<sup>†</sup>Represents years of industry experience.

### Investment Philosophy

We believe that purchasing high-quality businesses with competitive protections at attractive valuations will achieve excess returns over a complete market cycle

### Investment Objectives

- To achieve a return meaningfully above that of the Russell 2000® Value Index
- To achieve this return objective with a portfolio that exhibits lower overall risk characteristics\*

## Competitive Protection

- Brand/Reputation
- Network Effect
- Scale/Cost Advantage
- Benchmarking Standard
- High Customer Switching Costs
- Barriers to Entry/Unique Asset
- Low Obsolescence Risk

## Owner-Oriented Management

- Cultivates Competitive Advantage
- Rational Capital Allocation
- Considers Stakeholder Interests

## HIGH QUALITY BUSINESS

- Protect and Grow Market Share
- High Economic Return on Capital
- Business Returns → Shareholder Returns

## Examples of High-Quality Business Models

*The securities presented on this page are chosen based upon objective, non-performance based criteria and are current holdings of the strategy. Companies are chosen to exemplify diversification. We typically select companies that operate in large, vast industries, but have overwhelming market share for their particular niches. All information is provided for informational purposes only and should not be deemed as a recommendation to purchase the securities mentioned. It should not be assumed that securities recommended in the future will be profitable. Holdings are subject to change. Individual investors' holdings may differ slightly.*

# Investment Process Overview

## A Business Analyst Approach

---

Kayne Anderson Rudnick  
Investment Management

## We source our investment universe in a number of ways

### Quantitative Screens

- High return on capital over a full economic cycle
- Long and resilient earnings history
- High return on net operating assets
- Minimal debt

### Other Resources

- Research on existing portfolio holdings
- Meetings with companies
- Industry reviews
- Investment conferences
- Third-party research

## 2 | Investment Process

### Intensive Fundamental Research

Kayne Anderson Rudnick  
Investment Management

Research analysts and portfolio managers work together to develop in-depth business knowledge

#### Qualitative Analysis

**Purpose:** Determine if competitive advantage exists and evaluate its strength.

- Review regulatory filings, company materials, industry data, and third party research
- Conduct comprehensive interviews with management; contact other relevant parties
- Understand basis of competition within industry
- Assess competitive threats and obsolescence risk: What protects the business?

#### Financial Analysis

**Purpose:** Evaluate source, level, and sustainability of economic profitability.

- Seek: High and resilient return on capital
- Seek: Persistent earning power
- Seek: Abundant discretionary cash flow
- Seek: Under-levered balance sheet
- Assess management's capital allocation practices; favor high insider ownership

#### Valuation Analysis

**Purpose:** Estimate total return over several year period; compare to other opportunities considering varying levels of certainty

- Consider economic earning power in relation to enterprise value
- In our view, mispricing can be created by: Underfollowed company, investors' over-reaction to short-term challenges, improved competitive position not yet recognized

#### ESG Analysis\*

**Purpose:** Evaluate financially material environmental, social, and/or governance factors to determine if they may impact an investment outcome

- Utilize a proprietary ratings framework identifying five key issues for each sector
- ESG research integrated into research process by each member of the investment team
- Ratings updated annually

\*Where material to a particular investment opportunity and consistent with KAR's investment strategy, KAR seeks to consider environmental, social, and/or governance ("ESG") factors that KAR believes may influence risks and rewards as an element of its investment research and decision-making processes. However, such ESG factors are not by themselves determinative to an investment decision.

### Investment Guidelines

|                          |   |
|--------------------------|---|
| <b>Position Weights</b>  | <ul style="list-style-type: none"><li>• 20-35 holdings</li><li>• Maximum initial position size is 5% (at cost)</li><li>• Maximum position size is 10% (at market)</li></ul> |
| <b>Sector Tolerances</b> | <ul style="list-style-type: none"><li>• Seek broad diversification, but no sector constraints</li></ul>   |
| <b>Non-U.S. Holdings</b> | <ul style="list-style-type: none"><li>• Up to 20%</li></ul>   |
| <b>Holding Period</b>    | <ul style="list-style-type: none"><li>• Typically 3-to-5 years, but is often longer</li><li>• Portfolio turnover typically 25% to 35%</li></ul>                             |
| <b>Cash Levels</b>       | <ul style="list-style-type: none"><li>• Typically will not exceed 10% once a portfolio is fully invested; review by CIO triggered if over 10%</li></ul>                     |

### Sell Discipline

|   |  |
|---|--|
| <b>Extended Valuation</b>                   | <ul style="list-style-type: none"> <li>• Significant premium to intrinsic value</li> <li>• Expected annual return insufficient</li> </ul>  |
| <b>Portfolio Upgrade</b>                    | <ul style="list-style-type: none"> <li>• Better business</li> <li>• Better price</li> </ul>  |
| <b>Acquisition Activity</b>                 | <ul style="list-style-type: none"> <li>• Our holding acquired at an attractive premium</li> <li>• Our holding acquires a company diminishing its business or value</li> </ul>  |
| <b>Negative Company or Industry Changes</b> | <ul style="list-style-type: none"> <li>• Position review research report written for any of the following conditions:             <ul style="list-style-type: none"> <li>- Stock price declines 20% or more in a short time period absent a broad market decline</li> <li>- Validity deteriorates for one or more of the reasons for purchase</li> <li>- Credit-quality profile deteriorates</li> </ul> </li> <li>• Quality parameters reviewed by the Chief Investment Officer with the Portfolio Managers</li> </ul> |

# 4 | Investment Process

## Risk Management–Investment Oversight

Kayne Anderson Rudnick  
Investment Management

### Our risk management begins with our high-quality investment approach

#### Risk Management

|                                 |   |
|---------------------------------|---|
| <b>Investment Philosophy</b>    | <ul style="list-style-type: none"><li>• Focus on “high-quality” companies</li><li>• Company’s “business risk” is primary risk control factor</li></ul>  |
| <b>Portfolio Level Controls</b> | <ul style="list-style-type: none"><li>• Broad sector diversification</li><li>• Individual security weights initiated at 1% to 5% of portfolio</li></ul>   |
| <b>Position Reviews</b>         | <ul style="list-style-type: none"><li>• “Position Review” report when a portfolio holding declines 20% absent a broad market decline</li><li>• Re-validate reasons for original purchase or sell position</li></ul> |

#### Portfolio Monitoring

|                          |  |
|--------------------------|--|
| <b>CIO/PM Meetings</b>   | <ul style="list-style-type: none"><li>• Chief Investment Officer and the Portfolio Managers meet to review, discuss, and explain each strategy’s portfolio positioning and its performance</li></ul> |
| <b>Research Meetings</b> | <ul style="list-style-type: none"><li>• Formal meetings to discuss and evaluate portfolio holdings and overall industry trends</li></ul>   |

# 4 | Investment Process

## Risk Management—Independent Oversight

Our risk management process also includes independent oversight to ensure that business and investment risk is thoroughly evaluated from multiple viewpoints

|  |   |
|--|---|
| <b>Risk and Compliance Committee</b>   | Oversees all business and regulatory risk   |
| <b>Portfolio Oversight Committee</b><br>(Reports to Risk and Compliance Committee) | Oversees all investment and strategy risk   |
| <b>Performance, Analytics &amp; Risk Department</b>                                | Produces all reporting and quantitative measures of risk  |
| <b>Risk Management Systems</b>   | <ul style="list-style-type: none"><li>• FactSet Attribution and Performance Analytics</li><li>• MSCI Barra Risk Model</li><li>• ICE Liquidity Risk Management</li></ul> |

# Portfolio Characteristics

## Small Cap Quality Value Portfolio

### As of December 31, 2022

| P/E Ratio—Trailing 12 Months                                 | 19.9 x                      | 18.8 x                    |
| Dividend Yield   | 1.5%                        | 2.2%                      |
| Free Cash Flow Yield†  | 1.7%                        | 0.7%                      |
| <b>Market Characteristics</b>                                |                             |                           |
| \$ Weighted Average Market Cap—3-Year Average                | \$4.9 B                     | \$2.5 B                   |
| Largest Market Cap—3-Year Average                            | \$13.0 B                    | \$13.3 B                  |
| Annualized Standard Deviation—Since Inception‡ (Net of Fees) | 19.5%                       | 21.9%                     |

In a market of average businesses, we seek to own protected proprietary businesses that generate exceptional returns on shareholders' capital without employing significant debt.

In a market of cyclical businesses requiring growth capital from fickle markets, we seek to own companies producing self-funded strong, consistent growth sustainable into the future.

\*KAR utilizes the interquartile method when calculating TD/EBITDA. The interquartile method excludes outliers from an aggregate statistic such as weighted average. The interquartile method does not assume that data from the top or bottom of the distribution are outliers--only the extreme ends are excluded--and that it can be applied consistently as a quantitative method for most fundamental characteristics.

†Free cash flow data is as of September 30, 2022. Prices are as of December 31, 2022. Excludes financials.

‡ Actual inception date is June 1, 1998. July 1, 1998 is used for calculation purposes of quarterly information.

**This material is deemed supplemental and complements the performance and disclosure at the end of this presentation.**

Data is obtained from FactSet Research Systems and BNY Mellon and is assumed to be reliable. The statistics presented above are based on a representative portfolio. Actual results may vary. Other principal consultant firms may use different algorithms to calculate selected statistics. Estimates are based on certain assumptions and historical information. **Past performance is no guarantee of future results.** Returns could be reduced, or losses incurred, due to currency fluctuations.

# Top Ten Holdings

## Small Cap Quality Value Portfolio

\*June 1, 1998

†Performance calculations are for the seven months ended December 31, 1998.

**This material is deemed supplemental and complements the performance and disclosure at the end of this presentation.**

Returns for the Kayne Anderson Rudnick composite are preliminary. All periods less than one year are total returns and are not annualized. For further details on the composite, please see the disclosure statement in this presentation. Data is obtained from FactSet Research Systems and is assumed to be reliable. Numbers may not always add up due to rounding.

**Past performance is no guarantee of future results.** Returns could be reduced, or losses incurred, due to currency fluctuations.

**IMPORTANT RISK CONSIDERATIONS: Equity Securities:** The market price of equity securities may be adversely affected by financial market, industry, or issuer-specific events. Focus on a particular style or on small or medium-sized companies may enhance that risk. **Limited Number of Investments:** Because the portfolio has a limited number of securities, it may be more susceptible to factors adversely affecting its securities than a portfolio with a greater number of securities.

**Market Volatility:** Local, regional, or global events such as war, acts of terrorism, the speed of infectious illness or other public health issues, recessions, or other events could have a significant impact on the portfolio and its investments, including hampering the ability of the portfolio manager(s) to invest the portfolio's assets as intended.

  Small Cap Value Universe

\*Actual inception date is June 1, 1998. July 1, 1998 is used for calculation purposes of quarterly information.

**This material is deemed supplemental and complements the performance and disclosure at the end of this presentation.**

The eVestment Small Cap Value Universe includes 80 managers categorized in the small cap value asset class by eVestment. KAR does not pay any fees to be included in the eVestment Small Cap Value Universe or for the ranking itself. KAR does pay fees for the use of certain products and services provided by eVestment. eVestment rankings are based on gross of fee returns. Gross of fee returns will be reduced by investment managements fees and other expenses that may be incurred in the management of the account. Management fees are described in KAR's Form ADV Part 2A, which is available upon request and can also be found at <https://kayne.com/wp-content/uploads/ADV-Part-2A.pdf>. Returns could be reduced or losses incurred due to currency fluctuations. **Past performance is no guarantee of future results.**

# Summary of Key Differentiators

## We Seek to Manage Risk and Generate Returns Differently

Kayne Anderson Rudnick  
Investment Management

|         | CLASSIC APPROACH*  | KAR APPROACH†   |
|---------|--|---|
| RISK    | <p>stock portfolio<br/><b>75</b></p> <p>1% to 2% positions</p>                       | <p>stock portfolio<br/><b>20-35</b></p> <p>3% to 10% positions in high-quality companies</p> <ul style="list-style-type: none"> <li>Minimal business risk</li> <li>Minimal balance sheet risk</li> <li>Minimal profit risk</li> </ul> |
| RETURNS | Typically average companies producing average returns on capital                     | We strive to find companies that produce strong returns on capital with a sustainable competitive advantage   |
|         | Typically buying cheap and selling dear required for above-average portfolio returns | We strive to buy at attractive prices and let strong returns on capital drive growth and income over extended period of time  |
|         | 6 months average holding period  | 36 to 60 months average holding period, but often longer  |
|         | High frictional costs due to rapid trading   | Low frictional costs due to less trading  |
|         | Poor tax efficiency due to short holding periods                                     | Inherent tax efficiency   |

\* The Classic Approach is based upon competitors with 75 holdings or more. The observations are generalized and do not represent any specific competitor's investment approach.

† There is no guarantee that the portfolio will meet its objective.

**Past performance is no guarantee of future results.** Returns could be reduced, or losses incurred, due to currency fluctuations.

- **ESG Principles & Process**
- **Biographies**
- **Disclosure**

### Policy

We believe that responsible investment practices which incorporate the consideration of environmental, social, and governance (ESG) topics add sustainable value for our investors and are consistent with our fiduciary duty.

### Philosophy

Our investment strategy is driven by the belief that:

- Long-term sustainable and successful businesses incorporate and manage all relevant factors whether they be economic, financial, operational, environmental, social, or governance related.
- Where material to a particular investment opportunity and consistent with a strategy's investment goals and objectives, we seek to consider environmental, social, and/or governance factors that we believe may influence risks and rewards as an element of our investment research and decision-making processes.
- However, such environmental, social, and/or governance factors are not by themselves determinative to an investment decision.

### Experience

Natural alignment with our quality-focused investment approach

PRI Signatory  
Since 2019

\$2.7 billion in mandates with client specific ESG objectives\*

\*As of December 31, 2022

Where material to a particular investment opportunity and consistent with KAR's investment strategy, KAR seeks to consider environmental, social, and/or governance ("ESG") factors that KAR believes may influence risks and rewards as an element of its investment research and decision-making processes. However, such ESG factors are not by themselves determinative to an investment decision.

We use a proprietary ESG ratings framework to generate ESG scores for businesses in our portfolios as well as portfolio scores.

- ESG research is conducted by each member of the investment team
- Five key issues identified that we believe are the most material and financially relevant for each sector
- These five key issues are largely informed by SASB

We analyze each of these key issues and assign each one an A, B, or C rating

- ✓ A Rating - Demonstrates leadership within ESG
- ✓ B Rating - Demonstrates neither leading the charge nor doing something egregious
- ✓ C Rating - Demonstrates one or more ESG issues of significant concern

- The rating on the key issues informs the overall company rating
- Rating updated annually or more frequently if a material event should occur

# Biographies

## Small Cap Quality Value Team

Kayne Anderson Rudnick  
Investment Management

### **Douglas S. Foreman, CFA**

*Chief Investment Officer and Member of the Executive Management Committee*

Mr. Foreman has approximately 36 years of investment experience. Before joining Kayne Anderson Rudnick in 2011, Mr. Foreman was Director of Equities at HighMark Capital Management and before that he was Group Managing Director and Chief Investment Officer of U.S. equities at Trust Company of the West (TCW). He earned a B.S. in Marine Engineering from The U.S. Naval Academy and an M.B.A. from Harvard University. Mr. Foreman is a Chartered Financial Analyst charterholder.

### **Julie Kutasov**

*Portfolio Manager and Senior Research Analyst with primary research responsibilities for the small and mid-capitalization materials, industrials and utilities sectors*

Before joining Kayne Anderson Rudnick in 2001, Ms. Kutasov worked at Goldman Sachs in a program focused on investment management for high-net worth individuals and at Arthur Andersen as a Senior Associate leading teams that provided financial-audit and business-advisory services to a variety of clients in service-related industries. Ms. Kutasov holds a Certified Public Accountant license (currently inactive) in the state of California. She has approximately 21 years of equity research experience. Ms. Kutasov earned a B.A. in Business Economics from the University of California, Los Angeles, where she graduated summa cum laude, and an M.B.A. from Harvard Business School.

### **Craig Stone**

*Portfolio Manager and Senior Research Analyst with primary research responsibilities for the small and mid-capitalization real estate and consumer discretionary sectors*

Mr. Stone has approximately 33 years of equity research experience. Before joining Kayne Anderson Rudnick in 2000, Mr. Stone was a Portfolio Manager at Doheny Asset Management. He earned a B.S. in International Business from San Francisco State University and an M.B.A. from the University of Southern California.

# Biographies

\*Pure gross returns are supplemental to net returns.

The Russell 2000® Value Index is a trademark/service mark of Frank Russell Company. Russell® is a trademark of Frank Russell Company.

KAR (as defined below) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS® standards. KAR has been independently verified for the period from January 1, 1999 through December 31, 2021.

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis.

The Small Cap Quality Value Wrap Composite has had a performance examination for the period from January 1, 1999 through December 31, 2021. The verification and performance examination reports are available upon request.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

Kayne Anderson Rudnick Investment Management, LLC ("KAR"), a wholly owned subsidiary of Virtus Investment Partners, Inc., is a registered investment advisor under the Investment Advisers Act of 1940. Registration of an Investment Advisor does not imply any level of skill or training. KAR manages a variety of equity and fixed-income strategies focusing exclusively on securities the firm defines as high quality.

The composite includes all fully discretionary Small Cap Quality Value Wrap Portfolios. Small Cap Quality Value Wrap Portfolios are invested in equity securities with capitalizations consistent with the Russell 2000® Value Index, that have market control, rising free cash flow, shareholder-oriented management, strong consistent profit growth and low-debt balance sheets. For comparison purposes, the composite is measured against the Russell 2000® Value Index. The Russell 2000® Value Index is a market capitalization-weighted index of value-oriented stocks of the 2,000 smallest companies in the Russell Universe, which comprises the 3,000 largest U.S. companies. The index is calculated on a total-return basis with dividends reinvested. Benchmark returns are not covered by the report of the independent verifiers. The inception date of the composite is June 1998. The composite was created in January 2002. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. The firm's list of composite descriptions, list of broad distribution pooled fund and the list of limited distribution pooled funds descriptions are available upon request.

Beginning on January 1, 2006, sub-advisory wrap fee portfolios are also included in composite results. Each sub-advisory relationship is included in the composite as one account. All portfolios included in this composite for all periods are wrap portfolios.

The standard wrap fee schedule in effect is 3.00% on total assets. Actual management fees charged may vary depending on applicable fee schedules and portfolio size, among other things. Additional information may be found in Part 2A of Form ADV, which is available on request. The performance information is supplied for reference. Past performance is no guarantee of future results. Results will vary among accounts. The U.S. dollar is the currency used to express performance. Performance results include the reinvestment of all income. Pure gross returns do not reflect the deduction of any expenses, including trading costs. Net annual returns are calculated by deducting 1/12th of an assumed maximum annual wrap fee of 3% on a monthly basis. Wrap fees include all charges for trading costs, portfolio management, custody and other administrative expenses.

Internal dispersion is calculated using the asset-weighted standard deviation of annual gross returns for accounts in the composite for the entire year. For those years when less than five accounts were included for the full year, no dispersion measure is presented. The three-year annualized ex-post standard deviation measures the variability of the composite (using pure gross returns) and the benchmark for the 36-month period.
