

InfraCap MLP ETF (NYSE Arca: AMZA) Tax Information

June 8, 2023 – Following the conclusion of a regular tax analysis conducted on the InfraCap MLP ETF (the "Fund" or "AMZA"), Virtus ETF Advisers LLC, the Fund's investment adviser, is recording an estimated tax liability of \$672,900 or \$0.0709 per share. The analysis considers multiple factors including K-1 information received from MLPs held in the Fund's portfolio and the tax impact of purchases and sales implemented by portfolio managers.

This notice is not intended or written to be used as tax advice.

Please consider the investment objectives, risks, charges and expenses of the Fund carefully before investing. The prospectus contains this and other information about the Fund. Contact us at 1-888-383-0553 or visit www.virtus.com for a copy of the Fund's prospectus. Read the prospectus carefully before you invest or send money.

IMPORTANT RISK CONSIDERATIONS

Exchange-Traded Funds (ETF): The value of an ETF may be more volatile than the underlying portfolio of securities it is designed to track. The costs to the fund of owning shares of an ETF may exceed the cost of investing directly in the underlying securities.

Master Limited Partnerships: Investments in MLPs may be adversely impacted by interest rates, tax law changes, regulation, or factors affecting underlying assets. **Energy Industry Concentration:** The portfolio's investments are concentrated in the energy industry and presents greater risks than if the portfolio was broadly diversified over numerous sectors of the economy.

Leverage: When a portfolio is leveraged, the value of its securities may be more volatile and all other risks may be compounded. **Options:** Selling call options may limit the opportunity to profit from the increase in price of the underlying asset. Selling put options risks loss if the option is exercised while the price of the underlying asset is rising. Buying options risks loss of the premium paid for those options. **Market Price/NAV:** At the time of purchase and/or sale, an investor's shares may have a market price that is above or below the fund's NAV, which may increase the investor's risk of loss. **Market Volatility:** The value of the securities in the portfolio may go up or down in response to the prospects of individual companies and/or general economic conditions. Local, regional, or global events such as war, terrorism, pandemic, or recession could impact the portfolio, including hampering the ability of the portfolio's manager(s) to invest its assets as intended. **Prospectus:** For additional information on risks, please see the fund's prospectus.

MLPs taxed as partnerships generally do not pay U.S. federal income tax at the partnership level, subject to the application of certain partnership audit rules. Rather, each partner is allocated a share of the MLP's income, gains, losses, deductions and expenses. A change in current tax law, or a change in the underlying business mix of a given MLP, could result in an MLP being treated as a corporation for U.S. federal income tax purposes, which would result in such MLP being required to pay U.S. federal income tax on its taxable income. The classification of an MLP as a corporation for U.S. federal income tax purposes would have the effect of reducing the amount of cash available for distribution by the MLP. Thus, if any of the MLPs owned by the Fund were treated as corporations for U.S. federal income tax purposes, it could result in a reduction in the value of your investment in the Fund and lower income.

The Fund is classified for federal income tax purposes as a taxable regular corporation or so-called Subchapter "C" corporation. As a "C" corporation, the Fund accrues deferred tax liability for its future tax liability associated with the capital appreciation of its investments and the distributions received by the Fund on equity securities of master limited partnerships considered to be a return of capital and for any net operating gains. The Fund's accrued deferred tax liability, if any, is reflected each day in the Fund's net asset value per share. The deferred income tax expense/(benefit) represents an estimate of the Fund's potential tax expense/(benefit) if it were to recognize the unrealized gains/ (losses) in the portfolio. An estimate of deferred income tax expense/(benefit) is dependent upon the Fund's net investment income/(loss) and realized and unrealized gains/(losses) on investments and such expenses may vary greatly from year to year and from day to day depending on the nature of the Fund's investments, the performance of those investments and general market conditions. Therefore, any estimate of deferred income tax expense/(benefit) cannot be reliably predicted from year to year.
