### Investment Philosophy

We believe that purchasing high-quality businesses with competitive protections at attractive valuations will achieve excess returns over a complete market cycle

### Investment Objectives

- To achieve a return meaningfully above that of the Russell Midcap® Index
- To achieve this return objective with a portfolio that exhibits lower overall risk characteristics

### Competitive Protection

- Brand/Reputation
- Network Effect
- Scale/Cost Advantage
- Benchmarking Standard
- High Customer Switching Costs
- Barriers to Entry/Unique Asset
- Low Obsolescence Risk

### Owner-Oriented Management

- Cultivates Competitive Advantage
- Rational Capital Allocation
- Considers Stakeholder Interests

## KAR HIGH QUALITY BUSINESS

- Protect and Grow Market Share
- High Economic Return on Capital
- Business Returns → Shareholder Returns

## Examples of High-Quality Business Models

*The securities presented on this page are chosen based upon objective, non-performance based criteria and are current holdings of the strategy. Companies are chosen to exemplify diversification. We typically select companies that operate in large, vast industries, but have overwhelming market share for their particular niches. All information is provided for informational purposes only and should not be deemed as a recommendation to purchase the securities mentioned. It should not be assumed that securities recommended in the future will be profitable. A complete list of portfolio holdings and specific security transactions for the preceding 12 months is available upon request. Holdings are subject to change. Individual investors' holdings may differ slightly.*

# Investment Process Overview

## A Business Analyst Approach

---

Kayne Anderson Rudnick  
Investment Management

## We source our investment universe in a number of ways

### Quantitative Screens

- High return on capital over a full economic cycle
- Long and resilient earnings history
- High return on net operating assets
- Minimal debt

### Other Resources

- Research on existing portfolio holdings
- Meetings with companies
- Industry reviews
- Investment conferences
- Third-party research

Research analysts and portfolio managers work together to develop in-depth business knowledge

#### Qualitative Analysis

**Purpose:** Determine if competitive advantage exists and evaluate its strength.

- Review regulatory filings, company materials, industry data, and third party research
- Conduct comprehensive interviews with management; contact other relevant parties
- Understand basis of competition within industry
- Assess competitive threats and obsolescence risk: What protects the business?

#### Financial Analysis

**Purpose:** Evaluate source, level, and sustainability of economic profitability.

- Seek: High and resilient return on capital
- Seek: Persistent earning power
- Seek: Abundant discretionary cash flow
- Seek: Under-levered balance sheet
- Assess management's capital allocation practices; favor high insider ownership

#### Valuation Analysis

**Purpose:** Estimate total return over several year period; compare to other opportunities considering varying levels of certainty

- Consider economic earning power in relation to enterprise value
- In our view, mispricing can be created by: Underfollowed company, investors' over-reaction to short-term challenges, improved competitive position not yet recognized

### Investment Guidelines

<b>Position Weights</b>	<ul style="list-style-type: none"><li>• 25-35 holdings</li><li>• Maximum initial position size is 5% (at cost)</li><li>• Maximum position size is 10% (at market)</li></ul>
<b>Sector Tolerances</b>	<ul style="list-style-type: none"><li>• Seek broad diversification, but no sector constraints</li></ul>
<b>Non-U.S. Holdings</b>	<ul style="list-style-type: none"><li>• Up to 20%</li></ul>
<b>Holding Period</b>	<ul style="list-style-type: none"><li>• Typically 3-to-5 years, but is often longer</li><li>• Portfolio turnover typically 25% to 35%</li></ul>
<b>Cash Levels</b>	<ul style="list-style-type: none"><li>• Typically will not exceed 10% once a portfolio is fully invested; review by CIO triggered if over 10%</li></ul>

### Sell Discipline

<b>Extended Valuation</b>	<ul style="list-style-type: none"><li>• Significant premium to intrinsic value</li><li>• Expected annual return insufficient</li></ul>
<b>Portfolio Upgrade</b>	<ul style="list-style-type: none"><li>• Better business</li><li>• Better price</li></ul>
<b>Acquisition Activity</b>	<ul style="list-style-type: none"><li>• Our holding acquired at an attractive premium</li><li>• Our holding acquires a company diminishing its business or value</li></ul>
<b>Negative Company or Industry Changes</b>	<ul style="list-style-type: none"><li>• Position review research report written for any of the following conditions:<ul style="list-style-type: none"><li>- Stock price declines 20% or more in a short time period absent a broad market decline</li><li>- Validity deteriorates for one or more of the reasons for purchase</li><li>- Credit-quality profile deteriorates</li></ul></li><li>• Quality parameters reviewed by the Chief Investment Officer with the Portfolio Managers</li></ul>

# 4 | Investment Process

## Risk Management & Portfolio Monitoring

Kayne Anderson Rudnick  
Investment Management

### Risk Management

<b>Investment Philosophy</b>	<ul style="list-style-type: none"> <li>• Focus on “high-quality” companies</li> <li>• Company’s “business risk” is primary risk control factor</li> </ul>
<b>Portfolio Level Controls</b>	<ul style="list-style-type: none"> <li>• Broad sector diversification</li> <li>• Individual security weights initiated at 2% to 5% of portfolio</li> </ul>
<b>Position Reviews</b>	<ul style="list-style-type: none"> <li>• “Position Review” report when a portfolio holding declines 20% absent a broad market decline</li> <li>• Re-validate reasons for original purchase or sell position</li> </ul>
<b>Trading Guidelines</b>	<ul style="list-style-type: none"> <li>• Guidelines provided by Portfolio Managers when entering and exiting portfolio holdings</li> <li>• Relative benchmarks and transaction costs are monitored in real time to ensure investments are implemented both efficiently and effectively</li> </ul>

### Portfolio Monitoring

<b>Risk and Compliance Committee</b>	<ul style="list-style-type: none"> <li>• Meets quarterly to independently evaluate portfolio risk exposures with findings presented to the Chief Investment Officer</li> </ul>
<b>CIO/PM Meetings</b>	<ul style="list-style-type: none"> <li>• Provides a forum for the Chief Investment Officer and the Portfolio Managers to review, discuss, and explain each strategy’s portfolio positioning and its performance</li> </ul>
<b>Research Meetings</b>	<ul style="list-style-type: none"> <li>• Provides a forum to discuss and evaluate portfolio holdings and overall industry trends</li> </ul>
<b>Performance Analytics and Portfolio Attribution</b>	<ul style="list-style-type: none"> <li>• Allows Portfolio Managers to quantify investment decisions and understand drivers of return and risk characteristics</li> </ul>

# Portfolio Characteristics

Higher Quality, Stronger, More Consistent Growth, & Better Value  
Mid Cap Core Portfolio – As of June 30, 2021

Annualized Standard Deviation—Since Inception*	15.6%	19.7%

In a market of average businesses, we seek to own protected proprietary businesses that generate exceptional returns on shareholders' capital without employing significant debt.

In a market of cyclical businesses requiring growth capital from fickle markets, we seek to own companies producing self-funded strong, consistent growth sustainable into the future.

And we have historically been able to achieve this high quality and strong growth at a comparable valuation to the market.

\*January 1, 2000

†Free cash flow data is as of March 31, 2021. Prices are as of June 30, 2021. Excludes financials.

# Summary of Key Differentiators

## We Manage Risk and Generate Returns Differently

Kayne Anderson Rudnick  
Investment Management

	CLASSIC APPROACH*	KAR APPROACH
RISK	<p>stock portfolio <b>75</b></p> <p>1% to 2% positions</p> <p>No stock can help or hurt more than 2%</p>	<p>stock portfolio <b>25-35</b></p> <p>3% to 10% positions in high-quality companies</p> <ul style="list-style-type: none"> <li>Minimal business risk</li> <li>Minimal balance sheet risk</li> <li>Minimal profit risk</li> </ul>
	RETURNS	Average companies producing average returns on capital
Buying cheap and selling dear required for above-average portfolio returns		Buy at attractive price and let exceptional returns on capital drive exceptional growth and income over extended period of time
6 months average holding period		36 to 60 months average holding period, but often longer
High frictional costs due to RAPID trading		Low frictional costs due to LESS trading
Poor tax efficiency due to short holding periods		Inherent tax efficiency

\* The Classic Approach is based upon competitors with 75 holdings or more. The observations are generalized and do not represent any specific competitor's investment approach.

# Peer Comparison

## Mid Cap Core Portfolio

### Ten Years Ending June 30, 2021

Kayne Anderson Rudnick  
Investment Management

● KAR Mid Cap Core    ● Russell Midcap® Index    ■ Mid Cap Core Universe

*This material is deemed supplemental and complements the performance and disclosure at the end of this presentation.*

*The Mid Cap Core Universe includes all managers categorized in the mid cap core asset class by eVestment.*

*Returns for the Kayne Anderson Rudnick composite are preliminary and are gross of fees unless otherwise specified. For further details on the composite, please see the disclosure statement in this presentation. Data is obtained from FactSet Research Systems and is assumed to be reliable. **Past performance is no guarantee of future results.** Management fees are described in Form ADV Part 2, which is available upon request. Gross annual returns will be reduced by investment management fees and other expenses that may be incurred in the management of the account. Net annual returns have been calculated after the deduction of an assumed maximum annual fee of 3%. The effect of fees on performance would grow at a compounded rate. Over a five-year period, if a \$100,000 portfolio had an annual return of 10%, it would grow to \$161,051. The net compounded effect of a 3% annual investment management fee would total \$20,796 and result in a portfolio value of \$140,255.*

Numbers may not always add up due to rounding.*

**Past performance is no guarantee of future results.**

**IMPORTANT RISK CONSIDERATIONS: Equity Securities:** The market price of equity securities may be adversely affected by financial market, industry, or issuer-specific events. Focus on a particular style or on small or medium-sized companies may enhance that risk.

**Limited Number of Investments:** Because the portfolio has a limited number of securities, it may be more susceptible to factors adversely affecting its securities than a portfolio with a greater number of securities. **Market Volatility:** Local, regional, or global events such as war, acts of terrorism, the speed of infectious illness or other public health issues, recessions, or other events could have a significant impact on the portfolio and its investments, including hampering the ability of the portfolio manager(s) to invest the portfolio's assets as intended.

# Biographies

## Mid Cap Core Team

Kayne Anderson Rudnick  
Investment Management

### **Douglas S. Foreman, CFA**

*Chief Investment Officer and Member of the Executive Management Committee*

Mr. Foreman has approximately 35 years of investment experience. Before joining Kayne Anderson Rudnick in 2011, Mr. Foreman was Director of Equities at HighMark Capital Management and before that he was Group Managing Director and Chief Investment Officer of U.S. equities at Trust Company of the West (TCW). He earned a B.S. in Marine Engineering from The U.S. Naval Academy and an M.B.A. from Harvard University. Mr. Foreman is a Chartered Financial Analyst charterholder.

The Russell Midcap® Index and Russell 1000® Index are trademarks/service marks of Frank Russell Company. Russell® is a trademark of Frank Russell Company.

KAR (as defined below) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS® standards. KAR has been independently verified for the period from January 1, 1999 through December 31, 2019.

Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS® standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS® standards. The Mid Cap Core Wrap Composite has been examined for the period from January 1, 2000 through December 31, 2019. The verification and performance examination reports are available upon request.

Kayne Anderson Rudnick Investment Management, LLC ("KAR"), a wholly owned subsidiary of Virtus Investment Partners, Inc., is a registered investment advisor under the Investment Advisers Act of 1940. Registration of an Investment Advisor does not imply any level of skill or training. KAR manages a variety of equity and fixed-income strategies focusing exclusively on securities the firm defines as high quality.

The composite includes all discretionary Mid Cap Core Wrap Portfolios. Mid Cap Core Wrap Portfolios are invested in equity securities with market capitalizations consistent with the Russell Midcap® Index, that have market control, rising free cash flow, shareholder-oriented management, strong consistent profit growth and low-debt balance sheets. For comparison purposes, the composite is measured against the Russell Midcap® Index. The Russell Midcap® Index is a market capitalization-weighted index of the 800 smallest companies in the Russell 1000® Index, which comprises the 1,000 largest U.S. companies. The index is calculated on a total-return basis with dividends reinvested. Benchmark returns are not covered by the report of the independent verifiers. The composite was created in July 2003. A list of composite descriptions and policies for valuing portfolios, calculating performance and preparing compliant presentations are available upon request.

Beginning on January 1, 2006, sub-advisory wrap fee portfolios are also included in composite results. Each sub-advisory relationship is included in the composite as one account. Prior to January 1, 2011, accounts that experienced a significant cash flow, defined as aggregate flows that exceeded 25% of the account's beginning of period market value, were temporarily removed from the composite. Prior to December 31, 2010, the composite minimum was \$100,000.

The standard wrap fee schedule in effect is 3.00% on total assets. Actual management fees charged may vary depending on applicable fee schedules and portfolio size, among other things. Additional information may be found in Part IIA of Form ADV, which is available on request. The performance information is supplied for reference. Past performance is no guarantee of future results. Results will vary among accounts. The U.S. dollar is the currency used to express performance. Performance results include the reinvestment of all income. Pure gross returns do not reflect the deduction of any expenses, including trading costs. Beginning January 1, 2006, net annual returns are calculated using actual fees incurred. If no fee data is provided by wrap sponsors, the maximum annual wrap fee of 3% is used to calculate net of fee performance. Beginning January 1, 2016, net annual returns are calculated by deducting 1/12th of an assumed maximum annual wrap fee of 3% on a monthly basis. Wrap fees include all charges for trading costs, portfolio management, custody and other administrative expenses.

Internal dispersion is calculated using the asset-weighted standard deviation of annual gross returns for accounts in the composite for the entire year. For those years when less than five accounts were included for the full year, no dispersion measure is presented. The three-year annualized ex-post standard deviation, which measures the variability of the composite (using pure gross returns) and the benchmark for the 36-month period, is presented starting 2012 because prior to January 1, 2010, the composite return was calculated quarterly and 36 monthly returns are not available.
