

The Zweig Total Return Fund, Inc.

Semiannual Report

June 30, 2016

FUND DISTRIBUTIONS AND MANAGED DISTRIBUTION PLAN

The Fund has a Managed Distribution Plan to pay 10% (the rate was 7% through March 31, 2016) of the Fund's net asset value on an annualized basis. Distributions may represent earnings from net investment income, realized capital gains, or, if necessary, return of capital. The board believes that regular monthly, fixed cash payouts will enhance shareholder value and serve the long-term interests of shareholders. You should not draw any conclusions about the Fund's investment performance from the amount of the distributions or from the terms of the Fund's Managed Distribution Plan.

On a tax basis, the Fund estimates it distributed more than its income and net realized capital gains in the fiscal year to date (See Note 12 in Notes to Financial Statements). Shareholders should note, however, that if the Fund's aggregate investment income and net realized capital gains are less than the amount of the distribution level, the difference will be paid from the Fund's capital and will constitute a return of the shareholder's capital. A return of capital may occur, for example, when some or all of the money that you invested in the Fund is paid back to you. A return of capital distribution does not necessarily reflect the Fund's investment performance and should not be confused with "yield" or "income."

The amounts and sources of distributions reported in the Fund's notices pursuant to Section 19(a) of the Investment Company Act of 1940 are only estimates and are not being provided for tax reporting purposes. The actual amounts and sources of the amounts for tax reporting purposes will depend upon the Fund's investment experience during its fiscal year and may be subject to changes based on tax regulations. The Fund will send shareholders a Form 1099-DIV for 2016 that tells them how to report distributions for federal income tax purposes.

The Board may amend, suspend or terminate the Managed Distribution Plan at any time, without prior notice to shareholders if it deems such action to be in the best interest of the Fund and its shareholders.

Information on the Zweig funds is available at www.Virtus.com. Section 19(a) notices are posted on the website at: <http://www.virtus.com/our-products/closed-end-fund-details/ZTR>.

MESSAGE TO SHAREHOLDERS

Dear Fellow Zweig Total Return Fund Shareholder:

I am pleased to share with you the manager's semiannual report for The Zweig Total Return Fund, Inc. for the six months ended June 30, 2016. The report contains commentary from the portfolio management team at Zweig Advisers LLC on the performance of the markets and the portfolio during this period. The commentary also discusses the contribution of the options overlay strategy that was implemented in April. The results of the annual meeting of shareholders that was held on June 10, 2016 and the tender offer that concluded on May 26, 2016 are also included in the report.

For the six months ended June 30, 2016, the Fund's NAV increased 2.89%, including \$0.485 in reinvested distributions. During the same period, the Fund's benchmark index, a composite consisting of equal parts of the S&P 500® Index and the Barclays U.S. Government Bond Index, increased 4.66%, including reinvested dividends. Performance for the composite's underlying indices over this period included a 3.84% increase for the S&P 500 and a 5.22% increase for the Barclays U.S. Government Bond Index. During the six-month period, the Fund's average allocation was approximately 68% in equities, 24% in fixed income, and 8% in cash.

On behalf of Zweig Advisers' investment professionals, I thank you for entrusting your assets to us. Should you have any questions or require support, our customer service team is ready to assist you at 1-800-272-2700 or through the closed-end fund section of our website, www.virtus.com.

Sincerely,

George R. Aylward
President, Chairman and
Chief Executive Officer
The Zweig Total Return
Fund, Inc.

THE ZWEIG TOTAL RETURN FUND, INC.
MARKET OUTLOOK AND OVERVIEW
JUNE 30, 2016 (Unaudited)

Dear Shareholders:

The tug-of-war between the bulls and bears tormented global equity markets during the first half of 2016, and the U.S. stock market was hardly immune to this game. The price level of the S&P 500® Index has been gyrating up and down for several quarters, but ended the semi-annual period at about where it was back in December of 2014. While the market has experienced several rapid swoons and sharp recoveries in the last year and a half, the net of it all amounts to a virtually unchanged price level in the Index. The United Kingdom's "Brexit" vote at the end of June sent the market into a temporary tailspin, only to quickly recover and make new all-time highs in mid-July. With the U.S. Federal Reserve ("the Fed") and other world central banks continuing the easy money policy, the bears lack a compelling case for a move lower. Furthermore, bearish sentiment is high, which is not normally a precondition for a significant market decline.

The year opened with the stock market performing in January much as it did in the second half of 2015, only worse. Growth stocks vastly outperformed value stocks, defensive market sectors outstripped cyclicals, and investors seemed to reward only names with strong relative momentum. A brief respite occurred in these phenomena from early February until late April, but the quirky markets returned in May. During the period, stock picking led the Fund to strong outperformance relative to the S&P 500® from early February through April, when it outpaced the Index by about 200 bps. In early May, the Fund lost the ground it had gained due to stock-picking underperformance. June and early July were much kinder to the Fund's growth-at-a-reasonable-price strategy, and performance improved.

The tactical decision to buy the early-year dip in the price level of the market worked very well from a performance perspective, as the Fund's equity exposure was high when the S&P 500® rallied from its February low. The market's strong move was not driven by underlying fundamentals, but by the Fed giving the "all clear" in early February, again refraining from tightening monetary conditions. Muting the move through the end of the first half of the year were that U.S. companies' first quarter earnings were largely lackluster across industries. Consequently, the market had trouble keeping a bid and rising further. While economic data, both domestically and internationally, gave little reason to be optimistic that companies will find new profits from global growth, the data has also caused market participants to push out rate hike expectations, which has been a good thing for markets recently. The economic picture has improved at the margin, and second quarter earnings reports are coming in better than expected. This has helped push the market higher post the tumult caused by the British vote to leave the European Union.

Of note since the annual shareholder report, the Fund benefited from the options overlay strategy added in early April, from both an income and total return perspective. This strategy seeks to generate additional income through the use of index-based, out-of-the-money put and call spreads. This strategy is driven by implied volatility, as measured by the CBOE Volatility Index (or "VIX" as it's also known), and seeks to exploit pricing inefficiencies in options on the S&P 500® Index.

During low volatility periods, as experienced for the majority of the year, a range-bound market is an ideal environment for the strategy. This is because the strategy is able to retain all of the premium generated from the options program due to no in-the-money settlements of the short option positions. When the S&P 500® makes large and fast moves that are not priced into the implied volatility of the options market, the strategy can and will take losses. Following the

THE ZWEIG TOTAL RETURN FUND, INC.
MARKET OUTLOOK AND OVERVIEW (Continued)
JUNE 30, 2016 (Unaudited)

Fund's adoption of the options overlay strategy, the defining market event was the Brexit vote, and the strategy was able to produce positive trades during the surrounding market volatility. The strategy adjusted to the changing volatility and market environment with the objective of having the same risk and reward level for each set of positions, allowing each of the weekly periods to be successful. From April 20 through June 30, 2016, the strategy performed as expected, generating income within its targeted yield range, and enhancing the Fund's total return by 1.14% (gross of fees).

The Fund also increased the size of the high-dividend portfolio, which in tandem with the options overlay strategy has produced additional income. Some of the high-dividend names in the portfolio also helped mitigate some of the recent stock-picking performance.

A very contentious presidential race is highly likely. Looking at the path U.S. equity markets have taken in past presidential election years, stock index prices tend to peak in early summer as it becomes clear who the candidates will be, then drift lower until the election is over. With the backdrop of mediocre economic data, a muddled jobs picture, and little to no room for a central bank positive surprise, this playbook of a possible retracement in the market to move somewhat lower seems a reasonable expectation. If it weren't for the perniciously high bearish sentiment, the Fund might have lower equity exposure. Even though we would normally believe that, at this point in the economic cycle, bad economic data is simply bad for the market, in this continued through-the-looking-glass world, it appears that anything that keeps the Fed from raising rates is still good for stock prices. At least until some other exogenous factor overwhelms the economics of "no Fed action is good for stocks," the market could continue higher until the general election is in full swing after the Democrat national convention.

Another factor that helped stocks, and which continues to be supportive, is the rapid move up in crude oil prices. The concern that pandemic oil company bankruptcies would result in a 2008-09 style financial panic seemed far-fetched, but the U.S. stock market – and specifically bank stocks – didn't trade well with plunging oil prices. With WTI crude off its recent move to \$50 per barrel, it is interesting to note that the general stock market still trades well. Summer oil demand has been strong and recent earnings of mid-continent producers better than feared, despite last year's tumbling prices. Overall, the market is taking the recovery in oil as a positive for stocks across the board.

The Fund has a more neutral sector positioning than in many previous periods because of a plethora of economic cross-currents and a lack of clarity on the direction of the economy and the Federal Reserve's monetary policy. The one area where the Fund holds a notable overweight relative to the S&P 500® is within industrial stocks, where there remains a compelling risk-to-reward price advantage. Some stocks have solid dividends, but are trading well below market price-to-earnings multiples, mainly because investors are cautious about future growth. A year ago, the dollar was making fresh highs and being blamed as a headwind to earnings within the sector. Although the U.K. Brexit vote has caused the dollar to rise again, year-over-year it is at about the same level it was last August. The rise in oil prices also appears to be helping some areas of the industrial sector, as many companies have exposure to the infrastructure and support of energy companies. About 16% of our equity exposure is in the industrial sector.

Exposure to information technology stocks is somewhat lower than at 2015 year-end. Thus far in 2016, tech has been a slight underperforming area of the market, and with many sub-industries struggling in the sector, the Fund has cut its exposure. In addition, as the high-dividend portfolio became a bigger piece of the investment pie, the tech weighting was also reduced.

THE ZWEIG TOTAL RETURN FUND, INC.
MARKET OUTLOOK AND OVERVIEW (Continued)
JUNE 30, 2016 (Unaudited)

The health care and financial sectors have both struggled thus far on the year, which is a continuation of the price action these groups exhibited in the latter half of 2015. Even though health care spending continues to rise, the political uncertainties surrounding the government's future involvement, as well as pricing mechanisms, still weigh on the sector. In a similar vein, the future of banking remains cloudy, with regulatory burdens and political uncertainties plaguing the sector. The portfolio is underweight both sectors, given the poor price action and uncertainties. Although both sectors have recovered slightly ahead of the market in the last month, they remain the two worst-performing areas of the market on the year thus far.

The portfolio currently has a much closer to market weighting in utilities, telecom, and consumer staples. As the Fund increased the number of short positions and added to the high-dividend names, the natural move was to increase exposure to these higher yielding areas. Furthermore, of the 20 shorts initiated this year, the most compelling names were identified in specific overpriced areas of technology, consumer discretionary, and health care.

Treasury bonds have been a good investment this year, both during the equity tumult and recently with the Fed inaction and uneven economic data. Credit markets have also recovered, particularly the high-yield market, which has moved higher with the price of oil. As long as the Fed appears to be on hold, and inflation expectations remain muted, sub-2% yields on 10-year Treasury notes seem to be the norm. We increased the Fund's holdings in both Treasury bonds and corporate bonds during the period. It's impossible to say what the "Goldilocks" scenario is for stocks at this point, but it is pretty clear that the low inflation, no Fed action, and muted economic activity are all positive for fixed income.

It was encouraging that the Fund produced a strong two-month stretch of solid outperformance mid-way through the first half of 2016 and over the last month and a half. Still, the first six months of the year was a frustrating period for the Fund's growth-at-a-reasonable-price strategy. At this juncture, we seem to have turned a corner and the portfolio has returned to experiencing better performance and generating solid income. The goal remains to deliver a solid return, consistent with a conservative approach to allocation, and a distribution yield for shareholders. We thank all of the shareholders for your ongoing support.

Sincerely,

Carlton Neel

David Dickerson

MARKET OUTLOOK AND OVERVIEW (Continued)
JUNE 30, 2016 (Unaudited)

The views expressed in the Market Outlook and Overview reflect those of its authors only, and only as of its date. These views are subject to change at any time, based on market and other conditions and should not be construed as a recommendation or advice of any kind. The material may also contain forward-looking statements that involve risk and uncertainty, and there is no guarantee they will come to pass.

There can be no assurance that the Fund will achieve its investment objective.

The net asset value of the Fund will fluctuate with the value of the underlying securities.

Performance data quoted represents past results. Past performance is no guarantee of future results.

This information does not represent an offer, or the solicitation of an offer, to buy or sell securities of the Fund.

Equity Securities: *The market price of equity securities may be adversely affected by financial market, industry, or issuer-specific events. Focus on a particular style or on small or medium-sized companies may enhance that risk.*

Credit & Interest: *Debt securities are subject to various risks, the most prominent of which are credit and interest rate risk. The issuer of a debt security may fail to make interest and/or principal payments. Values of debt securities may rise or fall in response to changes in interest rates, and this risk may be enhanced with longer-term maturities.*

Leverage: *When a fund leverages its portfolio, the value of its shares may be more volatile and all other risks may be compounded.*

Short Sales: *The fund may engage in short sales, and may experience a loss if the price of a borrowed security increases before the date on which the fund replaces the security.*

U.S. Government Securities: *U.S. government securities may be subject to price fluctuations. An agency may default on an obligation not backed by the United States. Any guarantee on U.S. government securities does not apply to the value of the fund's shares.*

Market Price/NAV: *Shares of closed-end funds often trade at a discount to their net asset value, which may increase investors' risk of loss. At the time of sale, an investor's shares may have a market price that is above or below the fund's NAV.*

OUR PRIVACY COMMITMENT

The Zweig Total Return Fund, Inc. recognizes that protecting the privacy and security of the confidential personal information we collect about you is an important responsibility. The following information will help you understand our privacy policy and how we will handle and maintain confidential personal information as we fulfill our obligations to protect your privacy. "Personal information" refers to the nonpublic financial information obtained by us in connection with providing you a financial product or service.

Information We Collect

We collect personal information to help us serve your financial needs, offer new products or services, provide customer service and fulfill legal and regulatory requirements. The type of information that we collect varies according to the products or services involved, and may include:

- Information we receive from you on applications and related forms (such as name, address, social security number, assets and income); and
- Information about your transactions and relationships with us, our affiliates, or others (such as products or services purchased, account balances and payment history).

Information Disclosed in Administering Products and Services

We will not disclose personal information about current or former customers to non-affiliated third parties except as permitted or required by law. We do not sell any personal information about you to any third party. In the normal course of business, personal information may be shared with persons or entities involved in servicing and administering products and services on our behalf, including your broker, financial advisor or financial planner and other service providers and affiliates assisting us.

Procedures to Protect Confidentiality and Security of Your Personal Information

We have procedures in place that limit access to personal information to those employees and service providers who need to know such information in order to perform business services on our behalf. We educate our employees on the importance of protecting the privacy and security of confidential personal information. We also maintain physical, electronic and procedural safeguards that comply with federal and state regulations to guard your personal information.

We will update our policy and procedures where necessary to ensure that your privacy is maintained and that we conduct our business in a way that fulfills our commitment to you. If we make any material changes in our privacy policy, we will make that information available to customers through our website and/or other communications.

THE ZWEIG TOTAL RETURN FUND, INC.
KEY INVESTMENT TERMS
JUNE 30, 2016 (Unaudited)

American Depositary Receipt (ADR):

Represents shares of foreign companies traded in U.S. dollars on U.S. exchanges that are held by a U.S. bank or a trust. Foreign companies use ADRs in order to make it easier for Americans to buy their shares.

Barclays U.S. Government Bond Index:

An index that measures the performance of all public U.S. government obligations with remaining maturities of one year or more. The index is unmanaged, its returns do not reflect any fees, expenses, or sales charges, and it is not available for direct investment.

Chicago Board Options Exchange (CBOE) Volatility Index, (“VIX – CBOE”)

The Chicago Board Options Exchange (CBOE) Volatility Index, which shows the market's expectation of 30-day volatility. It is constructed using the implied volatilities of a wide range of S&P 500 index options. This volatility is meant to be forward looking and is calculated from both calls and puts. The VIX is a widely used measure of market risk and is often referred to as the “investor fear gauge.”

Consumer Price Index (CPI):

Measures the pace of inflation by measuring the change in consumer prices of goods and services, including housing, electricity, food and transportation, as determined by a monthly survey of the U.S. Bureau of Labor Statistics. Also called the cost-of-living index.

Federal Reserve (the “Fed”)

The Central bank of the United States, responsible for controlling the money supply, interest rates and credit with the goal of keeping the U.S. economy and currency stable. Governed by a seven-member board, the system includes 12 regional Federal

S&P 500® Index:

The S&P 500® Index is a free-float market capitalization-weighted index of 500 of the largest U.S. companies. The index is calculated on a total return basis with dividends reinvested. The index is unmanaged, its returns do not reflect any fees, expenses, or sales charges, and it is not available for direct investment.

Sponsored American Depositary Receipt (ADR)

An ADR which is issued with the cooperation of the company whose stock will underlie the ADR. Sponsored ADRs generally carry the same rights given to stockholders such as voting rights. ADRs must be sponsored to be able to trade on a major U.S. exchange such as the New York Stock Exchange (“NYSE”).

The Zweig Total Return Fund Composite Index:

A composite index consisting of 50% Barclays U.S. Government Bond Index and 50% S&P 500® Index.

Treasury Inflation Protected Securities (TIPS):

A treasury security that is indexed to inflation in order to protect investors from the negative effects of inflation.

West Texas Intermediate (WTI):

WTI also known as Texas light sweet, is a grade of crude oil used as a benchmark in oil pricing. This grade is described as light because of its relatively low density, and sweet because of its low sulfur content. It is the underlying commodity of New York Mercantile Exchange's oil futures contracts.

THE ZWEIG TOTAL RETURN FUND, INC.
FINANCIAL HIGHLIGHTS (Continued)

(Selected data for a share outstanding throughout each period)

- (1) Closing Price – New York Stock Exchange.
- (2) Total investment return is calculated assuming a purchase of common shares of the opening on the first day and sale on the closing of the last day of each period reported. Dividends and distributions are assumed, for purposes of this calculation, to be reinvested at prices obtained under the Fund's Automatic Reinvestment and Cash Purchase Plan. Total investment return is not annualized for periods of less than one year. Brokerage commissions that a shareholder may pay are not reflected. Total return does not reflect the deduction of taxes that a shareholder may pay on fund distributions or the sale of fund shares.
- (3) Computed using average shares outstanding.
- (4) Amount is less than \$0.005.
- (5) NAV return is calculated using the opening Net Asset Value price of the Fund's common stock on the first business day and the closing Net Asset Value price of the Fund's common stock on the last business day of each period reported. Dividends and distributions, if any, are assumed for the purpose of this calculation, to be reinvested at prices obtained under the Fund's Automatic Reinvestment and Cash Purchase Plan.
- (6) Shares were sold at a 5% discount from a 5 day average market price from 1/3/11 to 1/7/11.
- (7) Total investment return includes the dilutive effect of the 2011 rights offering. Without this effect, the total investment return would have been (2.59)%.
- (8) The Fund had a 1:4 reverse stock split with ex-dividend date of June 27, 2012. Prior year net asset values and per share amounts have been restated to reflect the impact of the reverse stock split (See Note 8). The net asset value and market price reported at the original dates prior to the reverse stock split were as follows:

For the Year Ended December 31, 2011

Net Asset Value (prior to reverse stock split)	\$3.57
Market Price (prior to reverse stock split)	\$3.03

- (9) The fund incurred certain non-recurring proxy and reverse stock split costs in 2012. When excluding these costs, the Ratio of expenses to average net assets (after expense waivers) would be 0.87% and the Ratio of expenses to average net assets (before expense waivers) would be 1.01%.
- (10) Ratios of expenses, excluding dividends on short sales and interest expense for the periods ended December 31, or as otherwise noted, are as follows:

Six Months Ended June 30, 2016 (Unaudited)	Year Ended				
	2015	2014	2013	2012	2011
1.15%	0.98%	0.99%	1.02%	1.09%	0.97%

- (11) Annualized.
- (12) Not annualized.
- (13) Please note the tax status of our distributions is determined at the end of the tax year.

See Notes to Financial Statements

THE ZWEIG TOTAL RETURN FUND, INC.
NOTES TO FINANCIAL STATEMENTS
JUNE 30, 2016 (Unaudited)

Note 1. Organization

The Zweig Total Return Fund, Inc. (the “Fund”) is a closed-end, diversified management investment company registered under the Investment Company Act of 1940 (the “Act”). The Fund was incorporated under the laws of the State of Maryland on July 21, 1988. The Fund’s investment objective is to seek total return, consisting of capital appreciation and income.

Note 2. Significant Accounting Policies

The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its financial statements. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates, and those differences could be significant.

A. Security Valuation:

Security valuation procedures for the Fund, which include nightly price variance, as well as back-testing such as bi-weekly unchanged price, monthly secondary source and transaction analysis, have been approved by the Board of Directors (the “Board”, or the “Directors”). All internally fair valued securities are approved by a valuation committee (the “Valuation Committee”) appointed by the Board. The Valuation Committee is comprised of certain members of management as identified to the Board and convenes independently from portfolio management. All internally fair valued securities, referred to below, are updated daily and reviewed in detail by the Valuation Committee monthly unless changes occur within the period. The Valuation Committee reviews the validity of the model inputs and any changes to the model. Quarterly internal fair valuations are reviewed and ratified by the Board.

The Fund utilizes a fair value hierarchy which prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. It is the Fund’s policy to recognize transfers between levels at the end of the reporting period.

- Level 1 – quoted prices in active markets for identical securities (security types generally include listed equities).
- Level 2 – prices determined using other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).
- Level 3 – prices determined using significant unobservable inputs (including the Valuation Committee’s own assumptions in determining the fair value of investments).

A description of the valuation techniques applied to the Fund’s major categories of assets and liabilities measured at fair value on a recurring basis is as follows:

Equity securities are valued at the official closing price (typically last sale) on the exchange on which the securities are primarily traded or, if no closing price is available, at the last bid price and are categorized as Level 1 in the hierarchy. Restricted equity securities and private placements that are not widely traded, are illiquid, or are internally fair valued by the Valuation Committee, are generally categorized as Level 3 in the hierarchy.

THE ZWEIG TOTAL RETURN FUND, INC.
NOTES TO FINANCIAL STATEMENTS (Continued)
JUNE 30, 2016 (Unaudited)

Certain non-U.S. securities may be fair valued in cases where closing prices are not readily available or are deemed not reflective of readily available market prices. For example, significant events (such as movement in the U.S. securities market, or other regional and local developments) may occur between the time that non-U.S. markets close (where the security is principally traded) and the time that the Fund calculates its net asset value ("NAV") (at the close of regular trading on the New York Stock Exchange ("NYSE"), generally 4 p.m. Eastern time) that may impact the value of securities traded in these non-U.S. markets. In such cases the Fund fair values non-U.S. securities using an independent pricing service which considers the correlation of the trading patterns of the non-U.S. security to the intraday trading in the U.S. markets for investments such as ADRs, financial futures, exchange-traded funds ("ETFs"), and certain indexes, as well as prices for similar securities. Such fair valuations are categorized as Level 2 in the hierarchy. Because the frequency of significant events is not predictable, fair valuation of certain non-U.S. common stocks may occur on a frequent basis.

Debt securities, including restricted securities, are valued based on evaluated quotations received from independent pricing services or from dealers who make markets in such securities. For most bond types, the pricing service utilizes matrix pricing that considers one or more of the following factors: yield or price of bonds of comparable quality, coupon, maturity, current cash flows, type, and current day trade information, as well as dealer supplied prices. These valuations are generally categorized as Level 2 in the hierarchy. Structured debt instruments, such as mortgage-backed and asset-backed securities, may also incorporate collateral analysis and utilize cash flow models for valuation and are generally categorized as Level 2 in the hierarchy. Pricing services do not provide pricing for all securities and therefore indicative bids from dealers are utilized which are based on pricing models used by market makers in the security and are generally categorized as Level 2 in the hierarchy. Debt securities that are not widely traded, are illiquid, or are internally fair valued by the Valuation Committee, are generally categorized as Level 3 in the hierarchy.

Listed derivatives, such as options, that are actively traded are valued based on quoted prices from the exchange and are categorized as Level 1 in the hierarchy. Over-the-counter derivative contracts, which include forward currency contracts and equity-linked instruments, do not require material subjectivity as pricing inputs are observed from actively quoted markets and are categorized as Level 2 in the hierarchy.

Investments in open-end mutual funds are valued at NAV. Investments in closed-end funds are valued as of the close of regular trading on the NYSE each business day. Both are categorized as Level 1 in the hierarchy.

A summary of the inputs used to value the Fund's net assets by each major security type is disclosed at the end of the Schedule of Investments and Securities Sold Short for the Fund. The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

B. Security Transactions and Investment Income:

Security transactions are recorded on the trade date. Realized gains and losses from sales of securities are determined on the identified cost basis. Dividend income is recognized on the ex-dividend date or, in the case of certain foreign securities, as soon as the Fund is notified. Interest income is recorded on the accrual basis. The Fund amortizes premiums and accretes discounts using the effective interest method.

THE ZWEIG TOTAL RETURN FUND, INC.
NOTES TO FINANCIAL STATEMENTS (Continued)
JUNE 30, 2016 (Unaudited)

C. Income Taxes:

The Fund is treated as a separate taxable entity. It is the Fund's intention to comply with the requirements of Subchapter M of the Internal Revenue Code and to distribute substantially all of its taxable income to its shareholders. Therefore, no provision for federal income taxes or excise taxes has been made.

The Fund may be subject to foreign taxes on income, gains on investments or currency repatriation, a portion of which may be recoverable. The Fund will accrue such taxes and recoveries as applicable based upon current interpretations of the tax rules and regulations that exist in the markets in which it invests.

Management of the Fund has concluded that there are no significant uncertain tax positions that would require recognition in the financial statements. As of June 30, 2016, the tax years that remain subject to examination by the major tax jurisdictions under the statute of limitations are from the year 2013 forward (with limited exceptions).

D. Dividends and Distributions to Shareholders:

Distributions are recorded by the Fund on the ex-dividend date. Income and capital gain distributions are determined in accordance with income tax regulations that may differ from accounting principles generally accepted in the United States of America. These differences may include the treatment of non-taxable dividends, market premium and discount, non-deductible expenses, expiring capital loss carryovers, foreign currency gain or loss, operating losses and losses deferred due to wash sales. Permanent book and tax basis differences relating to shareholder distributions will result in reclassifications to capital paid in on shares of beneficial interest.

The Fund has a Managed Distribution Plan to pay 10 percent of the Fund's NAV on an annualized basis effective with the April distribution. The prior rate was 7%.

Distributions may represent earnings from net investment income, realized capital gains, or, if necessary, return of capital. Shareholders should not draw any conclusions about the Fund's investment performance from the terms of the Fund's Managed Distribution Plan.

E. Foreign Currency Translation:

Non-U.S. investment securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollar amounts at the foreign currency exchange rate effective at the end of the reporting period. Cost of investments is translated at the currency exchange rate effective at the trade date. The gain or loss resulting from a change in currency exchange rates between the trade and settlement date of a portfolio transaction is treated as a gain or loss on foreign currency. Likewise, the gain or loss resulting from a change in currency exchange rates between the date income is accrued and the date it is paid is treated as a gain or loss on foreign currency. The Fund does not isolate that portion of the results of operations arising from changes in foreign exchange rates on investments from the fluctuations arising from changes in the market prices of securities held. Such fluctuations are included with the net realized and unrealized gain or loss on investments.

THE ZWEIG TOTAL RETURN FUND, INC.
NOTES TO FINANCIAL STATEMENTS (Continued)
JUNE 30, 2016 (Unaudited)

F. Short Sales:

A short sale is a transaction in which the Fund sells a security it does not own in anticipation of a decline in market price. To sell a security short, the Fund must borrow the security. The Fund's obligation to replace the security borrowed and sold short will be fully collateralized at all times by the proceeds from the short sale retained by the broker and by cash and securities deposited in a segregated account with the Fund's custodian. If the price of the security sold short increases between the time of the short sale and the time the Fund replaces the borrowed security, the Fund will realize a loss, and if the price declines during the period, the Fund will realize a gain. Any realized gain will be decreased by, and any realized loss increased by, the amount of transaction costs. On ex-dividend date, dividends on short sales are recorded as an expense to the Fund.

In accordance with the terms of its prime brokerage agreement, the Fund may receive rebate income or be charged a fee based on borrowed securities which is under interest expense on short sales on the Statement of Operations. Such income or fee is calculated on a daily basis based on the market value of each borrowed security and a variable rate that is dependent upon the availability of such security.

G. Earnings Credit and Interest

Through arrangements with the Fund's custodian, the Fund either receives an earnings credit or interest on agreed upon target un-invested cash balances to reduce the Fund's custody expenses. The credits are reflected as "Earnings credits from Custodian" and the interest is reflected under "Interest income" in the Fund's Statements of Operations for the period, as applicable.

Note 3. Derivative Financial Instruments and Transactions

(\$ reported in thousands)

Disclosures about derivative instruments and hedging activities are intended to enable investors to understand how and why the Fund uses derivatives, how derivatives are accounted for, and how derivative instruments affect the Fund's results of operations and financial position. Summarized below is a specific type of derivative instrument used by the Fund.

A. Options contracts

An options contract provides the purchaser with the right, but not the obligation, to buy (call option) or sell (put option) a financial instrument at an agreed upon price. The Fund pursues an option income strategy whereby it purchases and sells out-of-the-money puts and calls, creating an options spread designed to generate a consistent level of option cash flow which should result in additional yield. The Fund is subject to equity price risk in the normal course of pursuing its investment objectives. When the Fund purchases an option, it pays a premium and an amount equal to that premium is recorded as an asset. When the Fund writes an option, it receives a premium and an amount equal to that premium is recorded as a liability. The asset or liability is adjusted daily to reflect the current market value of the option. Holdings of the Fund designated to cover outstanding written options are noted in the Schedule of Investments and Securities Sold Short. Purchased options are reported as an asset within "Investment in securities at value" in the Statement of Assets and Liabilities. Options written are

THE ZWEIG TOTAL RETURN FUND, INC.
NOTES TO FINANCIAL STATEMENTS (Continued)
JUNE 30, 2016 (Unaudited)

reported as a liability within "Written options outstanding at value". Changes in value of the purchased option is included in "Net change in unrealized appreciation (depreciation) on investments" in the Statement of Operations. Changes in value of written options is included in "Net change in unrealized appreciation (depreciation) on written options". If an option expires unexercised, the Fund realizes a gain or loss to the extent of the premium received or paid. If an option is exercised, the premium received or paid is recorded as an adjustment to the proceeds from the sale or the cost basis of the purchase. The difference between the premium and the amount received or paid on effecting a closing purchase or sale transaction is also treated as a realized gain or loss. Gain or loss on purchased options is included in "Net realized gain (loss) on investments" in the Statement of Operations. Gain or loss on written options is presented separately as "Net realized gain (loss) on written options" in the Statement of Operations.

The risk in writing covered put options is that the Fund may incur a loss if the market price of the security decreases and the option is exercised. The risk in buying options is that the Fund pays a premium whether or not the option is exercised. The use of such instruments may involve certain additional risks as a result of unanticipated movements in the market. Writers (sellers) of options are normally subject to unlimited risk of loss, as the seller will be obligated to deliver or take delivery of the security at a predetermined price which may, upon exercise of the option, be significantly different from the then-market value. However, the Fund may limit its risk of loss when writing an option by purchasing an option similar to the one that is sold, except for the fact it is further "out of the money".

The Fund invested in derivative instruments during the fiscal period in the form of writing put/call options and buying put/call options on the S&P 500® Index. The primary risk associated with these derivative instruments is equity risk.

The Fund had transactions in written options for the period ended Written Options outstanding at June 30, 2016, as follows:

	<u>Calls</u>		<u>Puts</u>

Net asset (liability) balance	<u>\$(162)</u>

THE ZWEIG TOTAL RETURN FUND, INC.
NOTES TO FINANCIAL STATEMENTS (Continued)
JUNE 30, 2016 (Unaudited)

The following is a summary of the Fund's options contracts as presented in the Statement of Operations at June 30, 2016.

Net realized gain (loss) on purchased options	\$(2,476) ⁽²⁾
Net realized gain (loss) on written options	6,299
Net change in unrealized appreciation (depreciation) on purchased options	(762) ⁽³⁾
Net change in unrealized appreciation (depreciation) on written options	<u>1,379</u>
Total realized and unrealized gain (loss) on purchased and written options	<u>\$ 4,440</u>

⁽¹⁾ Amount included in Investment in securities at value.

⁽²⁾ Amount included in Net realized gain (loss) on investments.

⁽³⁾ Amount included in Net change in unrealized appreciation (depreciation) on investments.

The written options held as of June 30, 2016 as disclosed in the Schedule of Investments and Securities Sold Short and the amounts of realized gains and losses and changes in the unrealized appreciation and depreciation on written options as disclosed in the Statement of Operations serve as indicators of the volume of written option activity for the Fund for the period ended June 30, 2016.

Note 4. Investment Advisory Fees and Other Transactions with Affiliates
(\$ reported in thousands)

Zweig Advisers LLC, an indirect wholly-owned subsidiary of Virtus Investment Partners, Inc. ("Virtus"), is the adviser (the "Adviser") to the Fund.

A. Investment Advisory Fee:

The Investment Advisory Agreement (the "Agreement") between the Adviser and the Fund provides that, subject to the direction of the Board of Directors of the Fund and the applicable provisions of the Act, the Adviser is responsible for the management of the Fund's portfolio. The responsibility for making decisions to buy, sell, or hold a particular investment rests with the Adviser, subject to review by the Board of Directors and the applicable provisions of the Act. For the services provided by the Adviser under the Agreement, the Fund pays the Adviser a monthly fee equal, on an annual basis, of 0.70% of the Fund's average daily managed assets. The Fund's "managed assets" are equal to the total assets of the Fund minus the sum of all accrued liabilities of the Fund (other than the aggregate amount of any outstanding borrowings or other indebtedness, entered into for the purpose of creating financial leverage).

B. Administration Services:

Virtus Fund Services, LLC, an indirect wholly-owned subsidiary of Virtus, serves as administrator to the Fund. During the six months ended (the "period") June 30, 2016, the Fund incurred administration fees of \$139, which are included in the Statement of Operations. A portion of this fee is paid to outside entities that also provide services to the Fund.

C. Directors Fee:

For the period ended June 30, 2016, the Fund incurred director fees totaling \$113 which are included in the Statement of Operations.

THE ZWEIG TOTAL RETURN FUND, INC.
NOTES TO FINANCIAL STATEMENTS (Continued)
JUNE 30, 2016 (Unaudited)

Note 5. Purchases and Sales of Securities

(\$ reported in thousands)

Purchases and sales of securities (excluding U.S. Government and agency securities and short-term investments) for the period ended June 30, 2016, were as follows:

<u>Purchases</u>	<u>Sales</u>
\$239,860	\$209,585

Purchases and sales of long term U.S. Government and agency securities for the period ended June 30, 2016, were as follows:

<u>Purchases</u>	<u>Sales</u>
\$10,325	\$29,931

Note 6. Indemnifications

Under the Fund's organizational documents and related agreements, its directors and officers are indemnified against certain liabilities arising out of the performance of their duties to the Fund. In addition, in the normal course of business, the Fund enters into contracts that provide a variety of indemnifications to other parties. The Fund's maximum exposure under these arrangements is unknown. However, the Fund has not had prior claims or losses pursuant to these arrangements and expects the risk of loss to be remote.

Note 7. Capital Stock and Reinvestment Plan; Repurchase Program; Dividend Distributions; Tender Offer

At June 30, 2016, the Fund had one class of common stock, par value \$0.001 per share, of which 500,000,000 shares are authorized and 27,023,909 shares are outstanding.

Registered shareholders may elect to have all distributions paid by check mailed directly to the shareholder by Computershare as dividend paying agent. Pursuant to the Automatic Reinvestment and Cash Purchase Plan (the "Plan"), shareholders not making such election will have all such amounts automatically reinvested by Computershare, as the Plan agent, in whole or fractional shares of the Fund, as the case may be. During the periods ended June 30, 2016 and December 31, 2015, there were no shares issued pursuant to the Plan.

Pursuant to the Board approved stock repurchase program, the Fund may repurchase up to 20% of its outstanding shares in the open market at a discount to NAV. The Fund started its buyback of shares on April 11, 2012. From January 1, 2016 through June 30, 2016, there were no repurchases. From January 1, 2015 through December 31, 2015, the Fund repurchased 659,000 shares at an average price of \$12.81. The average discount to NAV at which repurchases were executed during this period was 12.37%.

On April 29, 2016, the Fund announced the commencement of a 15% tender offer (4,768,925.10 shares) at a price equal to 98% of the Fund's net asset value per share on the expiration date of the offer. The tender offer expired on May 26, 2016, at which time the offer was oversubscribed. The Fund purchased the maximum number of shares covered by the offer price of \$12.96 per share, which represented a price equal to 98 percent of the net asset value per share as of the close of trading on the New York Stock Exchange on May 26, 2016. As a result of the tender offer, \$61,805 was distributed to shareholders and there was an accretion of \$0.05 to the net asset value per share of all the outstanding shares after the close of the tender offer.

THE ZWEIG TOTAL RETURN FUND, INC.
NOTES TO FINANCIAL STATEMENTS (Continued)
JUNE 30, 2016 (Unaudited)

On July 1, 2016, the Fund announced the monthly distribution of \$0.112 per share to shareholders of record on June 11, 2016. This distribution had an ex-dividend date of July 7, 2016, and was paid on July 18, 2016.

Note 8. Reverse Stock Split

Prior to the opening of trading on the NYSE on June 27, 2012, the Fund implemented a 1 for 4 reverse stock split. The Fund's shares are trading on a reverse split-adjusted basis under a new CUSIP number (989837208). The net effect of the Fund's reverse stock split was to decrease the number of the Fund's outstanding common shares and increase the NAV per common share by a proportionate amount. While the number of the Fund's outstanding common shares declined, neither the Fund's holdings nor the total value of shareholders' investments were affected. Immediately after the reverse stock split, each common shareholder held the same percentage of the Fund's outstanding common shares that he or she held immediately prior to the reverse stock split, subject to adjustments for fractional shares resulting from the split. Per share data, including the proportionate impact to market price, in the Financial Highlights table has been restated to reflect the reverse stock split.

Note 9. Borrowings

The Fund employs leverage in the form of borrowing on margin and/or using proceeds from shorts, which allows the Fund to use its long positions as collateral, in order to purchase additional securities. Borrowing on margin and/or using proceeds from shorts are secured by assets of the Fund that are held with the Fund's custodian in a separate account. The Fund is permitted to borrow up to 33.33% of its total assets.

During the period ended June 30, 2016, the Fund utilized borrowing on margin and/or using proceeds from shorts for 85 days at an average interest rate of 0.79% and with an average daily borrowing balance during that period of \$48,636. For the period ended June 30, 2016, the interest costs related to borrowing amounted to \$90 and are included within the "Dividends and interest expense on securities sold short and borrowings" line on the Statement of Operations.

As of June 30, 2016, outstanding borrowings amounted to \$69,891 which is included in the balance of "Borrowings" on the Statement of Assets and Liabilities.

Note 10. Credit Risk and Asset Concentrations

In countries with limited or developing markets, investments may present greater risks than in more developed markets and the prices of such investments may be volatile. The consequences of political, social or economic changes in these markets may have disruptive effects on the market prices of these investments and the income they generate, as well as the Fund's ability to repatriate such amounts.

The Fund may invest a high percentage of its assets in specific sectors of the market in the pursuit of its investment objective. Fluctuations in these sectors of concentration may have a greater impact on the Fund, positive or negative, than if the Fund did not concentrate its investments in such sectors.

Note 11. Regulatory Matters and Litigation

From time to time, the Fund's investment adviser and/or its affiliates and/or subadvisers may be involved in litigation and arbitration as well as examinations and investigations by

THE ZWEIG TOTAL RETURN FUND, INC.
NOTES TO FINANCIAL STATEMENTS (Continued)
JUNE 30, 2016 (Unaudited)

various regulatory bodies, including the SEC, involving compliance with, among other things, securities laws, client investment guidelines, laws governing the activities of broker-dealers and other laws and regulations affecting their products and other activities. At this time, the Fund's investment adviser believes that the outcomes of such matters are not likely, either individually or in the aggregate, to be material to these financial statements.

Note 12. Federal Income Tax Information

(\$ reported in thousands)

At June 30, 2016, federal tax cost and aggregate gross unrealized appreciation (depreciation) of securities held by the Fund were as follows:

	<u>Federal Tax Cost</u>	<u>Unrealized Appreciation</u>	<u>Unrealized Depreciation</u>	<u>Net Unrealized Appreciation (Depreciation)</u>
Investments	\$405,677	\$34,380	\$(12,610)	\$21,770
Securities Sold Short . .	(73,129)	3,808	(1,957)	1,851
Written Options	1,654	1,433	(53)	1,380

The differences between book basis cost and tax basis cost were attributable primarily to the tax deferral of losses on wash sales and passive activity losses.

Note 13. Subsequent Event Evaluations

Management has evaluated the impact of all subsequent events on the Fund through the date the financial statements were issued, and has determined that the following subsequent event that requires recognition or disclosure in these financial statements.

On August 22, 2016, the Fund announced that it will commence a tender offer to purchase up to 5 percent of its outstanding shares under the terms of tender offer programs approved earlier this year and announced on April 5, 2016. Each fund will purchase up to 5 percent of the fund's outstanding shares at a price equal to 98 percent of each fund's net asset value (NAV) per share as of the close of regular trading on the New York Stock Exchange on the date the tender offers expire. If more than 5 percent of a fund's outstanding shares are tendered, the fund will purchase shares from tendering stockholders on a pro-rata basis. The tender offers are being made on the terms and subject to the conditions set forth in the Issuer Tender Offer Statements and related Letters of Transmittal that will be filed with the Securities and Exchange Commission. The tender offers are expected to commence on November 25, 2016 and terminate at 11:59 p.m. (Eastern) on December 23, 2016, unless extended. The pricing dates will also be December 23, 2016, unless the tender offers are extended.

Report on Annual Meeting of Shareholders

The Annual Meeting of Shareholders of The Zweig Total Return Fund, Inc. was held on June 10, 2016. The meeting was held for purposes of electing two (2) Directors to the Board of Directors for a three-year term.

The results were as follows:

<u>Election Directors</u>	<u>Votes For</u>	<u>Votes Withheld</u>
George R. Aylward	20,352,865	6,687,144
William H. Wright II	20,322,130	6,717,879

Based on the foregoing, George R. Aylward and William H. Wright II were re-elected to the Board of Directors. The Fund's other Directors who continued in office were James B. Rogers, Christopher Ruddy, R. Keith Walton and Brian T. Zino.

Changes to Board Membership Subsequent to the Annual Meeting of Shareholders

On August 2, 2016, the Fund announced that Philip R. McLoughlin and James M. Oates had been appointed as Directors. The Fund also announced that its Board of Directors had accepted the resignations of Christopher Ruddy and William H. Wright II and thanked them for their service to the Fund. Thus, the Directors who currently continue in office are Messrs. Aylward, McLoughlin, Oates, Rogers, Walton and Zino.

For general information and literature, as well as updates on net asset value, share price, major industry groups and other key information.

REINVESTMENT PLAN

Many of you have questions about our reinvestment plan. We urge shareholders who want to take advantage of this plan and whose shares are held in "Street Name," to consult your broker as soon as possible to determine if you must change registration into your own name to participate.

REPURCHASE OF SECURITIES

Notice is hereby given in accordance with Section 23(c) of the Investment Company Act of 1940 that the Fund may from time to time purchase its shares of common stock in the open market when Fund shares are trading at a discount from their net asset value.

PROXY VOTING INFORMATION (FORM N-PX)

The Adviser votes proxies relating to portfolio securities in accordance with procedures that have been approved by the Fund's Board of Directors. You may obtain a description of these procedures, along with information regarding how the Fund voted proxies during the most recent 12-month period ended June 30, free of charge, by calling toll-free 1-800-272-2700. This information is also available through the Securities and Exchange Commission's ("SEC") website at <http://www.sec.gov>.

FORM N-Q INFORMATION

The Fund files a complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. Form N-Q is available on the SEC's website at <http://www.sec.gov>. Form N-Q may be reviewed and copied at the SEC's Public Reference Room. Information on the operation of the SEC's Public Reference Room can be obtained by calling toll-free 1-800-SEC-0330.

CERTIFICATION (Unaudited)

The Fund's Chief Executive Officer ("CEO") will file the required annual CEO certification regarding compliance with the NYSE's listing standards no more than 30 days after the Fund's annual shareholder meeting and the Fund also has included the certifications of the Fund's CEO and Principal Financial Officer required by Section 302 of the Sarbanes-Oxley Act in the Fund's Form N-CSR filed with the SEC for the period of this report.
