Consolidation

The Fund invests in commodity-related derivatives through its investment in the AlphaSimplex Managed Futures Strategy Cayman Fund Ltd., a wholly-owned subsidiary (the "Subsidiary"). Investments of the Subsidiary have been consolidated with those of the Fund for reporting purposes. As of September 30, 2022, the value of the Fund's investment in the Subsidiary was \$69,734,609, representing 1.99% of the Fund's net assets.

- (†) Registered investment companies are required to value portfolio investments using an unadjusted, readily available market quotation. The Fund obtains readily available market quotations from independent pricing services. Fund investments for which readily available market quotations are not available are priced at fair value pursuant to the Fund's Valuation Procedures. The Board of Trustees has approved a valuation designee who is subject to the Board's oversight.

Unadjusted readily available market quotations that are utilized for exchange traded equity securities (including shares of closed-end investment companies and exchange-traded funds) include the last sale price quoted on the exchange where the security is traded most extensively. Futures contracts are valued at the closing settlement price on the exchange on which the valuation designee believes that, over time, they are traded most extensively. Shares of open-end investment companies are valued at net asset value per share.

Exchange traded equity securities for which there is no reported sale during the day are fair valued at the closing bid quotation as reported by an independent pricing service. Unlisted equity securities (except unlisted preferred equity securities) are fair valued at the last sale price quoted in the market where they are traded most extensively or, if there is no reported sale during the day, the closing bid quotation as reported by an independent pricing service. If there is no last sale price or closing bid quotation available, unlisted equity securities will be fair valued using evaluated bids furnished by an independent pricing service, if available.

Debt securities and unlisted preferred equity securities are fair valued based on evaluated bids furnished to the Fund by an independent pricing service or bid prices obtained from broker-dealers. Broker-dealer bid prices may be used to fair value debt and unlisted equities where an independent pricing service is unable to price an investment or where an independent pricing service does not provide a reliable price for the investment. Forward foreign currency contracts are fair valued utilizing interpolated rates determined based on information provided by an independent pricing service.

The Fund may also fair value investments in other circumstances such as when extraordinary events occur after the close of a foreign market, but prior to the close of the New York Stock Exchange. This may include situations relating to a single issuer (such as a declaration of bankruptcy or a delisting of the issuer's security from the primary market on which it has traded) as well as events affecting the securities markets in general (such as market disruptions or closings and significant fluctuations in U.S. and/or foreign markets). When fair valuing a Fund's investments, the valuation designee may, among other things, use modeling tools or other processes that may take into account factors such as issuer specific information, or other related market activity and/or information that occurred after the close of the foreign market but before the time the Fund's net asset value ("NAV") is calculated. Fair valuation by the Fund's valuation designee may require subjective determinations about the value of the investment, and fair values used to determine a Fund's NAV may differ from quoted or published prices, or from prices that are used by others, for the same investments. In addition, the use of fair value pricing may not always result in adjustments to the prices of investments held by a Fund.

The books and records of the Fund are maintained in U.S. dollars. The values of securities, currencies and other assets and liabilities denominated in currencies other than U.S. dollars are translated into U.S. dollars based upon foreign exchange rates prevailing at the end of the period.

- (a) Variable rate security. Rate as of September 30, 2022 is disclosed.
- (b) Interest rate represents discount rate at time of purchase; not a coupon rate.
- (c) The Fund's investment in U.S. Government/Agency securities is comprised of various lots with differing discount rates. These separate investments, which have the same maturity date, have been aggregated for the purpose of presentation in the Portfolio of Investments.
- (d) Security (or a portion thereof) has been pledged as collateral for open derivative contracts.
- (e) A portion of the security is held by AlphaSimplex Managed Futures Strategy Cayman Fund Ltd., a wholly-owned subsidiary.
- (f) The Fund may enter into repurchase agreements, under the terms of a Master Repurchase Agreement, under which the Fund acquires securities as collateral and agrees to resell the securities at an agreed upon time and at an agreed upon price. It is the Fund's policy that the market value of the collateral for repurchase agreements be at least equal to 102% of the repurchase price, including interest. Certain repurchase agreements are tri-party arrangements whereby the collateral is held in a segregated account for the benefit of the Fund and on behalf of the counterparty. Repurchase agreements could involve certain risks in the event of default or insolvency of the counterparty, including possible delays or restrictions upon the Fund's ability to dispose of the underlying securities. As of September 30, 2022, the Fund had an investment in a repurchase agreement for which the value of the related collateral exceeded the value of the repurchase agreement.

Forward Foreign Currency Contracts

The Fund may enter into forward foreign currency contracts, including forward foreign cross currency contracts, to acquire exposure to foreign currencies or to hedge the Fund's investments against currency fluctuation. A contract can also be used to offset a previous contract. These contracts involve market risk in excess of the unrealized appreciation (depreciation). The U.S. dollar value of the currencies the Fund has committed to buy or sell represents the aggregate exposure to each currency the Fund has acquired or hedged through currency contracts outstanding at period end. Gains or losses are recorded for financial statement purposes as unrealized until settlement date. Contracts are traded over-the-counter directly with a counterparty. Risks may arise upon entering into these contracts from the potential inability of counterparties to meet the terms of their contracts and from unanticipated movements in the value of a foreign currency relative to the U.S. dollar. When the Fund enters into a forward foreign currency contract, it is required to pledge cash or high-quality securities equal to a percentage of the notional amount of the contract to the counterparty as an independent amount of collateral. The Fund may pledge additional collateral to the counterparty to the extent of mark-to-market losses on open contracts.

At September 30, 2022, the Fund had the following open forward foreign currency contracts:

Counterparty	Delivery Date	Currency Bought/Sold (B/S)	Units of Currency	In Exchange for	Notional Value	Unrealized Appreciation (Depreciation)

Futures Contracts

The Fund and the Subsidiary may enter into futures contracts. Futures contracts are agreements between two parties to buy and sell a particular commodity, instrument or index for a specified price on a specified future date.

When the Fund or the Subsidiary enters into a futures contract, it is required to deposit with (or for the benefit of) its broker an amount of cash or short-term high-quality securities as "initial margin." As the value of the contract changes, the value of the futures contract position increases or declines. Subsequent payments, known as "variation margin," are made or received by the Fund or the Subsidiary, depending on the price fluctuations in the fair value of the contract and the value of cash or securities on deposit with the broker. Realized gain or loss on a futures position is equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed, minus brokerage commissions. When the Fund or the Subsidiary enters into a futures contract certain risks may arise, such as illiquidity in the futures market, which may limit the Fund's or the Subsidiary's ability to close out a futures contract prior to settlement date, and unanticipated movements in the value of securities, commodities or interest rates.

Futures contracts are exchange-traded. Exchange-traded futures contracts are standardized and are settled through a clearing house with fulfillment supported by the credit of the exchange. Therefore, counterparty credit risks to the Fund and the Subsidiary are reduced; however, in the event that a counterparty enters into bankruptcy, the Fund's claim against initial/variation margin on deposit with the counterparty may be subject to terms of a final settlement in bankruptcy court.

At September 30, 2022, open long futures contracts were as follows:

Currency Futures	Expiration Date	Contracts	Notional Amount	Value	Unrealized Appreciation (Depreciation)

¹ Commodity futures are held by AlphaSimplex Managed Futures Strategy Cayman Fund Ltd., a wholly-owned subsidiary.

Fair Value Measurements

In accordance with accounting standards related to fair value measurements and disclosures, the Fund has categorized the inputs utilized in determining the value of the Fund's assets or liabilities. These inputs are summarized in the three broad levels listed below:

- Level 1 – quoted prices in active markets for identical assets or liabilities;
- Level 2 – prices determined using other significant inputs that are observable either directly, or indirectly through corroboration with observable market data (which could include quoted prices for similar assets or liabilities, interest rates, credit risk, etc.); and
- Level 3 – prices determined using significant unobservable inputs when quoted prices or observable inputs are unavailable such as when there is little or no market activity for an asset or liability (unobservable inputs reflect the Fund's own assumptions in determining the fair value of assets or liabilities and would be based on the best information available).

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The Fund's pricing policies have been approved by the Board of Trustees. Investments for which market quotations are readily available are categorized in Level 1. Other investments for which an independent pricing service is utilized are categorized in Level 2. Broker-dealer bid prices for which the Fund has knowledge of the inputs used by the broker-dealer are categorized in Level 2. All other investments, including broker-dealer bid prices for which the Fund does not have knowledge of the inputs used by the broker-dealer, as well as investments fair valued by the valuation designee, are categorized in Level 3. All Level 2 and 3 securities are defined as being fair valued.

Under certain conditions and based upon specific facts and circumstances, the Fund's valuation designee may determine that a fair valuation should be made for portfolio investment(s). These valuation designee fair valuations will be based upon a significant amount of Level 3 inputs.

The following is a summary of the inputs used to value the Fund's investments as of September 30, 2022, at value:

Asset Valuation Inputs

Description	Level 1	Level 2	Level 3	Total
Short-Term Investments*	\$ —	\$ 3,320,302,082	\$ —	\$ 3,320,302,082
Forward Foreign Currency Contracts (unrealized appreciation)	—	55,751,855	—	55,751,855
Futures Contracts (unrealized appreciation)	196,745,648	6,654,975	—	203,400,623
Total	\$ 196,745,648	\$ 3,382,708,912	\$ —	\$ 3,579,454,560

Liability Valuation Inputs

Description	Level 1	Level 2	Level 3	Total

Total	\$ (17,134,910)	\$ (2,041,922)	\$ —	\$ (19,176,832)

* Details of the major categories of the Fund's investments are reflected within the Consolidated Portfolio of Investments.

Derivatives

Derivative instruments are defined as financial instruments whose value and performance are based on the value and performance of an underlying asset, reference rate or index. Derivative instruments that the Fund used at period end include forward foreign currency contracts and futures contracts.

The Fund seeks to generate positive absolute returns over time. The Fund uses a set of proprietary quantitative models to identify price trends in equity, fixed income, currency and commodity instruments, and may have both short and long exposures within an asset class based on an analysis of asset price trends. Under normal market conditions, the Fund will make extensive use of derivative instruments, in particular futures and forward contracts, to capture the exposures suggested by its absolute return strategy while also adding value through volatility management. These market exposures, which are expected to change over time, may include exposures to global equity and fixed income securities, securities indices, currencies, commodities and other instruments. As of September 30, 2022, the Fund used long and short contracts on U.S. and foreign government bonds, short-term interest rates, foreign currencies, and commodities (through investments in the Subsidiary), and long contracts on U.S. and foreign equity market indices to capture the exposures suggested by the quantitative investment models.

The following is a summary of derivative instruments for the Fund, as of September 30, 2022:

<u>Assets</u>	Unrealized appreciation on forward foreign currency contracts	Unrealized appreciation on futures contracts
Over-the-counter asset derivatives		
Foreign exchange contracts	\$ 55,751,855	\$ —
Exchange-traded asset derivatives		
Interest rate contracts	\$ —	\$ 116,592,966
Foreign exchange contracts	—	40,192,143
Commodity contracts	—	12,023,713
Equity contracts	—	34,591,801
Total exchange-traded asset derivatives	\$ —	\$ 203,400,623
Total asset derivatives	<u>\$ 55,751,855</u>	<u>\$ 203,400,623</u>
<u>Liabilities</u>	Unrealized depreciation on forward foreign currency contracts	Unrealized depreciation on futures contracts
Over-the-counter liability derivatives		
Foreign exchange contracts	\$ (2,025,637)	\$ —
Exchange-traded liability derivatives		
Interest rate contracts	\$ —	\$ (2,522,264)
Commodity contracts	—	(14,612,646)
Equity contracts	—	(16,285)
Total exchange-traded liability derivatives	\$ —	\$ (17,151,195)
Total liability derivatives	<u>\$ (2,025,637)</u>	<u>\$ (17,151,195)</u>

The Fund's derivatives do not qualify for hedge accounting under authoritative guidance for derivative instruments. The Fund's investments in derivatives may represent an economic hedge; however, they are considered to be non-hedge transactions for the purpose of this disclosure.

Over-the-counter ("OTC") derivatives, including forward foreign currency contracts, are entered into pursuant to International Swaps and Derivatives Association, Inc. ("ISDA") agreements negotiated between the Fund and its counterparties. ISDA agreements typically contain, among other things, terms for the posting of collateral and master netting provisions in the event of a default or other termination event. Collateral is posted by the Fund or the counterparty to the extent of the net mark-to-market exposure to the other party of all open contracts under the agreement, subject to minimum transfer requirements. Master netting provisions allow the Fund and the counterparty, in the event of a default or other termination event, to offset amounts owed by each related to derivative contracts, including any posted collateral, to one net amount payable by either the Fund or the counterparty. The Fund's ISDA agreements typically contain provisions that allow a counterparty to terminate open contracts early if the NAV of the Fund declines beyond a certain threshold. As of September 30, 2022, the Fund did not hold any derivative positions subject to these provisions that are in a net liability position by counterparty.

Counterparty risk is managed based on policies and procedures established by the Fund's adviser. Such policies and procedures may include, but are not limited to, minimum counterparty credit rating requirements, monitoring of counterparty credit default swap spreads and posting of collateral. The Fund's risk of loss from counterparty credit risk on OTC derivatives is generally limited to the Fund's aggregated unrealized gains and the amount of any collateral pledged to the counterparty, which may be offset by any collateral posted to the Fund by the counterparty. ISDA master agreements can help to manage counterparty risk by specifying collateral posting arrangements at pre-arranged exposure levels. Under these ISDA agreements, collateral is routinely transferred if the total net exposure in respect of certain transactions, net of existing collateral already in place, exceeds a specified amount (typically \$250,000, depending on the counterparty). With exchange-traded derivatives, there is minimal counterparty credit risk to the Fund because the exchange's clearing house, as counterparty to these instruments, stands between the buyer and the seller of the contract. Credit risk still exists in exchange-traded derivatives with respect to initial and variation margin that is held in a broker's customer accounts. While brokers typically are required to segregate customer margin for exchange-traded derivatives from their own assets, in the event that a broker becomes insolvent or goes into bankruptcy and at that time there is a shortfall in the aggregate amount of margin held by the broker for all its customers, U.S. bankruptcy laws will typically allocate that shortfall on a *pro rata* basis across all of the broker's customers, potentially resulting in losses to the Fund. The following table shows (i) the maximum amount of loss

due to credit risk that, based on the gross fair value of the financial instrument, the Fund would incur if parties (including OTC derivative counterparties and brokers holding margin for exchange-traded derivatives) to the relevant financial instruments failed completely to perform according to the terms of the contracts and the collateral or other security, if any, for the amount due proved to be of no value to the Fund, and (ii) the amount of loss that the Fund would incur after taking into account master netting provisions pursuant to ISDA agreements, as of September 30, 2022:

	Maximum Amount of Loss - Gross	Maximum Amount of Loss - Net
Over-the-counter counterparty credit risk		
Forward foreign currency contracts	\$ 55,751,855	\$ 53,726,218
Collateral pledged to UBS AG	20,424,222	20,424,222
Total over-the-counter counterparty credit risk	<u>76,176,077</u>	<u>74,150,440</u>
Exchange-traded counterparty credit risk		
Futures contracts	203,400,623	203,400,623
Margin with brokers	161,514,149	161,514,149
Total exchange-traded counterparty credit risk	<u>364,914,772</u>	<u>364,914,772</u>
Total counterparty credit risk	<u>\$ 441,090,849</u>	<u>\$ 439,065,212</u>

Investment Summary at September 30, 2022 (Unaudited)

Certificates of Deposit	48.6%
Treasuries	43.1
Repurchase Agreements	<u>3.1</u>
Total Investments	94.8
Other assets less liabilities (including forward foreign currency and futures contracts)	<u>5.2</u>
Net Assets	<u>100.0%</u>

Net Exposures by Asset Class as a Percentage of Net Assets at September 30, 2022¹

Equity	(14.7)%
Fixed Income	(110.2)
Short-Term Interest Rate	(111.8)
Commodity	(4.4)
Currency	(55.0)

¹ The Fund gains its investment exposures primarily through the use of futures contracts and forward contracts and may have net exposure that is materially less than or greater than its net asset value. Portfolio exposures presented above are intended to illustrate the Fund's exposure to certain asset classes. The portfolio exposure percentage represents the notional contract value in U.S. dollars of the Fund's futures and/or forward positions divided by the Fund's total net assets. Notional contract values represent the aggregate exposure that a futures or forward currency contract provides to the underlying reference asset or currency, respectively.
