

NFJ Dividend Value Wrap Strategy

Market Overview

Investors embraced risk in the first quarter and propelled U.S. equities to extend their fourth quarter gains. This, despite the second and third largest bank failures on record and a Federal Reserve (Fed) committed to tightening monetary policy to combat lingering inflation. One of last year's hardest-hit sectors, technology, staged a comeback as interest rates pulled back and the sector was perceived as a haven amidst the banking turmoil. Within the benchmark Russell 1000® Value Index, communication services and technology led with double-digit gains, followed by strength from the materials and consumer discretionary sectors. In contrast, the health care, financials, energy, and utilities sectors posted the weakest results.

Portfolio Overview

The NFJ Dividend Value Wrap Strategy outperformed the Russell 1000 Value benchmark Index over the quarter. Positive sector allocations drove outperformance, while stock selection moderately detracted from relative returns.

Portfolio Contributors

Selection was positive across the health care and industrials sectors. Sector allocations were positive across ten of eleven GICS sectors over the quarter. Being overweight the second best-performing sector in the Index—technology—contributed the most to relative returns. **FedEx** and **Microsoft** were the strongest absolute contributors.

Fiscal third quarter results for delivery company **FedEx** exceeded analysts' estimates, driven in part by efforts to control costs, price hikes, and fuel surcharges to help offset a shipping slowdown. Management also raised its outlook and committed to additional cost cutting initiatives.

Over the course of three decades, NFJ Investment Group's commitment to value has remained steadfast. Our investment process – built upon the principles of Benjamin Graham, the father of value investing – has stayed true to the philosophy of the firm's founders while continuing to evolve in the hands of their successors through the integration of new technological capabilities and advanced analytics methods that enhance the research process.

Performance Data as of March 31, 2023

Annualized Returns (%) ¹	QTD	YTD	1 Year	3 Year	5 Year	10 Year	Since Inception
NFJ Dividend Value Wrap Composite (gross)	2.49	2.49	-6.05	15.59	5.81	7.99	8.89
NFJ Dividend Value Wrap Composite (net)	1.73	1.73	-8.85	12.21	2.69	4.81	5.69
Russell 1000 Value Index	1.01	1.01	-5.91	17.93	7.50	9.13	9.88

1. Annualized for periods greater than one year.

Composite inception January 1, 2011. Composite results. Individual accounts will vary. **Past performance is no guarantee of future results.** The performance shown includes historical performance information from the sub-advisor. Please see Important Information at the end of this presentation for details regarding NFJ and subadvisor performance. Performance is calculated on a total return basis, assuming reinvestment of dividends and interest. Results include accrued income as well as realized and unrealized gains and losses, but do not include the effect of taxes. Gross of fee returns show performance before the deduction of advisory and Sponsor fees (including trading and custodial fees). Net returns presented include the maximum fee associated with the portfolio (fees deducted month after each quarter end for an annual fee of 3% for equity portfolios). Actual fees will vary by client.

NFJ Dividend Value Wrap Strategy

Portfolio Contributors, cont.

Investors shifted into tech giants like **Microsoft** amid the quarter's banking crisis, creating a haven-like environment within the technology sector. Quarterly results from Microsoft's Azure cloud business were strong, and management announced an AI upgrade across its suite of office productivity programs, including Microsoft Word, Excel, PowerPoint, Outlook, and Teams.

Top Absolute Contributors	Avg Weight
FedEx	2.1%
Microsoft	2.3%
West Pharmaceutical Services	1.0%
Zoetis	2.8%
KB Home	1.2%

Portfolio Detractors

Stock picking was negative in the real estate and communication services sectors. An underweight in communication services, the Index's best-performing sector, detracted. **Medical Properties Trust** and **Bank of America** were the strongest absolute detractors.

Fourth quarter results for **Medical Properties Trust** were in line with expectations; however, guidance for 2023 normalized funds from operations (FFO) for the healthcare REIT was below consensus on underperformance from one of its tenants. We trimmed the position during the quarter.

Fourth quarter revenue for **Bank of America**, the second largest bank in the U.S., beat estimates, driven in part by higher interest rates. Though the company has the highest-quality loan book among its peers, even its shares were not immune to the sector's broader downturn.

Top Absolute Detractors	Avg Weight
Medical Properties Trust	2.1%
Bank of America	3.6%
Baxter International	1.1%
Truist Financial	1.0%
Alexandria Real Estate Equities	2.1%

Outlook

The U.S. economy continues to tiptoe to the edge of a recession, with the latest economic data showing signs of cracks in the labor market. That said, unemployment remains near historical lows, and consumers still have a solid cash cushion. The key focus for investors is the divergence between what the Fed says and what investors believe the Fed will ultimately do, and where rates finish the year.

Forecasts show the fed funds rate holding at around 5% through the end of 2023. However, the futures market has priced in capitulation, with the Fed cutting rates by at least 50 basis points this year. Should the futures market prove correct, such a reversal appears largely priced into markets. However, should Fed Chair Powell hold rates firm through year-end, stocks could react unfavorably, implying more downside than upside risk at present levels.

Currently, U.S. stocks are not particularly cheap, with the S&P 500® Index trading at more than 18 times forward earnings. However, consecutive years in the red are rare for U.S. equities, and while much of 2023's gains may already be in the books, further gains could be augmented by attractive and growing dividend yields. We believe NFJ portfolios, which seek to invest in stocks with attractive dividends and dividend growth, are well positioned for this type of environment.

Dividends reflect past performance and there is no guarantee they will continue to be paid. Managed accounts are available exclusively through financial professionals. Managed accounts have a minimum asset level and may not be suitable for all investors. Financial professionals seeking more information should contact their managed accounts department or call their NFJ representative. Accounts are managed by NFJ. For certain sponsor firm accounts, NFJ provides the model to the sponsor or the sponsor's designee for discretionary implementation.

Risk Considerations: Market Volatility: The value of the securities in the portfolio may go up or down in response to the prospects of individual companies and/or general economic conditions. Local, regional, or global events such as war, terrorism, pandemic, or recession could impact the portfolio, including hampering the ability of the portfolio's manager(s) to invest its assets as intended. **Issuer Risk:** The portfolio will be affected by factors specific to the issuers of securities and other instruments in which the portfolio invests, including actual or perceived changes in the financial condition or business prospects of such issuers.

Equity Securities: The market price of equity securities may be adversely affected by financial market, industry, or issuer-specific events. Focus on a particular style or on small, medium, or large-sized companies may enhance that risk.

The information is historical and may not reflect current or future characteristics and may vary among individual accounts depending on a variety of factors, including portfolio size, specific investment guidelines and inception dates of individual accounts. Certain projected characteristics (such as the forward P/E ratio) of the model portfolio and indices shown have been estimated in this material. Estimated data reflect subjective judgments and assumptions and unexpected events may occur. Therefore, there can be no assurance that developments will transpire as forecasted. **P/E** is a ratio of security price to earnings per share. Typically, an undervalued security is characterized by a low P/E ratio, while an overvalued security is characterized by a high P/E ratio. The forward P/E ratio shown uses funds from operations, instead of earnings, for REITs. **Return on Equity (ROE)** is a measure of a corporation's profitability, calculated as net income divided by shareholder equity. It is an indication of how well the firm used reinvested earnings to generate additional earnings.

Portfolio Information: All portfolio statistics represent a model portfolio of this strategy currently managed by NFJ. Individual account holdings will vary depending on the size of an account, cash flows, and account restrictions. These statistics are representative of how the portfolios in the composite are invested as of the indicated date. Portfolio holdings are subject to change daily. *Prior to February 1, 2021, NFJ was part of Allianz Global Investors LLC.

The Firm: The firm is defined as NFJ Investment Group, LLC ("NFJ"), a Registered Investment Advisor with the SEC. NFJ is an affiliated investment manager of Virtus Investment Partners, Inc. ("Virtus"). NFJ was founded in February 1989 with funding from Pacific Financial Asset Management Corp ("PFAMCo"). In 1994 PFAMCo merged with Thomson Advisory Group LP and became PIMCO Advisors. In 2000 Allianz AG acquired PIMCO Advisors, including NFJ. In 2010, Allianz Global Investors US LLC was formed, including NFJ. In July 2017 NFJ rolled up their RIA designation within Allianz Global Investors US LLC. At this time NFJ became a division of Allianz Global Investors LLC ("AllianzGI") and was no longer independently registered with the SEC. Effective February 1, 2021, in connection with a strategic partnership between Virtus and AllianzGI, NFJ moved from AllianzGI and registered with the SEC as a newly established investment advisory subsidiary of Virtus. The firm definition includes all investment portfolios managed directly or indirectly by NFJ including institutional, pooled fund and wrap fee accounts.

NFJ claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. NFJ has been independently verified for the periods February 1, 2021 to March 31, 2021. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The verification reports are available upon request.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

The Composite: The NFJ Dividend Value Wrap Composite (the "Composite") consists of portfolios that invest in a diversified group of large to mid-capitalization stocks considered to have attractive valuations and return value to shareholders. Each company typically has a minimum market capitalization of at least \$3.5 billion at purchase and holdings pay or are expected to pay dividends. The Composite was created February 1, 2021 and has a performance inception date of January 1, 2011. Composite performance is linked to composite performance generated at a prior firm for all periods prior to the composite creation date. The Composite includes all discretionary wrap fee portfolios with comparable investment objectives and risks, managed by NFJ for at least one full month. The Composite can include both tax-exempt and taxable accounts. No leverage has been used in the accounts included in the Composite. The Composite includes only wrap fee accounts.

A list of composite descriptions is available upon request. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

Portfolio Returns: Returns are calculated on a total return basis, including all dividends and interest, accrued income, realized and unrealized gains or losses reinvestment of dividends and other earnings. Performance results are expressed in U.S. dollars. Returns are presented gross and net of fees. Gross of fees performance results are "pure" gross and are provided as supplemental information, as results have not been reduced by advisory and sponsor fees (including trading and custodial fees). Net of fee returns have been reduced by the highest applicable managed account fee of 3.00% applied on a monthly basis.

Fees: The managed account fee is a bundled fee (3.00%) inclusive of advisory, trading, custodial and administrative fees. There are no fees charged to clients at the commingled level; sponsor and advisory fees apply to the account as a whole. Actual fees incurred by client accounts may vary. Individual results may vary as a result of market conditions, trading costs and other factors, which may be unique to each account. NFJ's compensation from the Program Sponsors vary, but it is generally between 0.33% and 0.50% of assets under management.

Index: The Russell 1000 Value Index measures the performance of the 1,000 largest companies in the Russell 3000 Index with lower price-to-book ratios and lower forecasted growth values. The Russell 3000 Index measures the performance of the 3,000 largest U.S. companies based on total market capitalization. This unmanaged market index is provided to represent the investment environment existing during the time periods shown. The index is referred to for comparative purposes only and is not intended to parallel the risk or investment style of the portfolios in the Composite. For comparison purposes, the index is fully invested, which includes reinvestment of income. The returns for this unmanaged index do not include any transaction costs, management fees or other costs. An investor may not invest directly in any index. All returns presented are calculated using U.S. dollars. The portfolios within this composite may and do invest in non-benchmark securities. Further information is available upon request.

The three-year annualized standard deviations for the composite and the benchmark are not presented as of year-end 2012 because 36 months of composite returns are not available.

Internal Dispersion: The internal dispersion statistic is the asset weighted standard deviation calculation using beginning of period market values and pure gross of fee performance returns for the portfolios in the composite for the full period. For periods where there were 5 or fewer portfolios in the composite for the full period the internal dispersion statistic is not meaningful and is shown as "N/A". **Past performance is not indicative of future results.**
