**ZWEIG FUND AND ZWEIG TOTAL RETURN FUND
ANNOUNCE INCREASES TO DISTRIBUTION RATES**

NEW YORK, April 1, 2016 – The Boards of Directors of [The Zweig Fund, Inc.](#) (NYSE: ZF) and [The Zweig Total Return Fund, Inc.](#) (NYSE: ZTR) today announced that each fund has approved an increase in the annualized distribution rate to 10 percent of the fund’s net asset value (NAV). Each fund will implement enhancements to its investment strategies that are intended to increase the amount of income available for distribution to shareholders.

The new 10 percent annualized distribution rate represents a 67 percent increase for the Zweig Fund and a 43 percent increase for the Zweig Total Return Fund and will be paid as follows:

	<u>Amount</u> <u>Per Share</u>	<u>Record Date</u>	<u>Ex Date</u>	<u>Payable Date</u>
ZF (<i>Quarterly</i>)	\$0.362	April 11, 2016	April 7, 2016	April 18, 2016
ZTR (<i>Monthly</i>)	\$0.112	April 11, 2016	April 7, 2016	April 18, 2016

[Zweig Advisers](#), the investment adviser to the funds, will introduce an options overlay strategy to each fund’s existing investment strategy. The overlay strategy involves purchasing and selling put and call options with the objective of generating additional income from option premiums while seeking to limit potential losses. The adviser also intends to increase the opportunistic use of leverage that each fund is permitted to incur, consistent with its investment restrictions.

Zweig Fund, Zweig Total Return Fund - 2

Management and the Boards believe these distribution rates are appropriate at this time and consistent with each fund's investment objective. The Boards will continue to assess the level of distributions, giving consideration to evolving market conditions and other relevant factors.

Section 19(a) notice: ZF

The following chart discloses information on the sources of the quarterly distribution from the Zweig Fund (ZF):

Distribution Estimates (Sources)	March 2016 (QTD)		Year-to-date (YTD) ⁽¹⁾

(1) The distribution paid on January 11, 2016 was reportable in 2015 for federal income tax purposes and any distributions paid from January 12, 2016 to January 10, 2017 will be reportable for 2016 federal income tax purposes.

You should not draw any conclusions about ZF's investment performance from the amount of this distribution or from the terms of ZF's managed distribution plan. ZF estimates that it has distributed more than its income and net realized capital gains in the fiscal year to date; therefore, a portion of the distribution may be a return of capital. A return of capital may occur, for example, when some or all of the money that you invested in the fund is paid back to you. A return of capital distribution does not necessarily reflect the fund's investment performance and should not be confused with "yield" or "income."

The amounts and sources of distributions reported in this notice are only estimates and are not being provided for tax reporting purposes. The actual amounts and sources of the amounts for tax reporting purposes will depend upon the fund's investment experience during the remainder of its fiscal year and may be subject to changes based on tax regulations. The fund will send shareholders a Form 1099-DIV for the calendar year that will tell you how to report these distributions for federal income tax purposes.

Information regarding the fund's performance and distribution rates is set forth below. Please note that all performance figures are based on the fund's NAV and not the market price of the fund's shares. Performance figures are not meant to represent individual shareholder performance.

As of March 31, 2016	
<i>Five-Year Average Annual Total Return on NAV ⁽¹⁾</i>	6.3%
<i>Current Fiscal YTD Annualized Distribution Rate ⁽²⁾</i>	10.0%
<i>YTD Cumulative Total Return on NAV ⁽³⁾</i>	-2.0%
<i>YTD Cumulative Distribution Rate ⁽⁴⁾</i>	2.5%

(1) Average Annual Total Return on NAV is the annual compound return for the five-year period. It reflects the change in the fund's NAV and reinvestment of all distributions.

Fund Risks

An investment in a fund is subject to risk, including the risk of possible loss of principal. The fund's shares may be worth less upon their sale than what an investor paid for them. The options overlay strategy may not be successful in achieving its objective of increasing distributable income while limiting the risk of loss and could result in increased losses for investors. An increased use of leverage may lead to increased volatility in the fund's NAV and share price, and could amplify the fund's level of gains or losses.
