be adversely affected by financial market, industry, or issuer-specific events. Focus on a particular style or on small or medium-sized companies may enhance that risk.

Outlook

Last quarter it appeared the economy had completed a "V shaped" recovery, as stocks nearly doubled from their COVID lows. This massive rebound can be primarily attributed to policy tailwinds. The M2 money supply is up nearly a third since the end of 2019; it's probably not a coincidence that this nearly matches the stock market's gains. Emergency stimulus spending has been a multiple of that employed during the global financial crisis. Perhaps the biggest tailwind has been COVID vaccinations, which returned mobility to nearly pre-pandemic levels in some places. As of early October, 57% of Americans are fully vaccinated. While some areas such as travel and leisure continue to be buffeted by COVID-related headwinds, much of the economy has regained or even surpassed its prior trendline.

Going forward, a rising tide may not lift all ships, and we are braced for a more volatile fall and winter. Government stimulus is beginning to roll off. The Fed has laid the groundwork for tapering asset purchases, while making it clear this does not mean rate hikes are imminent. If anything, policy tailwinds are poised to become headwinds. As of this writing, there remains uncertainty regarding passage of the president's bipartisan infrastructure proposal and larger spending bill. The most probable outcome would be a more scaled back plan. However, any package that is passed would likely be attached to an increase in personal and corporate taxes, which could eat into current 2022 earnings forecasts.

Amidst this backdrop, the most pressing topic has been inflation that has proven to be far from "transitory." Many supply chain bottlenecks driving up prices have yet to subside. Difficulties finding workers has driven wage growth higher, which may put pressure on corporate profit margins. Stock valuations are at extreme levels, reducing the risk/reward calculus for investors and limiting price appreciation potential to earnings growth. Heightened volatility is likely. We believe this environment remains supportive of companies paying and raising their dividends. Dividends serve the dual purpose of blunting portfolio volatility, while dividend growth may help offset inflation, offering more defensive positioning in uncertain markets.

The Firm: The firm is defined as NFJ Investment Group, LLC (“NFJ”), a Registered Investment Advisor with the SEC. NFJ is an affiliated investment manager of Virtus Investment Partners, Inc. (“Virtus”). NFJ was founded in February 1989 with funding from Pacific Financial Asset Management Corp (“PFAMCo”). In 1994 PFAMCo merged with Thomson Advisory Group LP and became PIMCO Advisors. In 2000 Allianz AG acquired PIMCO Advisors, including NFJ. In 2010, Allianz Global Investors US LLC was formed, including NFJ. In July 2017 NFJ rolled up their RIA designation within Allianz Global Investors US LLC. At this time NFJ became a division of Allianz Global Investors LLC (“AllianzGI”) and was no longer independently registered with the SEC. Effective February 1, 2021, in connection with a strategic partnership between Virtus and AllianzGI, NFJ moved from AllianzGI and registered with the SEC as a newly established investment advisory subsidiary of Virtus. The firm definition includes all investment portfolios managed directly or indirectly by NFJ including institutional, pooled fund and wrap fee accounts.

NFJ claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. NFJ has been independently verified for the periods February 1, 2021 to March 31, 2021. The verification reports are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm’s policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

The Composite: The NFJ Mid Cap Value Wrap Composite (the “Composite”) consists of portfolios that invest in a diversified group of mid capitalization stocks considered to have attractive valuations and return value to shareholders. The Composite was created February 1, 2021 and has a performance inception date of January 1, 2011. Composite performance is linked to composite performance generated at a prior firm for all periods prior to the composite creation date. The Composite includes all discretionary wrap fee portfolios with comparable investment objectives and risks, managed by NFJ for at least one full month. The Composite can include both tax-exempt and taxable accounts. No leverage has been used in the accounts included in the Composite. The Composite includes only wrap fee accounts.

A list of composite descriptions is available upon request. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

Portfolio Returns: Returns are calculated on a total return basis, including all dividends and interest, accrued income, realized and unrealized gains or losses reinvestment of dividends and other earnings. Performance results are expressed in U.S. dollars. Returns are presented gross and net of fees. Gross of fees performance results are “pure” gross and are provided as supplemental information, as results have not been reduced by advisory and sponsor fees (including trading and custodial fees). Net of fee returns have been reduced by the highest applicable managed account fee of 3.00% applied on a quarterly basis. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

Fees: The managed account fee is a bundled fee (3.00%) inclusive of advisory, trading, custodial and administrative fees. There are no fees charged to clients at the commingled level; sponsor and advisory fees apply to the account as a whole. Actual fees incurred by client accounts may vary. Individual results may vary as a result of market conditions, trading costs and other factors, which may be unique to each account. NFJ’s compensation from the Program Sponsors vary, but it is generally between 0.33% and 0.50% of assets under management.

Index: The Russell Midcap Value Index measures the performance of the 800 smallest companies in the Russell 1000 Index with lower price-to-book ratios and lower forecasted growth values. The Russell 1000 Index measures the performance of the 1,000 largest U.S. companies based on total market capitalization. This unmanaged market index is provided to represent the investment environment existing during the time periods shown. The index is referred to for comparative purposes only and is not intended to parallel the risk or investment style of the portfolios in the Composite. For comparison purposes, the index is fully invested, which includes reinvestment of income. The returns for this unmanaged index do not include any transaction costs, management fees or other costs. An investor may not invest directly in any index. All returns presented are calculated using U.S. dollars. The portfolios within this composite may and do invest in non-benchmark securities. Further information is available upon request.

Internal Dispersion: The internal dispersion statistic is the asset weighted standard deviation calculation using beginning of period market values and pure gross of fee performance returns for the portfolios in the composite for the full period. For periods where there were 5 or fewer portfolios in the composite for the full period the internal dispersion statistic is not meaningful and is shown as “NA”. **Past performance is not indicative of future results.**
