### Risk Statistics

Class A 3-Year	Fund	Index
R <sup>2</sup>	0.46	1.00
Beta	0.49	1.00
Standard Deviation	7.41	10.26

### GLOSSARY

**R<sup>2</sup>:** A measurement of how closely a portfolio's performance correlates with the performance of a benchmark index.

**Beta:** A quantitative measure of the volatility of a given portfolio to the overall market. Higher beta suggests higher volatility.

**Standard Deviation:** Measures variability of returns around the average return for an investment portfolio. Higher standard deviation suggests greater risk.

### IMPORTANT RISK CONSIDERATIONS:

**Equity Securities:** The market price of equity securities may be adversely affected by financial market, industry, or issuer-specific events. Focus on a particular style or on small or medium-sized companies may enhance that risk. **Credit & Interest:** Debt securities are subject to various risks, the most prominent of which are credit and interest rate risk. The issuer of a debt security may fail to make interest and/or principal payments. Values of debt securities may rise or fall in response to changes in interest rates, and this risk may be enhanced with longer-term maturities.

**Industry/Sector Concentration:** A fund that focuses its investments in a particular industry or sector will be more sensitive to conditions that affect that industry or sector than a non-concentrated fund.

**Derivatives:** Investments in derivatives such as futures, options, forwards, and swaps may increase volatility or cause a loss greater than the principal investment.

**Allocation:** The fund's exposure to different asset classes may not be optimal for market conditions at a given time. Asset allocation does not guarantee a profit or protect against a loss in declining markets.

**Foreign Investing:** Investing internationally involves additional risks such as currency, political, accounting, economic, and market risk. **Real Estate:** The fund may be negatively affected by factors specific to the real estate market, including interest rates, leverage, property, and management.

**Fund of Funds:** Because the fund can invest in other funds, it indirectly bears its proportionate share of the operating expenses and management fees of the underlying fund(s).

**Affiliated Funds:** The fund's adviser can select affiliated and/or unaffiliated funds, which may create a conflict of interest. **Prospectus:** For additional information on risks, please see the fund's prospectus.
