

High Yield Bond Wrap

TAXABLE FIXED INCOME STRATEGY

Market Review

Investors rang in 2024 expecting the Federal Reserve (Fed) to cut rates as soon as March, with a total of six rate cuts predicted for the year. By mid-quarter, market participants increasingly resigned themselves to the drumbeat of “higher for longer.” We saw the 10-year Treasury note start the year off at 3.88%, only to see it sell off to end 1Q24 at 4.20% (and, as of April 9, 2024, the 10-year sits at 4.37%). Recession fears have dissipated, while stronger-and-longer inflation now has the market on edge. As Fed Chairman Powell speaks of rate cuts in the not-too-distant future, investors are focusing on higher energy costs, solid employment numbers, and stronger-than-expected economic growth. Rate cut conversations now range from two or three by the end of the year to perhaps only one – with a few voices expecting no cuts for all of 2024.

With the backdrop of a healthier economy, high yield spreads have continued tightening as the economy’s resilience has put credit concerns on the back burner. While rates have risen, option-adjusted spreads (“OAS”) tightened 27 bps for the quarter to 312 basis points (“bps”), while the yield to worst (“YTW”) ended the quarter at 7.69%, which is exactly where it began the quarter. The ICE BofA US High Yield Index (“H0A0”) ended the quarter up +1.51%, beating its longer-duration counterpart, the Bloomberg US Aggregate Bond Index, which was down -0.78% for the same period.

To underscore investors’ return to “risk-on” positioning, triple-Cs, as measured by the ICE BofA CCC & Lower US High Yield Index (H0A3), continued to lead the way with a return for the quarter of 3.17%. This was followed by single-Bs, as measured by the ICE BofA Single-B US High Yield Index (H0A2), which returned 1.44%, and double-Bs, as measured by the ICE BofA BB US High Yield Index (H0A1), which returned 1.06%. Other segments of the market that outperformed included longer-duration high yield, which returned 2.3% as measured by the ICE BofA 10+ Year US Cash Pay High Yield Index (“J9A0”) due to spread tightening, and small-cap issuers, which returned 2.32% as measured by the ICE BofA US Small Cap Cash Pay High Yield Index (“JSML”).

Performance

The Seix High Yield Wrap strategy, which we manage, returned 0.98% (gross) for the quarter (+0.35% net), 48 bps less than the ICE BofA US High Yield Cash Pay Index (“J0A0”), which returned 1.46%.

Top contributors to relative performance from a sector perspective include cable satellite, telecommunications, and media non-cable. Top detractors to relative performance include healthcare/pharmaceuticals, energy, and chemicals.

Our longer-term objective is to provide a smoother ride with outperformance through the full credit cycle and the strongest relative performance generated during periods of dislocation when the market is offering a plethora of attractively-priced securities.

Current Strategy

We continue to find value in the higher-quality part of the high yield market. Further, we continue to look for and find value in the following segments: fallen angels, orphan credits, small-cap issuers, sectors that do not fit a traditional high yield analysis, such as financials, and out-of-favor sectors and/or segments of the market.

Many of our new buys during the quarter included bonds with shorter maturities in the fallen angel space (some recently downgraded). We sold some of our longer-duration bonds and bought these shorter-duration bonds with minimal impact to yield in the portfolio.

TAXABLE FIXED INCOME STRATEGY

Outlook

The fundamentals for the high yield market remain healthy. While aggregate credit metrics have weakened quarter-over-quarter as well as year-over-year, interest coverage, leverage, and free cash flow generation remain at healthy levels based on historic comparisons. We expect the technicals for the market to be more balanced this year. The significant increase in rising stars over the past two years has meaningfully contributed to strong market technicals. We anticipate fallen angels and rising stars to become more balanced. From a valuation perspective, spreads are near the tighter end of the range we anticipated, but yields are attractive.

ANNUALIZED PERFORMANCE (%) AS OF 03/31/2024

Net returns are calculated by subtracting the highest applicable wrap fee (2.50% on an annual basis, or 0.21% on a monthly basis) from the gross composite monthly return.

Past performance is not indicative of future results.

The information shown above is supplemental information only and complements the fully compliant presentations. Periods greater than one year are annualized.

ICE BofA US High Yield Cash Pay Index is an unmanaged index consisting of all domestic and Yankee high-yield bonds maturing over one year. The quality range is less than BBB-/Baa3 but not in default (DDD1 or less). The index does not reflect the deduction of expenses associated with a mutual fund, such as investment management and fund accounting fees. A fund's performance reflects the deduction of fees for these services.

ICE BofA US High Yield Index (H0A0) tracks the performance of US dollar denominated below investment grade rated corporate debt publicly issued in the US domestic market. To qualify for inclusion in the index, securities must have a below investment grade rating and an investment grade rated country of risk. **The ICE BofA BB US High Yield Index (H0A1)** is a subset of the ICE BofA U.S. High Yield Master II Index and includes all securities with a given investment grade rating BB. **The ICE BofA BBB US Corporate Index (C0A4)** is a subset of the ICE BofA U.S. Corporate Master Index tracking the performance of U.S. dollar denominated investment grade-rated corporate debt publicly issued in the U.S. domestic market. This subset includes all securities with a given investment grade rating BBB. **The ICE BofA CCC & Lower US High Yield Index (H0A3)** subset includes all securities with a given investment grade rating CCC or below. **The ICE BofA Single-B US High Yield Index (H0A2)** subset includes all securities with a given investment grade rating B. The indexes are unmanaged, their returns do not reflect any fees, expenses, or sales charges, and are not available for direct investment.

Seix Investment Advisors claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Seix Investment Advisors has been independently verified for the periods January 1, 1993, through December 31, 2022. The verification reports are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedure for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

Seix Investment Advisors ("Seix") provides investment management and advisory services primarily to segregated accounts of institutional clients, wrap accounts, and pooled funds. Seix operates as a division of Virtus Fixed Income Advisers, LLC ("VFIA"), an SEC registered investment adviser. For the purpose of complying with the GIPS standards, the firm is defined as Seix Investment Advisors, a division of VFIA and held out to the public as Seix Investment Advisors. Seix Investment Advisors was founded in 1992. In 2014 Seix merged with StableRiver Capital Management and became a subsidiary of RidgeWorth Capital Management LLC. In 2017, RidgeWorth Capital Management LLC was acquired by Virtus Investment Partners, Inc. ("Virtus"). Effective July 1st, 2022, Seix Investment Advisors became a division of VFIA, a subsidiary of Virtus.

The Seix High Yield Bond Wrap strategy seeks high income and capital appreciation. High Yield Bond Wrap accounts invest primarily in a diversified portfolio of higher yielding, BB-rated and B-rated income-producing debt instruments. The accounts may invest in U.S. dollar denominated debt obligations of U.S. and non-U.S. issuers.

For comparison purposes, the composite is measured against the ICE BofA US High Yield Cash Pay Index. The ICE BofA US High Yield Cash Pay Index is an unmanaged index consisting of all domestic and Yankee high yield bonds maturing over one year. The quality range is less than BBB-/Baa3 but not in default. Index returns do not reflect the deduction of any fees.

The minimum account size for inclusion in the composite is \$250,000. Prior to June 1, 2015, the account minimum was \$500,000.

Prior to September 30, 2017, the Seix High Yield Bond Wrap Composite was named the Seix High Yield SMA Composite. The Seix High Yield Bond Wrap Composite was created January 1, 2003 and has a performance inception date of July 1, 1997.

Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. The U.S. dollar is the currency used to express performance. Returns include the reinvestment of all income. Pure Gross returns are presented as supplemental information, do not reflect the deduction of any trading costs, fees or expenses and are presented for comparison purposes only. Net returns are calculated by subtracting on a monthly basis the highest assumed wrap fee (2.50% annually or 0.21% per month) from the gross composite monthly return. The assumed wrap fee includes all charges for portfolio management, trading costs, custody and other administrative fees. Past performance is not indicative of future results.

Actual wrap fees vary by Program Sponsor. Please refer to the Program Sponsor's ADV 2A for a full disclosure of the fee schedule for wrap fees. Returns realized by clients will be reduced by the actual wrap fee rates and rates incurred by clients will vary.

The three-year annualized standard deviation measures the variability of the composite gross returns, and the benchmark returns over the preceding 36-month period.

The dispersion of annual returns is measured by the asset-weighted standard deviation of portfolio gross returns represented within the composite for the full year. No dispersion is reported for periods with five or fewer portfolios (shown as N/A).

Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. A list of all composite investment strategies offered by the firm, with a description of each strategy, is available upon request. The type of portfolios in which each strategy is available (segregated account, limited distribution pooled fund, or broad distribution pooled fund) is indicated in the description of each strategy.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. Past performance is not indicative of future results.

A basis point (bp) is equal to 0.01%.

IMPORTANT RISK CONSIDERATIONS

Credit & Interest: Debt instruments are subject to various risks, including credit and interest rate risk. The issuer of a debt security may fail to make interest and/or principal payments. Values of debt instruments may rise or fall in response to changes in interest rates, and this risk may be enhanced with longer-term maturities. **High Yield Fixed Income Securities:** There is a greater risk of issuer default, less liquidity, and increased price volatility related to high yield securities than investment grade securities. **Foreign Investing:** Investing in foreign securities subjects the portfolio to additional risks such as increased volatility, currency fluctuations, less liquidity, and political, regulatory, economic, and market risk. **Market Volatility:** The value of the securities in the portfolio may go up or down in response to the prospects of individual companies and/or general economic conditions. Local, regional, or global events such as war or military conflict, terrorism, pandemic, or recession could impact the portfolio, including hampering the ability of the portfolio's manager(s) to invest its assets as intended.

DEFINITIONS & DISCLOSURES

Bonds offer a relatively stable level of income, although bond prices will fluctuate providing the potential for principal gain or loss. Intermediate-term, higher quality bonds generally offer less risk than longer-term bonds and a lower rate of return. Generally, a Portfolio's fixed income securities will decrease in value if interest rates rise and vice versa. Although a Portfolio's yield may be higher than that of fixed income strategies that purchase higher rated securities, the potentially higher yield is a function of the greater risk of that strategy's underlying securities.
