Lipper Category		Core Plus Bond Funds		Multi-Sector Income Funds
Index		Bloomberg U.S. Aggregate Bond Index		Bloomberg U.S. Aggregate Bond Index

KEY FEATURES

Broad Fixed Income Exposure — Highly diversified, duration-neutral core plus bond allocation, primarily focused on higher-quality, more liquid securities

Relative Value Focus — Top-down analysis weighs relative attractiveness of 14 global bond sectors, evaluating fundamentals, yields, spreads, and supply/demand dynamics

Extensive Fundamental Research — Security selection driven by bottom-up analysis of individual bond quality, credit risk, valuation, company management, structure, and technical elements

Diversification — Highly diversified, duration-neutral opportunistic bond portfolio, which allows for higher allocations to lower-rated and non-U.S. debt

Flexibility — Rotates across 14 major bond segments, including ex-U.S. (Yankees and corporate bonds, and non-U.S. dollar bonds in both developed and emerging markets), in order to benefit from opportunity—and manage risk

Extensive Fundamental Research — Security selection driven by bottom-up analysis of individual bond quality, credit risk, valuation, company management, structure, and technical elements

KEY FEATURES

Broad Fixed Income Exposure — Seeks to provide income, quality, diversification, and liquidity in order to serve as an anchor of a diversified portfolio

Prudent Risk Management — Strives to generate superior long-term risk-adjusted returns, which often entails risk reduction over the short term

Extensive Fundamental Research — Combines top-down and bottom-up analysis to exploit inefficiencies in multiple sectors of the global fixed income marketplace

Expanded Fixed Income Exposure — Seeks to provide income, quality, diversification, and liquidity across cross bond sectors and “plus” sectors, such as high yield and global debt

Prudent Risk Management — Strives to generate superior long-term risk-adjusted returns, which often entails risk reduction over the short term

Extensive Fundamental Research — Combines macroeconomic and fundamental analysis to exploit inefficiencies in multiple sectors of the global fixed income marketplace

Performance data quoted represents past performance. Past performance does not guarantee future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please visit [virtus.com](https://www.virtus.com) for performance data current to the most recent month end. This share class has no sales charges and is not available to all investors. Other share classes have sales charges. See [virtus.com](https://www.virtus.com) for details.

SAVYX: The fund class gross expense ratio is 0.78%. The net expense ratio is 0.55%, which reflects a contractual expense reimbursement in effect through 01/31/2024.

VMFIX: The fund class gross expense ratio is 0.84%. The net expense ratio is 0.74%, which reflects a contractual expense reimbursement in effect through 01/31/2024.

STIGX: The fund class gross expense ratio is 0.64%. The net expense ratio is 0.50%, which reflects a contractual expense reimbursement in effect through 04/30/2024.

SAMFX: The fund class gross expense ratio is 0.58%. The net expense ratio is 0.46%, which reflects a contractual expense reimbursement in effect through 04/30/2024.

Average annual total return is the annual compound return for the indicated period and reflects the change in share price and the reinvestment of all dividends and capital gains. Returns for periods of one year or less are cumulative returns.

INDEX DEFINITION: The Bloomberg U.S. Aggregate Bond Index measures the U.S. investment grade fixed rate bond market. The index is calculated on a total return basis. The index is unmanaged, its returns do not reflect any fees, expenses, or sales charges, and is not available for direct investment.

Effective Duration: The change in the value of a fixed income security that will result from a 1% change in interest rates while taking into account the way changes in rates will affect the expected cash flows of any bond with an embedded option such as call or prepayment option. This measure assigns a probability to the exercise of a call option, where applicable, based on specified shifts in the yield curve. Duration is expressed as a number of years, and generally, the larger the duration, the greater the interest rate risk or reward for a portfolio's underlying bond prices.

IMPORTANT RISK CONSIDERATIONS

SAVYX: 1, 2, 3, 4, 5, 7, 8; VMFIX: 1, 2, 3, 4, 5, 7, 8; STIGX: 1, 2, 5, 7, 8; SAMFX: 1, 2, 3, 5, 6, 7, 8

¹Credit & Interest: Debt instruments are subject to various risks, including credit and interest rate risk. The issuer of a debt security may fail to make interest and/or principal payments. Values of debt instruments may rise or fall in response to changes in interest rates, and this risk may be enhanced with longer-term maturities. **²ABS/MBS:** Changes in interest rates can cause both extension and prepayment risks for asset- and mortgage-backed securities. These securities are also subject to risks associated with the non-repayment of underlying collateral, including losses to the portfolio. **³High Yield Fixed Income Securities:** There is a greater risk of issuer default, less liquidity, and increased price volatility related to high yield securities than investment grade securities. **⁴Bank Loans:** Bank loans may be unsecured or not fully collateralized, may be subject to restrictions on resale, may be less liquid and may trade infrequently on the secondary market. Bank loans settle on a delayed basis; thus, sale proceeds may not be available to meet redemptions for a substantial period of time after the sale of the loan. **⁵Foreign & Emerging Markets:** Investing in foreign securities, especially in emerging markets, subjects the portfolio to additional risks such as increased volatility, currency fluctuations, less liquidity, and political, regulatory, economic, and market risk. **⁶Derivatives:** Derivatives may include, among other things, futures, options, forwards and swap agreements and may be used in order to hedge portfolio risks, create leverage, or attempt to increase returns. Investments in derivatives may result in increased volatility and the portfolio may incur a loss greater than its principal investment. **⁷Market Volatility:** The value of the securities in the portfolio may go up or down in response to the prospects of individual companies and/or general economic conditions. Local, regional, or global events such as war, terrorism, pandemic, or recession could impact the portfolio, including hampering the ability of the portfolio's manager(s) to invest its assets as intended. **⁸Prospectus:** For additional information on risks, please see the fund's prospectus.

Please consider a Fund's investment objectives, risks, charges, and expenses carefully before investing.
