- (c) Estimated for current fiscal year, as annualized.
- (d) The fund's investment adviser has contractually agreed to limit the fund's total operating expenses (excluding certain expenses, such as front-end or contingent deferred sales charges, taxes, leverage expenses, interest, brokerage commissions, expenses incurred in connection with any merger or reorganization, unusual or infrequently occurring expenses (such as litigation), acquired fund fees and expenses, and dividend expenses, if any) so that such expenses do not exceed 1.40% for Class A Shares, 2.15% for Class C Shares, 1.15% for Class I Shares, 0.95% for Class R6 Shares and 1.40% for Class T Shares through January 31, 2019. Under certain conditions, the adviser may recapture operating expenses reimbursed under these arrangements for a period of three years after the date on which it was incurred or waived by Virtus.

Example

This example is intended to help you compare the cost of investing in the fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year, that the fund's operating expenses remain the same and that the expense reimbursement arrangement remains in place for the contractual period. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	Share Status	1 Year	3 Years	5 Years	10 Years
Class A	Sold or Held	\$709	\$1,202	\$1,720	\$3,135
Class C	Sold	\$318	\$698	\$1,204	\$2,596
	Held	\$218	\$698	\$1,204	\$2,596
Class I	Sold or Held	\$117	\$385	\$672	\$1,492
Class R6	Sold or Held	\$97	\$337	\$596	\$1,337
Class T	Sold or Held	\$389	\$899	\$1,435	\$2,898

Portfolio Turnover

The fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the fund’s performance. During the most recent fiscal year, the fund’s portfolio turnover rate was 36% of the average value of its portfolio.

Investments, Risks and Performance

Principal Investment Strategies

The fund provides global exposure to the real estate securities market, focusing exclusively on companies with a rental business profile. Rental companies derive 70% or more of total revenue from rental income and are most similar in business profile to U.S. real estate investment trusts (“REITs”).

Under normal circumstances, the fund invests at least 80% of its assets in equity securities issued by U.S. and non-U.S. companies of any capitalization that are principally engaged in the real estate industry, including common stock, preferred stock and other equity securities issued by real estate companies, such as REITs and similar REIT-like entities. The fund, under normal market conditions, will hold at least 40% of its assets in non-U.S. issuers, unless market conditions outside of the U.S. are deemed less favorable by the portfolio manager, in which case the fund would invest at least 30% of its assets in securities of non-U.S. issuers. Additionally, the fund normally invests in real estate-related securities of issuers in developed countries; however it may invest up to 20% of its assets in issuers incorporated in emerging market countries. The fund concentrates its assets in the real estate industry.

Principal Risks

The fund may not achieve its objective(s), and it is not intended to be a complete investment program. The value of the fund’s investments that supports your share value may decrease. If between the time you purchase shares and the time you sell shares the value of the fund’s investments decreases, you will lose money. Investment values can decrease for a number of reasons. Conditions affecting the overall economy, specific industries or companies in which the fund invests can be worse than expected, and investments may fail to perform as the subadviser expects. As a result, the value of your shares may decrease. Purchase and redemption activities by fund shareholders may impact the management of the fund and its ability to achieve its investment objective(s). The redemption by one or more large shareholders or groups of shareholders of their holdings in the fund could have an adverse impact on the remaining shareholders in the fund including by accelerating the realization of capital gains and increasing the fund’s transaction costs. The principal risks of investing in the fund are:

- > **Emerging Market Investing Risk.** The risk that prices of emerging markets securities will be more volatile, or will be more greatly affected by negative conditions, than those of their counterparts in more established foreign markets.
- > **Equity Real Estate Investment Trust (REIT) Securities Risk.** The risk that, in addition to the risks associated with investing in the real estate industry, the value of the fund’s shares will be negatively affected by factors specific to investing through a pooled vehicle, such as through poor management of the REIT or REIT-like entity, concentration risk, or other risks typically associated with investing in small or medium market capitalization companies.
- > **Equity Securities Risk.** The risk that events negatively affecting issuers, industries or financial markets in which the fund invests will impact the value of the stocks held by the fund and, thus, the value of the fund’s shares over short or extended periods. Investments in a particular style or in small or medium-sized companies may enhance that risk.
- > **Foreign Investing Risk.** The risk that the prices of foreign securities in the fund’s portfolio will be more volatile than those of domestic securities, or will be negatively affected by currency fluctuations, less regulated or liquid securities markets, or economic, political or other developments.
- > **Geographic Concentration Risk.** The risk that events negatively affecting the geographic location where the fund focuses its investments will cause the value of the fund’s shares to decrease, perhaps significantly.
- > **Industry/Sector Concentration Risk.** The risk that events negatively affecting real estate securities will cause the value of the fund’s shares to decrease, perhaps significantly. Since the fund concentrates its assets in real estate related securities, the fund is more vulnerable to conditions that negatively affect real estate related securities as compared to a fund that does not concentrate holdings in such securities.
- > **Market Volatility Risk.** The risk that the value of the securities in which the fund invests may go up or down in response to the prospects of individual issuers and/or general economic conditions. Such price changes may be temporary or may last for extended periods.
