

Virtus LifeSci Biotech Products ETF

3Q17

BBP

NYSE Arca

The Virtus LifeSci Biotech Products ETF seeks investment results that correspond, before fees and expenses, to the price and yield performance of the LifeSci Biotechnology Products Index.

INVESTMENT OPPORTUNITY

Biotechnology investors gain exposure to one of the most exciting, high-growth sectors in the global economy today. These companies are in the business of designing drugs that save lives. Everything ranging from antivirals, antibiotics, and cancer-fighting medicines to gene therapies, cell-based therapies, and enzyme replacement therapies are developed in the biotech sector.

BBP passively invests in products stage biotechnology companies. These are typically more established companies with much clinical trial failure risk behind them. They have already successfully completed multiple human clinical trials and have received FDA approval to sell and market a drug. They devote more of their energies toward educating patients, physicians, and insurance providers in order to drive sales and profit growth.

In accordance with its index, BBP weights its constituents equally and rebalances semi-annually.

Performance data quoted represents past results. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment return and principal value will fluctuate, and shares, when redeemed, may be worth more or less than their original cost. Please visit www.virtus.com for performance data current to the most recent month-end.

Gross Expense Ratio: 0.79%; Net Expense Ratio: N/A.

The gross expense ratio represents the Fund's management fee, which is structured as a "unified fee," out of which the Fund's adviser pays all routine expenses, except for certain payments as described in the prospectus, which are paid by the Fund.

The Fund is an exchange-traded fund ("ETF"). The "net asset value" (NAV) of the Fund is determined at the close of each business day, and represents the dollar value of one share of the Fund; it is calculated by taking the total assets of the Fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV of the Fund is not necessarily the same as its intraday trading value. Fund investors should not expect to buy or sell shares at NAV because shares of ETFs such as the Fund are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Thus, shares may trade at a premium or discount to their NAV in the secondary market. Brokerage commissions will reduce returns. NAV returns are calculated using the Fund's daily 4:00 p.m. NAV, and include the reinvestment of all dividends and other distributions (reinvested at the Fund's NAV on distribution ex-date). Market price returns are calculated using the 4:00 pm midpoint between the bid and offer, and include the reinvestment of all dividends and other distributions (reinvested at the 4:00pm bid/offer midpoint on distribution ex-date). Market price returns do not represent the return you would receive if you traded at other times.

The Fund's index is the **LifeSci Biotechnology Products Index**, which is designed to track the performance of U.S. listed biotechnology stocks with at least one drug therapy approved by the U.S. Food and Drug Administration for marketing. The index is unmanaged, its returns do not reflect any fees, expenses, or sales charges, and is not available for direct investment.

Returns for periods of less than one year are cumulative total returns.

FUND RISKS

Exchange Traded Fund: The value of an ETF may be more volatile than the underlying portfolio of securities the ETF is designed to track. The costs of owning the ETF may exceed the cost of investing directly in the underlying securities.

Industry/Sector Concentration: A fund that focuses its investments on a particular industry or sector will be more sensitive to conditions that affect industry or sector than a non-concentrated fund.

Market Price/NAV: At the time of purchase and/or sale, an investor's shares may have a market price that is above or below the fund's NAV, which may increase the investor's risk of loss.

Correlation to Index: The performance of the fund and its index may vary somewhat due to factors such as fund flows, transaction costs, and timing differences associated with addition to and deletions from its index.

Non-Diversified: The fund is non-diversified and may be more susceptible to factors negatively impacting its holdings to the extent that each security represents a larger portion of the fund's assets.

No Guarantee: There is no guarantee that the portfolio will meet its objective.

Prospectus: For additional information on risks, please see the fund's prospectus.

Please consider the Fund's objectives, risks, charges, and expenses before investing. Contact us at 1.800.243.4361 or visit www.virtus.com for a prospectus, which contains this and other information about the Fund. Read the prospectus carefully before investing.

Not FDIC insured	May lose value	Not bank guaranteed
